Jesse, the Man who Outran Hitler Jesse Owens,Paul G. Neimark,1985-11-12 A remarkable self-portrait of the black man who carried this country to greatness in the 1936 Olympics. More than a retelling of the athletic triumphs and the personal tragedy of his life, Jesse is a remarkable spiritual pilgrimage.

Practices in Archaeological Stratigraphy Edward C. Harris,2014-06-28 Practices of Archaeological Stratigraphy brings together a number of examples which illustrate the development and use of the Harris Matrix in describing and interpreting archaeological sites. This matrix, the theory of which is described in two editions of the previous book by Harris, Principles of Archaeological Stratigraphy, made possible for the first time a simple diagrammatic representation of the stratigraphic sequence of a site, no matter how complex. The Harris Matrix, by showing in one diagram all three linear dimensions, plus time, represents a quantum leap over the older methods which relied on sample sections only. In this book 17 essays present a sample of new work demonstrating the strengths and uses of the Harris Matrix, the first ever published collection of papers devoted solely to stratigraphy in archaeology. The crucial relationships between the Harris methods, open-area excavation techniques, the interpretation of interfaces, and the use of single-context plans and recording sheets, is clarified by reference to specific sites. These sites range from medieval Europe, through Mayan civilizations to Colonial Williamsburg, Virginia. This book will be of great value to all those involved in excavating and recording archaeological sites and should help to ensure that the maximum amount of stratigraphic information can be gathered from future investigations. * Presents case studies which illuminate the Harris matrix method, invented by Edward C. Harris * Senior editor is the inventor of this method and principle in the field * Serves as a companion volume to Harris's Principles of Archaeological Stratigraphy

Principles of Archaeological Stratigraphy Edward C. Harris,2014-06-28 This book is the only text devoted entirely to archaeological stratigraphy, a subject of fundamental importance to most studies in archaeology. The first edition appeared in 1979 as a result of the invention, by the author, of the Harris Matrix--a method for analyzing and presenting the stratigraphic sequences of archaeological sites. The method is now widely used in archaeology all over the world. The opening chapters of this edition discuss the historical development of the ideas of archaeological stratigraphy. The central chapters examine the laws and basic concepts of the subject, and the last few chapters look at methods of recording stratification, constructing stratigraphic sequences, and the analysis of stratification and artifacts. The final chapter, which is followed by a glossary of stratigraphic terms, gives an outline of a modern system for recording stratification on archaeological sites. This book is written in a simple style suitable for the student or amateur. The radical ideas set out should also give the professional archaeologist food for thought. Key Features * Covers a basic principle of all archaeological excavations * Provides a data description and analysis tool for all such digs, which is now widely accepted and used. * Gives extra information

Analytical Archaeology David L. Clarke,2014-10-24 This study was well-established as a pioneer work on archaeological methodology, the theoretical basis of all archaeological analysis whatever the period or era. The first edition of the book presented and evaluated the radical changes in methodology which derived from developments in other disciplines, such as cybernetics, computer science and geography, during the 1950s and '60s. It argued that archaeology was a coherent discipline with its own methods and procedures and attempted to define the entities (attributes, artefacts, types, assemblages, cultures and culture groups) rigorously and consistently so that they could be applied to archaeological data. The later edition continued the same general theory, which is unparalleled in its scope and depth, adding notes to help understanding of the advances in method and theory to support the student and professional archaeologist. Review of the original publication: One might venture that this is the most important archaeological work for twenty or thirty years, and it will undoubtedly influence several future generations of archaeologists. The Times Literary Supplement

Archaeology as Human Ecology Karl W. Butzer,1982-05-31 Archaeology as Human Ecology is a new introduction to concepts and methods in archaeology. It deals not with artifacts, but with sites, settlements, and subsistence. It is essential reading for students, research workers, and all concerned with archaeological method and theory.

Archaeological geology George Jr Rapp,1985

Yeaverling Brian Hope-Taylor,2010-03 First published in 1977, this classic excavation report set new standards in reporting archaeological finds. It describes the excavation of an early medieval site near Wooler in Northumberland, identified as Ad Gefrin by the Venerable Bede.
