Challenges and Opportunities in Health Care Management Sebastian Gurtner, Katja Soye, 2014-11-27 This contributed volume draws a vital picture of the health care sector, which, like no other is affected by technology push and stakeholder pull. Innovative product and service solutions emerge, which have to integrate different stakeholders' interests. This book studies current challenges in health care management from different perspectives. Research articles analyze the situation in the health care sector and present solutions in the following areas: the health care system; hospitals; teams in health care; patients' perspectives; assessment of technologies and innovations; and toolkits for organizing health care. All these contributions summarize pressing hot topics in the health care sector, analyze their future potential, and derive managerial implications. Outstanding best practices throughout Europe are presented in the case study section of the book. Consequently, the book closes the gap between science and practical application by addressing not only readers from academia but also practitioners working in the health care industry.

Posterior Fossa Tumors Anthony J. Raimondi, Maurice Choux, Concezio DiRocco, 2012-12-06 It is estimated that the functionally significant body of knowledge for a given medical specialty changes radically every 8 years. New specialties and sub-specialization are occurring at approximately an equal rate. Historically, established journals have not been able either to absorb this increase in publishable material or to extend their readership to the new specialists. International and national meetings, symposia and seminars, workshops, and newsletters successfully bring to the attention of physicians within developing specialties what is occurring, but generally only in demonstration form without providing historical perspective, pathoanatomical correlates, or extensive discussion. Page and time limitations oblige the authors to present only the essence of their material. Pediatric neurosurgery is an example of a specialty that has developed during the past 15 years. Over this period neurosurgeons have obtained special training in pediatric neurosurgery and then dedicated themselves primarily to its practice. Centers, Chairs, and educational programs have been established as groups of neuro in different countries throughout the world organized surgeons themselves respectively into national and international societies for pediatric neurosurgery. These events were both preceded and followed by specialized courses, national and international journals, and ever-increasing clinical and investigative studies into all aspects of surgically treatable diseases of the child's nervous system.

International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines. From the computer sciences, through engineering, and to social sciences, humanities and the arts, almost all of our disciplines have made contributions to internet research, whether in the effort to understand the effect of the internet on their area of study, or to investigate the social and political changes related to the internet, or to design and develop software and hardware for the network. The possibility and extent of contributions of internet research vary across disciplines, as do the purposes, methods, and outcomes. Even the epistemological underpinnings differ widely. The internet, then, does not have a discipline of study for itself: It is a field for research (Baym, 2005), an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other. There are, of course, some inhibitions that limit explorations in this field: research ethics, disciplinary conventions, local and national norms, customs, laws, borders, and so on. Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet. After nearly two decades of research and scholarship, the limits are a positive contribution, providing bases for discussion and interrogation of the contexts of our research, making internet research better for all. These 'limits,' challenges that constrain the theoretically limitless space for internet research, create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation.

International Corporate Governance Chris A. Mallin, 2006-01-01 This compilation serves a particularly useful purpose by presenting a full range of fascinating case studies. The editor thus enables each reader to assimilate the particulars in his own parlance, thus avoiding the almost insoluble problem of international corporate governance namely that each country uses the same words, but with utterly different meanings. Obviously, this problem has inhibited constructive conversation. After digesting these case studies, one is encouraged to derive certain generalized conclusions, among which are no matter what the terminology, the integrity of publicly traded securities depends on transparency and enforceable accountability of manager to owner. Robert Monks, Lens Governance Advisors, US This collection of thoroughly researched and well-written case studies of the governance of companies in nine countries demonstrates how far away we are from convergence in corporate governance systems. Differences in ownership structures, board composition, financial markets, accounting standards, takeover defences, legal systems, societal and corporate cultures, and even political involvement, are highlighted in this splendid collection. The book demonstrates the importance of the few core concepts that are emerging in the field, such as greater transparency, independence in non-executive directors, and the need for more effective governance. The consideration of case studies is presently the best way to understand the reality of corporate governance around the world. This book offers valuable insights to students, teachers and practitioners of the subject. R.I. (Bob) Tricker, Honorary Professor, University of Hong Kong and Founder Editor, Corporate Governance an international review Corporate governance has become a global phenomenon. This book highlights, through various case studies, how corporate governance has evolved in a number of countries around the world. The international cast of contributors, from varying professional backgrounds including academics, lawyers and company directors, focus on different regions around the globe, reflecting various ownership structures, legal systems, and political and cultural aspirations. Some of the case studies used include: Standard Life; Telecom Italia; and Eskom. Academics, directors and practitioners will find this book valuable for its insights into corporate governance developments in different legal environments and different business forms. It will also be immensely useful to postgraduate and undergraduate students for the up-to-date case studies on corporate governance, which will add depth and real world meaning to their studies.

Turkish Economic Policies and External Dependency Murat Çimen, Filiz Katman, 2014-09-26 Since the 1950s, the Turkish economy has periodically been facing crises. Decisions taken after crisis do not only have economic effects, but also social, political and diplomatic consequences. For the country, total independence was considered the main principle; economic independence was one of the substantial criteria of that principle, and economic policies were based on it. In this book, the economic independency level at which governments can take independent decisions is defined in terms of macroeconomic variables, on which the proposed model is based and developed. The book aims to analyse the economic policies of Turkey, from an economic dependency perspective; identify the macroeconomic variables affecting economic dependency; and develop an alternative economic policy, taking all of these points into consideration. Therefore, in order to structure the proposed model and to define policies, it is crucial to discuss economic policies, particularly in the post-1980 world; their consequences and impacts on Turkey; crises and the main variables under which they occurred; and to compare the economic policies of the Republic period and their consequences as well. The book intends to develop an independent economic structure so that Turkey can act in her own interests.

The Art of Islamic Banking and Finance Yahia Abdul-Rahman,2009-12-09 A detailed look at the fast-growing field of Islamic banking and finance The Art of Islamic Banking and Finance is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company, LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic bubbles. The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed analysis of the superior results realized by applying this new brand of banking to financing.

Entrepreneurship in Action Eric W. Liguori,Mark Tonelli,2021-01-29 This book offers an in-depth examination of six exemplar student-run ventures. These ventures, actual businesses that students enroll in as a course and run themselves, are changing the ways in which students learn by offering valuable hands-on experience. Many universities around the US have some form of student-run venture operating on campus, but how learning is reinforced and integrated into the classroom varies widely, as does the meaningfulness of the overall student experience. The struggle is most universities operate these ventures as one-offs, disconnected from formal academic instruction and as a side project that never gets full faculty or student attention.

Consumer Protection in Financial Services Southern Methodist University. Institute of International Banking and Finance,1999-05-06 The question of how financial services should be regulated in the interests of consumers has never been more topical. The structure of the financial services industry is changing rapidly and the need for the law to keep pace with these changes has never been greater. This book examines the role of the law in the protection of the consumer, in particular the ways in which the law is, and could be, used to protect consumers when purchasing financial services. A prominent panel of contributors first examines the role of the European Union and the ombudsmen schemes operating in the United Kingdom in improving consumer protection. Eight expert papers present a detailed analysis of aspects of the various legal mechanisms protecting consumers in the banking, financial services, investments and insurance industries. The final part of the book is concerned with the important and controversial area of consumer credit. This unique work is a welcome contribution to a rapidly developing area of law, which has so far received little attention from commentators. It will be of great interest to those at the cutting edge of banking, financial services and consumer law, whether practicing lawyers or in-house counsel, and all those involved in advising consumers.
