Interdisciplinary Research in Technology and Management Satyajit Chakrabarti, Rintu Nath, Pradipta Kumar Banerji, Sujit Datta, Sanghamitra Poddar, Malay Gangopadhyaya, 2021-09-14 The conference on 'Interdisciplinary Research in Technology and Management' was a bold experiment in deviating from the traditional approach of conferences which focus on a specific topic or theme. By attempting to bring diverse inter-related topics on a common platform, the conference has sought to answer a long felt need and give a fillip to interdisciplinary research not only within the technology domain but across domains in the management field as well. The spectrum of topics covered in the research papers is too wide to be singled out for specific mention but it is noteworthy that these papers addressed many important and relevant concerns of the day.

Surface and Interfacial Forces Hans-Jürgen Butt, Michael Kappl, 2018-03-26 A general introduction to surface and interfacial forces, perfectly combining theoretical concepts, experimental techniques and practical applications. In this completely updated edition all the chapters have been thoroughly revised and extended to cover new developments and approaches with around 15% new content. A large part of the book is devoted to surface forces between solid surfaces in liquid media, and while a basic knowledge of colloid and interface science is helpful, it is not essential since all important concepts are explained and the theoretical concepts can be understood with an intermediate knowledge of mathematics. A number of exercises with solutions and the end-of-chapter summaries of the most important equations, facts and phenomena serve as additional tools to strengthen the acquired knowledge and allow for self-study. The result is a readily accessible text that helps to foster an understanding of the intricacies of this highly relevant topic.

Building upon the recently published inaugural book *Maritime Informatics* by Springer, this book will address some of the most recent practical developments and experiences, particularly from a global perspective. The focus of the book is to address contemporary movements to tackle global concerns and to complement *Maritime Informatics*.

Cultural Views on Online Learning in Higher Education María Gabriela Di Gesú, María Fernanda González, 2021-03-01 This book opens up a fruitful conversation by and between invited academics from Europe and Latin America on the features of online learning in higher education. The authors analyse online education from interdisciplinary theoretical and empirical reflections to reveal the existing tensions and turning this book into a valuable artifact on how learning is shaped when technology comes in-between diverse geographical and social contexts. Like any other human activity, e-learning can be seen as a context-dependent educational system with many objects in mutual interaction. Applying a cultural psychology perspective to this provides new answers to questions such as: How can cultural psychology shed new light on online learning? Why do students and academics still opt for classic classes? What inner boundaries are pushed when studying online? How can online learning be influenced by affect? How

do teachers and students mold their identities when they move in and out of online environments? This book reveals the existing tensions, resistances and appropriation strategies that students and academics from diverse backgrounds and places go through when attending online learning courses in higher education and furthermore shows how these theoretical frameworks can be successfully applied to practice.

The Routledge Handbook of Consumer Behaviour in Hospitality and Tourism Saurabh Kumar Dixit, 2017-04-07 Consumer behaviour is one of the most explored topics in tourism and hospitality marketing, interchangeably denoted by the terms 'traveller behaviour', 'tourist behaviour' or 'guest behaviour'. Consumer behaviour acts as an origin for every tourism and hospitality marketing activity. It offers an understanding of why people tend to choose certain products or services and what sort of factors influence them in making their decision. The decision process of buying tourism products or services takes time, because they are mostly intangible in nature due to which there are many risks involved in their buying process. The Routledge Handbook of Consumer Behaviour in Hospitality and Tourism aims to explore and critically examine current debates, critical reflections of contemporary ideas, controversies and pertinent queries relating to the rapidly expanding discipline of consumer behaviour in hospitality and tourism. The Handbook offers a platform for dialogue across disciplinary and national boundaries and areas of study through its diverse coverage. It is divided into six parts: Part I offers an overview of consumer behaviour; Part II focuses on the service quality perspectives of consumer behaviour; Part III deliberates on customer satisfaction and consumer behaviour linkages; Part IV explores the re-patronage behaviour of consumers; Part V addresses the vital issues concerning online consumer behaviour; and Part VI elaborates upon other emerging paradigms of consumer behaviour. Although there is no dearth of empirical studies on different viewpoints of consumer behaviour, there is a scarcity of literature providing conceptual information. The present Handbook is organised to offer a comprehensive theoretical body of knowledge narrating consumer behaviour, especially for hospitality and tourism businesses and operations. It attempts to fill this research gap by offering a 'globalised' volume comprising chapters organised using both practical and academic approaches. This Handbook is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, International Business and Consumer Behaviour.

