The Distorting Mirror Laikwan Pang, 2007-10-31 The *Distorting Mirror* analyzes the multiple and complex ways in which urban Chinese subjects saw themselves interacting with the new visual culture that emerged during the turbulent period between the 1880s and the 1930s. The media and visual forms examined include lithography, photography, advertising, film, and theatrical performances. Urbanites actively engaged with and enjoyed this visual culture, which was largely driven by the subjective desire for the empty promises of modernity—promises comprised of such abstract and fleeting concepts as new, exciting, and fashionable. Detailing and analyzing the trajectories of development of various visual representations, Laikwan Pang emphasizes their interactions. In doing so, she demonstrates that visual modernity was not only a combination of independent cultural phenomena, but also a partially coherent sociocultural discourse whose influences were seen in different and collective parts of the culture. The work begins with an overall historical account and theorization of a new lithographic pictorial culture developing at the end of the nineteenth century and an examination of modernity's obsession with the investigation of the real. Subsequent chapters treat the fascination with the image of the female body in the new visual culture; entertainment venues in which this culture unfolded and was performed; how urbanites came to terms with and interacted with the new reality; and the production and reception of images, the dynamics between these two being a theme explored throughout the book. Modernity, as the author shows, can be seen as spectacle. At the same time, she demonstrates that, although the excessiveness of this spectacle captivated the modern subject, it did not completely overwhelm or immobilize those who

engaged with it. After all, she argues, they participated in and performed with this ephemeral visual culture in an attempt to come to terms with their own new, modern self.

The Distorted Mirror Brenda Nottestad,2003-05 In 1998, Brenda Nottestad, a young Christian wife and mother, with two children, was breathing a sigh of relief that her life was so blessed and that her two children were growing into high achieving, good kids. Anorexia and bulimia were foreign to her with the exception of an occasional made-for-TV movie. Until, that is, her own daughter, at age 15 was caught throwing up at school and the cheerleading advisor contacted Brenda. Thus began the journey that is in this book. It is a mother's journal from the depths of disbelief and despair through a maze of counseling, medical treatment and prayer to reach the other side of a mountain she never dreamed her family would be asked to climb. As Brenda grieved, battled and fought the forces of darkness for her daughter, the easy answers she thought would come, just were not there. For every step forward, there were two steps backward. The healing truly had to be a process--a journey of intellect and faith. This book is a remarkable insight into a mother's heart, a daughter's pain, a family's faith, and God's truly amazing grace to overcome the insidious world that is eating disorders.

Shifting Cultural Frontiers in Late Antiquity David Brakke, Deborah Deliyannis, 2016-12-05 *Shifting Cultural Frontiers in Late Antiquity* explores the transformation of classical culture in late antiquity by studying cultures at the borders - the borders of empires, of social classes, of public and private spaces, of literary genres, of linguistic communities, and of the modern disciplines that study antiquity. Although such canonical figures of late ancient studies as Augustine and Ammianus Marcellinus appear in its pages, this book shifts our perspective from the center to the side or the margins. The essays consider, for example, the ordinary Christians whom Augustine addressed, the border regions of Mesopotamia and Vandal Africa, 'popular' or 'legendary' literature, and athletes. Although traditional philology rightly underlies the work that these essays do, the authors, several among the most prominent in the field of late ancient studies, draw from and combine a range of disciplines and perspectives, including art history, religion, and social history. Despite their various subject matters and scholarly approaches, the essays in *Shifting Cultural Frontiers* coalesce around a small number of key themes in the study of late antiquity: the ambiguous effects of 'Christianization,' the creation of new literary and visual forms from earlier models, the interaction and spread of ideals between social classes, and the negotiation of ethnic and imperial identities in the contact between 'Romans' and 'barbarians.' By looking away from the core and toward the periphery, whether spatially or intellectually, the volume offers fresh insights into how ancient patterns of

thinking and creating became reconfigured into the diverse cultures of the 'medieval.'

