Map Stories Francisca Matteoli,2016-11-01 Through this magnificent collection of historical maps, travel writer Francisca Mattéoli takes us on a geographical adventure, telling the stories of twenty places and voyages that inspired her and the creation of these fascinating charts. Discover some of the world's most magical places and how they revealed themselves, from the lost trails of the first colonies of the American West to Amundsen's exploration of the South Pole, and the rediscoveries of Petra and Angkor Wat. This unexpected volume will let the curious mind roam the contours of the planet, and discover how the world we know today was made, and un-made.

New Worlds Ashley Baynton-Williams,Miles Baynton-Williams,2008

Time in Maps Kären Wigen,Caroline Winterer,2020-11-20 Maps organize us in space, but they also organize us in time. Looking around the world for the last five hundred years, Time in Maps shows that today's digital maps are only the latest effort to insert a sense of time into the spatial medium of maps. Historians Kären Wigen and Caroline Winterer have assembled leading scholars to consider how maps from all over the world have depicted time in ingenious and provocative ways. Focusing on maps created in Spanish America, Europe, the United States, and Asia, these essays take us from the Aztecs documenting the founding of Tenochtitlan, to early modern Japanese reconstructing nostalgic landscapes before Western encroachments, to nineteenth-century Americans grappling with the new concept of deep time. The book also features a defense of traditional paper maps by digital mapmaker William Rankin. With more than one hundred color maps and illustrations, Time in Maps will draw the attention of anyone interested in cartographic history.

The Discovery of the World Elizabeth Hale,1985

The Origin Map Thomas G. Brophy,2002 On a desolate plain in the Egyptian Sahara desert, west of Aswan, there is a very remote prehistoric site called Nabta Playa. There, a recently discovered complex of extremely ancient man-made megalithic structures have baffled the archaeologists who excavated them. An insight into the meaning and use of the megaliths led to a step-by-step sequence of discoveries, verified by measure and calculation, revealing that the megalithic architecture at Nabta Playa is a unified and detailed astrophysical map of truly astonishing accuracy, with no less than staggering implications. Written for the educated general reader, with technical appendices, the discovery of how to decipher the system of megalithic structures is reported with gripping clarity.

Discovery of Longitude, The Joan Marie Galat,2012-09-14 Scientific discovery changes the world! Discover the fascinating story behind one of the most important changes to nautical navigation in this nonfiction book for young readers. More than 300 years ago, explorers wandered the seas using unreliable maps. What they needed to know was the longitude of their locations, but for that they needed accurate time keeping. Unfortunately, no accurate source of time measurement at sea existed. In 1714 the British government decided to offer a reward to anyone who could solve the problem. Learned men and great thinkers alike tried unsuccessfully to work out a solution. They declared it unsolvable! Carpenter John Harrison was intrigued; he thought he might have a solution. He worked for years to design a clock that functioned accurately at sea, even though no one believed he could do it. Even after his timepiece was demonstrated effective at sea, he was still not acknowledged for his ingenious solution. It took many years and intervention by the king to grant Harrison the recognition and reward he deserved for solving the problem of how to accurately track longitude and for winning the British government prize. The book offers a detailed map of the world at that time and includes the advancements in the use of longitude since then.

Historical Atlas of the North Pacific Ocean Derek Hayes,2001 Map junkies rejoice! Derek Hayes, author of Historical Atlas of the Pacific Northwest, delivers another stunning atlas filled with stories of explorations and exquisite historical maps. Over five hundred years of maps depicting the North Pacific Ocean and the lands that border it -- the United States, Canada, Alaska, Russia, Japan, Korea, and China -- have been collected into this new atlas. From antique maps of the sixteenth century to modern satellite images, this volume covers all the major explorations, such as Magellan, Bering, Cook, and Vancouver; Perry's opening of Japan; and the U.S. North Pacific Exploring Expedition. It also includes modern maps that use the latest technology to show ocean currents, fault lines, and the seabed in astounding detail.

Maps of the World Enrico Lavagno,2018-09-18 A lavishly illustrated, fact-filled, oversized atlas that allows children to discover the world without leaving their home. Covering every continent, country, even outer space, Maps of the World is a vibrant and comprehensive atlas that children of all ages will love to explore. The dozens of colorful, detailed maps are filled with charming, educational icons representing the aboriginal people in Australia, giant tortoises in the Galapagos, the Gold Rush in California, traditional dress in Mali, and even James Bond in England. Flip the next page in the book, and the corresponding icon key explains hundreds of these cultural, environmental, and societal illustrations. Organized by continent, the atlas also includes details on populations, language, agricultural, politics, and other bite-size facts. Each map includes a link allowing kids to download a version of them on computers and tablets to explore even further. Captivating and comprehensive, Maps of the World will entice even the most reluctant young explorer.

