The Tyranny of E-mail John Freeman, 2009-10-20 The award-winning president of the National Book Critics Circle examines the astonishing growth of email—and how it is changing our lives, not always for the better. John Freeman is one of America's pre-eminent literary critics; now in this, his first book, he presents an elegant and erudite investigation into a technology that has revolutionized the way we work, communicate, and even think. There's no question that email is an explosive phenomenon. The first email, developed for military use, was sent less than forty years ago; by 2011, there will be 3.2 billion users. The average corporate employee now receives upwards of 130 emails per day; by 2009 that number is expected to reach nearly 200. And the flood of messages is ceaseless: for increasing numbers of people, email means work now occupies home time as well as office hours. Drawing extensively on the research of linguists, behavioral scientists, cultural critics, and philosophers, Freeman examines the way email is taking a mounting toll on a variety of behavior, reducing time for leisure and contemplation, despoiling subtlety and expression in language, and separating us from each other in the unending and lonely battle with the overfull inbox. He enters a plea for communication which is slower, more nuanced, and, above all, more sociable.

Read This Before Our Next Meeting Al Pittampalli, 2015-09-15 Traditional meetings are a weapon of mass interruption. Long live the Modern Meeting! The average American office worker spends eleven hours in meetings every week. Yet all that time sitting around a conference table hasn't made us more productive. If anything, meetings have made work worse. Traditional meetings reduce efficiency, kill urgency, and breed compromise and complacency. Worst of all, our dysfunctional meeting culture changes how we focus, what we focus on, and what decisions we make. But there is a solution, a way to have fewer, shorter, more purposeful meetings. It's called the Modern Meeting Standard. By following its eight simple but radical principles you may never have to attend a useless meeting again. Read This Before Our Next Meeting is the call to action you (and your boss) need.

Fearless Genius Doug Menuez, 2014-06-03 An award-winning documentary photographer delivers a stunning visual history of the Silicon Valley technology boom, in which he was witness to key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world. An eye-opening chronicle of the Silicon Valley technology boom, capturing key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world In the spring of 1985, a technological revolution was under way in Silicon Valley, and documentary photographer Doug Menuez was there in search of a story-something big. At the same time, Steve Jobs was being forced out of his beloved Apple and starting over with a new company, NeXT Computer. His goal was to build a supercomputer with the power to transform education. Menuez had found his story: he proposed to photograph Jobs and his extraordinary team as they built this new computer, from conception to product launch. In an amazing act of trust, Jobs granted Menuez unlimited access to the company, and, for the next three years, Menuez was able to get on film the spirit and substance of innovation through the day-to-day actions of the world's top technology guru. From there, the project expanded to include the most trailblazing

companies in Silicon Valley, all of which granted Menuez the same complete access that Jobs had. Menuez photographed behind the scenes with John Warnock at Adobe, John Sculley at Apple, Bill Gates at Microsoft, John Doerr at Kleiner Perkins, Bill Joy at Sun Microsystems, Gordon Moore and Andy Grove at Intel, Marc Andreessen at Netscape, and more than seventy other leading companies and innovators. It would be fifteen years before Menuez stopped taking pictures, just as the dotcom bubble burst. An extraordinary era was coming to its close. With his singular behind-the-scenes access to these notoriously insular companies, Menuez was present for moments of heartbreaking failure and unexpected success, moments that made history, and moments that revealed the everyday lives of the individuals who made it happen. This period of rapid, radical change would affect almost every aspect of our culture and our lives in ways both large and small and would also create more jobs and wealth than any other time in human history. And Doug Menuez was there, a witness to a revolution. In more than a hundred photographs and accompanying commentary, *Fearless Genius* captures the human face of innovation and shows what it takes to transform powerful ideas into reality.

How Iceland Changed the World Egill Bjarnason, 2021-05-11 [A] joyously peculiar book. -- The New York Times 'Bjarnason's intriguing book might be about a cold place, but it's tailor-made to be read on the beach.' -New Statesman The untold story of how one tiny island in the middle of the Atlantic has shaped the world for centuries. The history of Iceland began 1,200 years ago, when a frustrated Viking captain and his useless navigator ran aground in the middle of the North Atlantic. Suddenly, the island was no longer just a layover for the Arctic tern. Instead, it became a nation whose diplomats and musicians, sailors and soldiers, volcanoes and flowers, quietly altered the globe forever. *How Iceland Changed the World* takes readers on a tour of history, showing them how Iceland played a pivotal role in events as diverse as the French Revolution, the Moon Landing, and the foundation of Israel. Again and again, one humble nation has found itself at the frontline of historic events, shaping the world as we know it, *How Iceland Changed the World* paints a lively picture of just how it all happened.

Impact Journal Augusto Pinaud, 2019-05-20 As a person that have had many years working, interacting and sharing on the world of Personal Productivity and as a Productivity Coach one of the things that I have noticed is that

people fail to reach their goals because they simply do not know where to go. Most people plan once and hope to get there, and what happens is that they get pushed by life, by events, by their reaction to things. This journal was created in order to help people to keep themselves on track. Yes, you need to come and work on it daily. Morning and Night. It is hard. Yes! But also it is something that after a while you get to work and accomplish amazing things. It is not complicated. The results are simply amazing. In the next pages I will explain to you how to use it, but do not think it is the only way, make it yours, dream with it, grow with it. I wish you luck on your Impact Journey. Augusto Pinaud April 2019.