Salman Rushdie's Cities Vassilena Parashkevova, 2012-02-16 Employing Salman Rushdie as a guide to a historicized contemporary, this study offers an interdisciplinary exploration of the plurality of cities along his transnational trajectory. It engages with the geographically identifiable Bombay, Karachi, Islamabad, London or New York; the phantasmal, politically coded, Jahilia or Mildendo, the inspirational yet flawed urban precedents of Fatehpur Sikri or Renaissance Florence and the ways these cities generate, interact with and transform each other. The book situates Rushdie's cities in relation to developments in Bombay, Karachi, Islamabad and London writing and focuses on novels which shuttle between cities. Parashkevova attends to cities' cultural and historical contexts, to many of Rushdie's numerous literary, cinematic and artistic influences and to diverse events, processes and paradigms - earthquakes, translations, seductions - that politically re-position cities and citizens on the contemporary urban map.

Christopher Meredith Diana Wallace, 2018-05-10 The first book-length study of the work of Christopher Meredith, a leading bilingual Welsh writer Unique in offering close analyses which read across Meredith's poetry and prose Draws on new material from interviews with Meredith to provide new biographical contexts Unusual as a study of a writer who is equally a poet and a novelist Argues that Meredith's writing forms a history of the Anglicised Welsh of south-east Wales which has wider international implications in relation to the experience of living in a bilingual 'small country'.

Guillermo del Toro's Nightmare Alley: The Rise and Fall of Stanton Carlisle Gina McIntyre, 2021-12-17 Join Oscar-winning filmmaker Guillermo del Toro for an intimate exploration of his darkly electrifying

psychological thriller *Nightmare Alley*. Comprehensive and insightful, Guillermo del Toro's *Nightmare Alley: The Rise and Fall of Stanton Carlisle*, is the ultimate companion to the master director's latest work. • **DISCOVER A RIVETING STORY:** Inspired by William Lindsay Gresham's cult 1947 novel, *Nightmare Alley* stars Bradley Cooper as Stanton "Stan" Carlisle, a talented but troubled drifter who takes up with a traveling carnival. Ingratiating himself with its troupe of misfits, Stan swindles his way to fortune and fame, but when he meets psychiatrist Lilith Ritter (Cate Blanchett), his greed and duplicity will put him on the path to self-destruction. Also starring Toni Collette, Willem Dafoe, Richard Jenkins, and Rooney Mara, *Nightmare Alley* is del Toro's most ambitious film to date, an engrossing yet disturbing journey into the psyche of a tragic swindler whose own nature seals his fate. • **EXCLUSIVE INTERVIEWS:** This deluxe volume delves into the creation of all aspects of the film through extensive interviews with del Toro and his cast and crew, including writer Kim Morgan, with whom he collaborated closely on the script. • **NEVER-BEFORE-SEEN CONCEPT ART AND PHOTOS:** This incisive commentary is illustrated with a broad range of striking visuals from the production—including concept art and unit photography—that illuminate the film's two distinct worlds: the ramshackle life of the traveling carnival and the sophisticated art deco trappings of 1940s Buffalo, New York. • **INSIGHTS FROM DEL TORO HIMSELF:** Tracing the arc of a production that faced multiple challenges, not least of all the onset of a pandemic that threatened to derail shooting, del Toro and his team give deep insights into the complex psychology of the film's protagonists and the process of bringing them to life on set.

Seeing Yourself in the Mirror of Truth Laura Shoemaker,2019-12-19 No one would use a funhouse mirror that distorts reflections or a broken mirror that impairs images to apply makeup or style hair. Why, then, do we see the worldly mirrors of others' opinions and our own presumptuous thoughts to view our inner selves? These types of mirrors not only give us a false perception of ourselves, but also they wound us and hold us captive the reflected ugliness of fear, guilt, worry, condemnation, and perfectionism. Many of us see and feel the paralyzing effects of these ugly burdens, but we have no idea how to take them off. Consequently, we continually live in the destructive trap of insecurity, knowing deep down there is more to life than what we are experiencing. Seeing Yourself in the Mirror of Truth illuminates the destructive impact that deception and lies have on your identity. Not only will you become acquainted with the truth that sets you free from this trap, but also you will be taught how to tame, shape, and polish your personality using God's mirror. Just like you partner with the mirror each morning to polish your appearance, you will learn how to partner with God through His Word to see and remove your ugly insecurities as you willingly let God transform you into a beautiful woman in Jesus Christ. Are you ready to look into the mirror of truth?

