Handbook of Stemmatology Philipp Roelli,2020-09-07 Stemmatology studies aspects of textual criticism that use genealogical methods to analyse a set of copies of a text whose autograph has been lost. This handbook is the first to cover the entire field, encompassing both theoretical and practical aspects of traditional as well as modern digital methods and their history. As an art (ars), stemmatology's main goal is editing and thus presenting to the reader a historical text in the most satisfactory way. As a more abstract discipline (scientia), it is interested in the general principles of how texts change in the process of being copied. Thirty eight experts from all of the fields involved have joined forces to write this handbook, whose eight chapters cover material aspects of text traditions, the genesis and methods of traditional Lachmannian textual criticism and the objections raised against it, as well as modern digital methods used in the field. The two concluding chapters take a closer look at how this approach towards texts and textual criticism has developed in some disciplines of textual scholarship and compare methods used in other fields that deal with descent with modification. The handbook thus serves as an introduction to this interdisciplinary field.

Formatting for File Conversion and Publication Helen Wisniewski,2017-10-11 For some years we at Energion Publications have struggled with the process of converting manuscripts from the author's format to the final, production ready layout. There are an amazing arrays of software solutions to help clean up text, but there's nothing quite like having it done right in the first place. Many of the things in this booklet will be extremely familiar to those who regularly use word processing software, but writers often operate with the assumption that if it looks good on the screen, what you see is what you get. That lasts until the first format change. We commissioned this book to help writers use some basic, automatic formatting: Automatic footnotes, paragraph styles, and bibliographical formatting. We ask our authors to keep it simple. Choose a Style for your headings, use bold and italics, but above all, position nothing using the spacebar. If you use the information in this booklet, you'll have little difficulty, and we'll be able to efficiently format your book for publication. We do hope these simple steps will be useful for others as well. There are two sections, one for Micorosft Word and one for OpenOffice. The latter will generally be applicable to OpenOffice derivatives, such as LibreOffice.