Resilient Structures and Infrastructure Ehsan Noroozinejad Farsangi,Izuru Takewaki,Tony Y. Yang,Abolhassan Astaneh-Asl,Paolo Gardoni,2019-05-03 This book discusses resilience in terms of structures' and infrastructures' responses to extreme loading conditions. These include static and dynamic loads such as those generated by blasts, terrorist attacks, seismic events, impact loadings, progressive collapse, floods and wind. In the last decade, the concept of resilience and resilient-based structures has increasingly gained in interest among engineers and scientists. Resilience describes a given structure's ability to withstand sudden shocks. In other words, it can be measured by the magnitude of shock that a system can tolerate. This book offers a valuable resource for the development of new engineering practices, codes and regulations, public policy, and investigation reports on resilience, and provides broad and integrated coverage of the effects of dynamic loadings, and of the modeling techniques used to compute the structural response to these loadings.

St. Kitts and Nevis International Monetary Fund. Western Hemisphere Dept.,2015-09-04 This 2015 Article IV Consultation highlights that the economic situation of St. Kitts and Nevis has continued to improve since the completion of the IMF-supported home-grown economic program in July 2014. Continued rapid inflows under the Citizenship-By Investment program have led to a surge in construction activity, and supported a large increase in government and Sugar Industry Diversification Fund investments and spending, including on the People Employment Program. These factors, together with the ongoing recovery in tourist arrivals fueled rapid GDP growth of about 6 percent in 2013 and 2014. The near-term outlook remains strong, but there are risks on the horizon.

Applications of Pattern-driven Methods in Corpus Linguistics Joanna Kopaczyk,Jukka Tyrkkö,2018-03-15 The use of corpora has conventionally been envisioned as being either corpus-based or corpus-driven. While the formal definition of the latter term has been widely accepted since it was established by Tognini-Bonelli (2001), it is often applied to studies that do not, in fact, fulfil the fundamental requirement of a theory-neutral starting point. This volume proposes the term pattern-driven as a more precise alternative. The chapters illustrate a variety of methods that fall under this broad methodology, such as the extraction of lexical bundles, POS-grams and semantic frames, and demonstrate how these approaches can uncover new understandings of both synchronic and diachronic linguistic phenomena.

Seafarers' Rights in China Pengfei Zhang,2016-09-15 This book critically investigates the conditions of seafarers' rights in China in legislation and in

practice, focusing in particular on the restructuring process following the 2006 Maritime Labour Convention. The Convention will enter into force in China in November 2016, bringing with it significant changes.

Brazilian Geography Rubén C. Lois González, Marco Antonio Mitidiero Junior, 2022-11-28 This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements. The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality. Against this backdrop, the geography of the country has developed by integrating, relating to, and forming part of those realities as it headed out into the streets. Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory. This book thus covers the theoretical approaches in Brazilian geography, its different lines of research, and above all its character as manifested in culture and society.

Colon Cancer Diagnosis and Therapy Naveen Kumar Vishvakarma, Ganji Purnachandra Nagaraju, Dhananjay Shukla, 2021-06-04 Colorectal cancer (CRC) is a major global health challenge as the third leading cause for cancer related mortalities worldwide. Despite advances in therapeutic strategies, the five-year survival rate for CRC patients has remained the same over time due to the fact that patients are often diagnosed in advanced metastatic stages. Drug resistance is another common reason for poor prognosis. Researchers are now developing advanced therapeutic strategies such as immunotherapy, targeted therapy, and combination nanotechnology for drug delivery. In addition, the identification of new biomarkers will potentiate early stage diagnosis. This book is the second of three volumes on recent developments in colorectal diagnosis and therapy. Each volume can be read on its own, or together. Each volume focuses on different novel therapeutic advances, biomarkers, and identifies therapeutic targets for treatment. Written by leading international experts in the field, coverage addresses the role of diet habits and lifestyle in reducing gastrointestinal disorders and incidence of CRC. Chapters discuss current and future diagnostic and therapeutic options for colorectal cancer patients, focusing on

immunotherapeutics, nanomedicine, biomarkers, and dietary factors for the effective management of colon cancer.