Intruders in the Mind ,2023-09-05 Thought insertion is the delusion that one's thoughts are not one's own, which causes people to believe that external agents have inserted ideas or thoughts into their minds. More prevalent in schizophrenia, thought insertion has been regarded as one of the most complex psychiatric symptoms. It is easy to see why it is such an intriguing phenomenon, as it blurs our understanding of some of the most fundamental aspects of our mind. Typically, discussions around thought insertion have tended to be featured in the context of philosophical examinations of broader issues in philosophy and psychiatry, or treated as a footnote to discussions of more prominent topics such as motor agency or the structure of phenomenal consciousness. For this reason, discussion of the phenomenon is incomprehensive and scattered throughout the literature, making it difficult to keep track of. *Intruders in the Mind* is an interdisciplinary attempt to bring together high-quality contributions to some of the most fundamental debates arising from the comprehensive study of thought insertion. Making thought insertion its central topic, this compilation gathers a series of essays that, taken as a whole, offer a broad and thoughtful approach to the clinical, phenomenological, conceptual, and experimental aspects of the systematic study of the phenomenon.

Fundamentals of Optomechanics Daniel Vukobratovich, Paul Yoder, 2018-01-29 When Galileo designed

the tube of his first telescope, optomechanics was born. Concerned with the shape and position of surfaces in an optical system, optomechanics is a subfield of physics that is arguably as old as optics. However, while universities offer courses on the subject, there is a scarcity in textbook selections that skillfully and properly convey optomechanical fundamentals to aspiring engineers. Complemented by tutorial examples and exercises, this textbook rectifies this issue by providing instructors and departments with a better choice for transmitting to students the basic principles of optomechanics and allowing them to comfortably gain familiarity with the field's content. Practicing optical engineers who engage in self-study and wish to enhance the extent of their knowledge will also find benefit from the vast experience of the authors. The book begins with a discussion of materials based on optomechanical figures of merit and features chapters on windows, prisms, and lenses. The authors also cover topics related to design parameter, mounting small mirrors, metal mirrors with a discussion of infrared applications, and kinematic design. Overall, Fundamentals of Optomechanics outfits students and practitioners with a stellar foundation for exploring the design and support of optical system surfaces under a wide variety of conditions. Provides the fundamentals of optomechanics Presents self-contained, student-friendly prose, written by top scientists in the field Discusses materials, windows, individual lenses and multiple lenses Includes design, mounting, and performance of mirrors Includes homework problems and a solutions manual for adopting professors

Alhacen on Image-formation and Distortion in Mirrors: Introduction and Latin text Alhazen, A. Mark Smith, 2008 Smith (history, U. of Missouri) is working his way through Alhacen's (965-1039) study of reflection, which is a Medieval Latin version of ibn al-Haytham's Kitab al-Manazir. Book Six concludes the

work by focusing on image distortion, applying the cathetus rule to an analysis of the various misperceptions that arise in the seven types of mirrors he studies in the two previous books. The first volume contains the introduction and Latin text; the second contains the English translation, a Latin-English and glossary, and the bibliography and general index. The volumes are numbered consecutively; the figures appear in both.

Opto-Mechanical Systems Design, Volume 2 Paul Yoder, Daniel Vukobratovich, 2017-12-19 Opto-Mechanical Systems Design, Fourth Edition is different in many ways from its three earlier editions: coauthor Daniel Vukobratovich has brought his broad expertise in materials, opto-mechanical design, analysis of optical instruments, large mirrors, and structures to bear throughout the book; Jan Nijenhuis has contributed a comprehensive new chapter on kinematics and applications of flexures; and several other experts in special aspects of opto-mechanics have contributed portions of other chapters. An expanded feature—a total of 110 worked-out design examples—has been added to several chapters to show how the theory, equations, and analytical methods can be applied by the reader. Finally, the extended text, new illustrations, new tables of data, and new references have warranted publication of this work in the form of two separate but closely entwined volumes. This second volume, *Design and Analysis of Large Mirrors and Structures*, concentrates on the design and mounting of significantly larger optics and their structures, including a new and important topic: detailed consideration of factors affecting large mirror performance. The book details how to design and fabricate very large single-substrate, segmented, and lightweight mirrors; describes mountings for large mirrors with their optical axes in vertical, horizontal, and variable

orientations; indicates how metal and composite mirrors differ from ones made of glass; explains key design aspects of optical instrument structural design; and takes a look at an emerging technology—the evolution and applications of silicon and silicon carbide in mirrors and other types of components for optical applications.
