The Class Structure of Capitalist Societies, Volume 2 Will Atkinson,2021-11-30 The second volume of The Class Structure of Capitalist Societies maps the distribution of social powers and associated properties and lifestyles in unparalleled detail by examining the results of a brand-new survey delivered in Sweden, Germany and the US. Continuing the cross-national investigation of the shape and effects of class systems across capitalist nations, the analyses in Volume 2 are embedded in a novel sociological theory of international relations, sustained reflections on the relationship between national standing and class structure and extensive reconstruction of the histories of class in each of the three nations studied. The ultimate conclusion, however, is that not only that the fundamental structure of class today the same across the three cases, for all their unique cultural and historical features, but their translation into differences of taste, practice and symbolic violence, always cross-cut by gender, follow highly familiar patterns too. This volume will appeal to scholars and advanced undergraduate and postgraduate students interested in sociology, politics and demography and is essential reading for all those interested in social class across the globe.

The Class Structure of Capitalist Societies, Volume 3 Will Atkinson,2024-04-01 This book continues the Class Structure of Capitalist Societies series by exploring the place of class among a confluence of factors in shaping people's lives, loves and lifestyles across three nations. Previous volumes in the series examined the shape, history and cultural expressions of class structures. Now, grappling with themes usually put under the labels of 'intersectionality' and 'work-life balance' and bridging literatures seldom brought together, this volume uses an innovative mix of statistical techniques to untangle the messy nexus of factors - class, age, gender, race/ethnicity, intimate relations, political context and more - underpinning everyday routines, spaces, possessions, practices, (im)possibilities and self-perceptions in the US, Germany and Sweden. In the process it advances the specific vision of class and social relations developed by Pierre Bourdieu, pursuing the case, above all, that conceptual and methodological progress is necessary to fully recognise and explore the multiplicity of desires, dispositions and demands at play in people's lives. The volume will be of major interest to scholars of class, culture, gender and family but will appeal to anyone interested in the interplay of identities and pressures implicated in contemporary experiences and inequalities.