Process Discovery Best Practices Using IBM Blueworks Live Joshua King,Nachiappan Chidambaram,Peter Lee,Philipp Schume,David Teran,IBM Redbooks,2014-10-29 Business processes and decisions are the backbone of every company, from the small to the Fortune 50; it is how the business runs. It is these processes and decisions that can create competitive advantage, help a company react more quickly to changing trends, or drag them down because the processes do not serve the business and allow agility. The first step in building business agility is to understand how the business works today; What are my processes? What are the decisions we are making and how do we make them? Understanding these processes and decisions can allow a company to improve, streamline, and increase efficiency. Capturing business processes can be a daunting task. Adding to that burden is learning the tool of choice for capturing those processes. This book helps the audience ramp up more quickly to a fully functional process analyst by explaining all of the features of IBM Blueworks Live™ and how best to use them. This IBM® Redpaper™ was written with a non-technical audience in mind. It is intended to help business users, subject matter experts, business analysts, and business managers get started with discovering, documenting, and analyzing the processes and decisions that are key to their company's business operations.

The Great Atlas of Discovery Neil Grant,1992 Maps and text depict major areas and routes of exploration from about 6000 B.C. to the present

On the Map Simon Garfield,2013-11-05 Examines the pivotal relationship between mapping and civilization, demonstrating the unique ways that maps relate and realign history, and shares engaging cartography stories and map lore.

Half Moon Douglas Hunter,2010-08-31 A tribute to Henry Hudson's discovery of the river that bears his name recounts how the historical explorer defied commission orders to find an eastern passage to China by redirecting his voyage along the coastline from Spanish Florida to the Grand Banks, an effort that laid a foundation for New York's establishment as a global capital. Reprint.

Mapping Antarctica Robert Clancy,John Manning,Henk Brolsma,2013-12-02 Everyone likes maps and maps are always used to illustrate the many books on the Antarctic. Here the focus is reversed with contemporary maps telling the story – one that should be attractive to the widest audience as it is a unique approach complimenting what has gone before and providing something

different for all interested in Antarctica.

Explorers' Maps Raleigh Ashlin Skelton, 1970

Mapping the Renaissance World Frank Lestringant, 2014-02-28 This book focuses on the work of the great sixteenth-century traveller and map-maker Andre Thevat and explores the interrelations between representation and power in the age of discovery.

Historical Atlas of the North Pacific Ocean Derek Hayes, 2001 The Spaniard Vasco Nunez de Balboa was in 1513 the first European to confirm that another ocean lay to the west of America. Geographical knowledge of the North Pacific grew only slowly, and it was not until James Cook's third voyage in 1778/9 that the bounds of the ocean were truly revealed. Now, with the advent of modern technology, the fine details of the sea bed can be plotted and the behaviour of the ocean itself can begin to be understood. This book looks at the history of the North Pacific (i.e. north of 30 degrees N) and its shores - China, Korea, Japan, Russia, the United States and Canada - through maps. All the important voyages of exploration are covered, illustrated with the explorers' own maps or contemporary maps which show what they thought the geography looked like before they arrived, and what they added to the map of the world. Here are Dutch, Chinese, Korean, Japanese, Russian, American, Spanish, French and British maps collected from archives and libraries around the world. They include Sir Francis Drake's thrust into waters the Spanish considered their own, Bering's two voyages 'discovering' America, the voyages of Captain Cook, George Vancouver's comprehensive

Atlas of Great Journeys Philip Steele, 2020-10-29 The Atlas of Great Journeys allows readers to follow in the footsteps of the most daring adventurers as they set out to explore the unknown. Fascinating original map illustrations show the world's greatest journeys, and lavishly illustrated fact pages tell the stories of each expedition - what dangers they faced, how long they travelled, and much more. As well as amazing illustrated maps and stories, this book has a unique Augmented Reality component that magically brings these journeys to life. Use your tablet or phone on each map spread to trace the routes they took and read about every stage of their journeys.

New Found Lands Peter Whitfield, 2015-12-22 First Published in 1998. An exploration narrative can be a tale of adventure and endurance, a technical account of navigation and seamanship, or a political history of the overseas empires that were built up in the wake of the explorers. In *New Found Lands*, Peter Whitfield takes a different approach. By focusing on the maps that the explorers themselves used, Whitfield reveals how the both the explorers and their patrons understood their expanding world and their place in it, what they were seeking and how they thought they could achieve it, and how they integrated new knowledge into their evolving world view. The maps in *New Found Lands* present the geographical ideas of the time, making plain the power that came with increasing technical and geographical knowledge. They also serve as evocative and poignant reminders of the limited knowledge of these explorers. For up until very recent times, as these maps show, there have been areas of the world remaining to be explored and new found lands to discover. This lavishly illustrated book progresses chronologically, starting with the explorers of the ancient world, covering the East, the New World, the Pacific, Australia and the Modern Era. It will enrich our understanding of the voyages of discovery undertaken over the past 2000 years and will delight any map or history lover. Also includes 150 color and black and white maps.

