📖 **THE ART OF TEACHING PHYSICS WITH ANCIENT CHINESE SCIENCE AND TECHNOLOGY** Matt Marone, 2022-05-31 Blending physics with the study of ancient Chinese science, technology, and culture is a unique and highly effective way to present the fundamentals of physics to non-science majors. Based on the author’s course at Mercer University (Georgia, U.S.), The Art of Teaching Physics with Ancient Chinese Science and Technology exposes a wide range of students to the scientific method and techniques of experimental analysis through the eyes and discoveries of ancient Chinese “polymaths” long before the European concept of the scientific method was even considered. No other book so deftly makes the connections from ancient China to Ben Franklin to Michael Faraday while teaching physics at the same time. A distinctive characteristic of this book is the detailed hands-on laboratory experiments. This first includes making a simple magnetic compass and magnetometer. Students then use the compass/magnetometer to measure the strength of the magnetic field produced by a long straight wire. The second experiment covers two different methods of mining copper to introduce students to simple chemical principles such as displacement reactions, oxidation, reduction, and electronegativity. Originally developed for non-science students in an Asian studies environment, this book provides a valuable resource for science teachers who wish to explore the historical connections largely ignored in traditional texts. When paired with Teaching Physics through Ancient Chinese Science and Technology (Marone, 2019), these two texts provide a unique means of studying selected topics traditionally found in a two-semester physics course.

📖 **MANLY MANNERS** Wayne James, 2016-11-21 Manly Manners: Lifestyle & Modern Etiquette for the Young Man of the 21st Century is the first volume of a three-volume treatise on modern mens manners by fashion designer, lawyer, former senator Wayne James. Elegant, sophisticated, and immensely informative yet edgy, sexy, witty, and even irreverent at times the trilogy is poised to become the definitive lifestyle guide for the modern man. Is there a difference in the way one holds a glass of red wine versus a glass of white? How should a young man conduct himself in a gay sauna? What are the rules for shopping while ethnic? Ever heard of a tabarro? How does a gentleman correctly wear one? What should a young man do (and not do) if detained by law enforcement officers? And what’s the best way to survive prison unraped? How should a gentleman comport himself when invited to coffee in Ethiopia or a funeral in Japan? Is there gloryhole etiquette? Who enters a revolving door first: the man or the woman? What about when entering and exiting restaurants? How should transgender people conduct themselves in gender-specific public restrooms? Ladies are taught how to sit, stand, and walk correctly. But what’s the comportment for their male counterparts? Is there a way to politely suggest an enema to a sex-partner before engaging in anal sex? And what are the new and emerging rules for planning a same-sex wedding? How should a corn-fed, red-blooded, young man apologize to his tellak for getting a raging erection while being massaged on the gbektasi? Roll over and play dead? When conducting business in China or in the Arab world, what are the faux pas that can kill a multi-million-dollar deal? Is there a difference between a blazer and a sport coat? And what’s the history of penny loafers or mens underwear? Such topics, and many moresome as mundane as how to correctly use a bidet, others as arcane as how to conduct oneself during an audience with the pope are addressed in the more than 800 pages of Manly Manners: Lifestyle & Modern Etiquette for the Young Man of the 21st Century. Manners is a man’s job; and Manly Manners is the new manual.

📖 **POWER AND PROPAGANDA IN THE LARGE IMPERIAL CAMEOS OF THE EARLY ROMAN EMPIRE** Julia C. Fischer, 2024-04-10 This study examines the five extant large imperial cameos of the early Roman Empire as a coherent whole, revealing that these gemstones were a referential group with complex interrelationships. Power and Propaganda in the Large Imperial Cameos of the Early Roman Empire offers a feminist theory that explains why large imperial cameos were in dialogue and why the medium appears with Octavian and disappears by the Flavian dynasty: female imperial family members commissioned them to advance their husbands and sons. This volume is an introduction to large imperial cameos and reveals their importance for the understanding of Roman art and iconography and the implications of its theorized imperial female patronage. The book will be of interest to scholars working in art history, classics, and archaeology.

📖 **CHEMOKINE-GLYCOSAMINOGLYCAN INTERACTIONS** Alexandra R. Lucas, 2022-11-14 This detailed volume provides methods to guide assay development, procedures designed to investigate the chemokine and glycosaminoglycan (GAG) networks, as well as their interactions, in a wide range of organs and tissues in disease and in health. The initial chapters in this book present in vivo models used to examine the roles of chemokines and GAGs in normal physiology and in the pathophysiology of disease. The book then explores present cell- and tissue-based in vitro assays to examine chemokine:GAG interactions. Finally, analytic approaches are presented that provide assays for measuring GAGs, chemokines, and cellular responses. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step and readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, Chemokine-Glycosaminoglycan Interactions: Methods and Protocols serves as an ideal guide for researchers seeking to analyze chemokine and GAG functions, interactions, and molecular mechanisms in vivo and in vitro.

With a new team of thieves — a supersoldier, a hacker, a driver, a graffiti artist, and a seafaring wizard — JT and Austin are determined to free an artificial intelligence from the dungeon of the Burning Magus. For JT, this job is more than a prison break; it’s a do-over of the job that went bad two years ago, the catastrophe in which JT lost his closest friend and then chose to abandon everything, even Austin. Maybe this time no one will die. Maybe this time JT can return to Arizona and bury his old life for good. Except Austin won’t be buried. After two years alone, Austin knows he wants JT — not just as a partner in crime, but as the lover he always should have been. 📖 **Starbridge** Roger Quest,2005-08 Colonel Jensen could see the fallen tinheads in the target area from the first squad point man’s visual feed. Jensen watched as the first squad moved closer to the tinheads. Something struck him as strange about what he saw; but, he couldn’t quite put his finger on what. As he studied the pattern in which the destroyed tinheads laid, it dawned on him why it looked so strange. The tinheads were arranged in an unusually symmetrical heap of shredded metal torsos and limbs. Almost a perfect semicircle, thought Jensen. Then Jensen saw something that made him react instantly. One of the severed weapons appendages was moving. Hit the deck, Jensen screamed. Almost simultaneously, the spacemarines drove themselves into alien soil. At nearly the same instant a shielded tachyon beam passed above squad one. Suddenly, tinheads started appearing from behind the mass of metal carnage. Few were whole, most were damaged, missing limbs even heads.
