The works under examination were published during the period in which the forms and procedures of the novel were acclimatized as the genre established and consolidated itself in Brazil.

Genetics of Hypertension Xi Cheng,Bina Joe,2015-08-01 Hypertension, or elevated blood pressure, is a major risk factor for various cardiovascular, renal diseases, and stroke. The form of hypertension with no identifiable cause is referred to as Essential Hypertension. Familial studies indicate that Essential Hypertension is heritable and, thereby, classical genetic approaches have been applied on both human and other mammalian models of hypertension to map the locations of the allelic variants within quantitative trait loci for blood pressure. The post genome era has further elevated this area of research into large-scale genome-wide association studies of hypertension in humans. Collectively, these studies have resulted in the prioritization and cataloging of several genomic regions containing allelic variants as candidates linked or associated with essential hypertension. Further, they are providing evidence to suggest that the inheritance of hypertension is rather complex, encompassing multiple variants both within protein-coding and non-coding annotations, each of which may act independently or interactively with other genes and/or environmental factors to differentially regulate blood pressure. This book provides an overview of the various methods employed to study the genetics of hypertension and discuss the progress and prospects of this area of research that may contribute towards individualized clinical management of hypertension in the future.

Identification of specific tests is facilitated by the enclosed CD-ROM which allows for a quick and full text research. An appendix with guidelines and legal regulations for animal experiments in various countries will help to plan these experiments properly in accordance with the welfare of laboratory animals.

Here Comes Everybody Clay Shirky,2008-02-28 "A fascinating survey of the digital age . . . An eye-opening paean to possibility." —The Boston Globe "Mr. Shirky writes cleanly and convincingly about the intersection of technological innovation and social change." —New York Observer An extraordinary exploration of how technology can empower social and political organizers For the first time in history, the tools for cooperating on a global scale are not solely in the hands of governments or institutions. The spread of the internet and mobile phones are changing how people come together and get things done—and sparking a revolution that, as Clay Shirky shows, is changing what we do, how we do it, and even who we are. Here, we encounter a woman who loses her phone and recruits an army of volunteers to get it back from the person who stole it. A dissatisfied airline passenger who spawns a national movement by taking her case to the web. And a handful of kids in Belarus who create a political protest that the state is powerless to stop. Here Comes Everybody is a revelatory examination of how the wildfirelike spread of new forms of social interaction enabled by technology is changing the way humans form groups and exist within them. A revolution in social organization has commenced, and Clay Shirky is its brilliant chronicler.

The Hikayat Muhammad Hanafiyyah L. F. Brakel,2013-11-11 'If not now, when?' Hillel, Pirke Avot, I 14. The text edition which I hereby submit to the reader has been my constant companion for much of the last nine odd years. But the relative stability of my main preoccupation contrasted sharply with my wanderings during this same span of time. In fact, for most of it I was more or less constantly on the move, trekking from the Nether lands to Australia and back again, then to the United States, with three excursions; to Indonesia. On all these trips I carried my notes and kept working on this project, the conclusion of which continued to elude me. Even today I can hardly believe it is all over - and in fact it is not, as this volume will soon be followed by a companion containing a shortened English translation and dealing in much greater detail with the relationship between the Malay Hikayat Muhammad Hanafiyyah, its Persian source and Muslim literature in general. I sincerely regret that technical and financial considerations have combined to make inclusion of the apparatus criticus in this edition impossible. A limited number of copies of this apparatus are available on personal application either direct from the author (C/o the Indonesian Department, Monash University, Clayton, Victoria 3168, Australia), or from the Koninklijk Instituut voor Taal-, Land- en Volkenkunde, Stationsplein 10, Leiden, the Netherlands.

Aldosterone-Mineralocorticoid Receptor Brian Harvey,Frederic Jaisser,2019-09-25 This book is an open access dissemination of the EU COST Action ADMIRE in Aldosterone/Mineralocorticoid Receptor (MR) physiology and pathophysiology. Aldosterone is the major hormone regulating blood pressure. Alterations in blood levels of aldosterone and genetic mutations in the MR receptor are major causes of hypertension and comorbidities. Many of the drugs in clinical use, and in development for treating hypertension, target aldosterone and MR actions in the kidney and cardiovascular system. The ADMIRE book assembles review chapters from 16 European ADMIRE laboratories providing the latest insights into mechanisms of aldosterone synthesis/secretion, aldosterone/MR physiology and signaling, and the pathophysiological roles of aldosterone/MR activation.

Epithelial Transport Physiology George A. Gerencser,2010-03-10 Biological cell membranes regulate the transfer of matter and information between the intracellular and extracellular compartments as basic survival and maintenance functions for an organism. This volume contains a series of reviews that are concerned with how epithelial plasma membranes regulate the transport of solutes between the intracellular and extracellular compartments of a cell. This book is also an attempt to analyze the molecular basis for the movement of various solutes across an epithelial cell membrane. This volume is devoted to a diversity of epithelial transport mechanisms in representative cell membranes of a variety of living things. The first section of the book (Chapters 1-6) focuses on mechanisms of solute transport in epithelia of invertebrates. The last section which comprises ten chapters (Chapters 7-16) deals with solute transporters in epithelial cell membranes of vertebrates. It is hoped that with this particular ordering the reader can glean a telescopic view of the evolutionary history of the various epithelial solute transporters.

Religion and Social Marginalization in Zimbabwe Togarasei, Lovemore,Bishau, David,Chitando, Ezra,2020-07-13 Marginalization means being disregarded, ostracized, harassed, disliked, persecuted, or generally looked down upon. Marginalized people often include women and children, the poor, the disabled, sexual, religious, or ethnic minorities, refugees. The marginalized are those who are socially, politically, culturally, or economically excluded from main-stream society. In history, the Church in Zimbabwe has played a role in improving the lives of the marginalized, but what is religion, especially Christianity, doing for the marginalized now? Although religion is also implicated in marginalisation, the contributions in this volume did not address this angle as they focused on the role that religion can and should play to fight marginalization. The chapters come from two conferences (2012, 2014) that were held under the flag of ATISCA. The contributions have been updated to include later developments and publications--

Temporarily Yours Elizabeth Bernstein,2010-06-08 Generations of social thinkers have assumed that access to legitimate paid employment and a decline in the 'double standard' would eliminate the reasons behind women's participation in prostitution. Yet in both the developing world and in postindustrial cities of the West, sexual commerce has continued to flourish, diversifying along technological, spatial, and social lines. In this deeply engaging and theoretically provocative study, Elizabeth Bernstein examines the social features that undergird the expansion and diversification of commercialized sex, demonstrating the ways that postindustrial economic and cultural formations have spawned rapid and unforeseen changes in the forms, meanings, and spatial organization of sexual labor. Drawing upon dynamic and innovative research with sex workers, their clients, and state actors, Bernstein argues that in cities such as San Francisco, Stockholm, and Amsterdam, the nature of what is purchased in commercial sexual encounters is also new. Rather than the expedient exchange of cash for sexual relations, what sex workers are increasingly paid to offer their clients is an erotic experience premised upon the performance of authentic interpersonal connection. As such, contemporary sex markets are emblematic of a cultural moment in which the boundaries between intimacy and commerce—and between public life and private—have been radically redrawn. Not simply a compelling exploration of the changing landscape of sex-work, Temporarily Yours ultimately lays bare the intimate intersections of political economy, desire, and culture.