Shedding the Veil Thomas Suárez, 1992-03-31 *Shedding the Veil* is a highly original overview of Europe's exploration and discovery beyond her own confines. It tackles the subject via an analysis of maps dating from circa 1434 to 1865, with an emphasis on the period before 1600. The book begins with an appraisal of the peculiar circumstances which led late medieval Europe to pursue long-distance travel, both overland and by sea, introduces cosmographic traditions inherited from classical times, and investigates pre-Columbian excursions into the western ocean. Finally, the great voyages and mappamundi of the early sixteenth century are described in depth. After 1600 the focus begins to narrow North America and particularly to the colonization of the American Northeast. All maps discussed in detail are illustrated. 40 full-page b/w plates, 25 full-page color plates. Contents: Part One: A World Called Europe: Precedents The World As Known to Medieval Europe Classical Enlightenment: The Renaissance Before Columbus Part Two: A New World: The Western Antipodes? The Race to Skirt America Truly a Fourth Part of the Globe Part Three: Early Colonization: The British and French The Dutch Pre- and Post- Revolution Readership: General. keywords: "... it is wonderful that a single collector could put together such treasures! The author provides readers with good information in a spritely manner ... The Book is physically attractive, and the sixty-five illustrations (40 black and white; 25 color) are good. According to David Jolly in the flyer about the book, it will be sought after by collectors and dealers. In my opinion scholars could learn much from it as well ... The book offers a lively text about some very interesting and rare maps." Meridian "It is based on selected items from the collection of Sidney R Knafel, the quality and depth of which is clearly shown in the book ... It is good to see such a well illustrated book, and a work in which the discussions are clear, concise and informative ... An unusual feature is the binding of the book which is imitation leather rather than the usual cloth binding. This should ensure its longevity." The Map Collector "The individual entries not only describe the map, but contain a wealth of information on the historical context of each item. Many obscure but interesting sidelights are given ... More than 300 footnotes and an extensive index evidence just how wide-ranging this work is ... any collector or dealer will find this a valuable addition to their reference library." Antique Map Handbook "The many explanatory footnotes will be of interest and help to less expert readers ... Mr Knafel, the collector; Mr Suarez the compiler, and the publisher deserve credit for an outstanding production that should please cartomaniacs very much." Cartomania "This recently published book is probably the best book available on the early maps of the discovery period. It also covers some important later maps chiefly relating to New England. The book is destined to be a classic." Paul Mahoney "In this well produced book, Thomas Suárez illustrates and describes 61 maps and globes in the Sidney R Knafel Collection. The maps were produced between 1472 and 1865, a period which saw considerable developments in exploration, science and map-making ... he shows wide knowledge and scholarship." IMCOS Journal "The book's excellent scholarly commentary on the 61 maps discussed and illustrated sets it apart from the many coffee table publications which have appeared in recent years." Society for the History of Discoveries "This book provides a very personal, interpretive look at important early map of the Americas ... I enjoyed the journey — and know I will return to this book again and again. Mr Suarez has great respect for the maps he describes, both for their cartographic artistry and the intellectual puzzles they present us ... This book represents a welcome and unusual linking of private collector, dealer, publisher and exhibitors." Association of Canadian Map Libraries and Archives "Shedding the Veil is a welcome overview of an extensive private collection for which no catalogue had been published. For individuals interested in the history of cartography, Suárez serves as a knowledgeable guide to these cartographic documents, interpreting them in the light of the historical, political and cultural context in which they were shaped." Cartographica

From Maps to Metaphors Robin Fisher, Hugh Johnston, 2011-11-01 During the summers of 1792-94, George Vancouver and the crew of the British naval ships *Discovery* and *Chatham* mapped the northwest coast of North America from Baja California to Alaska. Taking the art and technique of distant voyaging to a new level, Vancouver eliminated the possibility of a northwest passage and his remarkably precise surveys completed the outline of the Pacific. But to map an area is to appropriate it ♦ to begin to bring it under control ♦ and Vancouver's charts of the northwest coast were part of a process of economic exploitation and cultural disruption. The chapters in this illuminating book are written from a variety of perspectives and provide new insights on many aspects of Vancouver's voyages, from the technology employed to the complex political and power relationships among European explorers and the Native leadership.
