Modernisation of e -Judiciary in India DR. K.V. SREENIVASAN, In modern computer era we have computerised everything including the medical profession but why we have not updated our Indian judiciary system alone so far into digital model? Even after the Supreme Court of India had set up a special committee and the committee had given its recommendations during the year 2005 itself and the government also spent during 2011-2015 Rs 640 crs for phase I and Rs 1078 crs for computerisation for creating infra for implementation of e-courting system out of total financial outlay of Rs 1630 crs, allocated money for this. But why it had not been fully implemented is the million dollar questions raised by the public?. Whether it is because of self-interest of the Judiciary or the advocates or court administration?, in spite of more than 3.20 crores are pending before all Indian Courts for decades together? Failure of our part to digitalisation of the court cases records and procedure so far the judicial industry is very much affected due to this corona lockdown period. It is a major setback for judiciary since the "justice delayed means justice denied" How long our judiciary will keep silent for not opening the courts due to corona like virus effect., God only knows the fact. Among the four pillars of our Constitution except Judiciary all the three viz.,Government, Administration and Press are being working for 24X7 , but judiciary is closed its office. In order to overcome this situation I bought up this book "E- Courting and Modernisation of e-judiciary in India "which includes the e- filing procedure before SC & HCs and District courts and SC guidelines regarding the implementation of the e- courting system etc for the benefit of Legal fraternity to switch over immediately in to digital courting and to reduce the pending cases and provide quick justice to our

needy poor in time and render them quick justice. Jai Hind.

Beginning SharePoint 2007 Amanda Murphy,Shane Perran,2011-08-08 Microsoft Office SharePoint Server 2007 has improved and changed dramatically over previous versions of the product. The capabilities of the platform have expanded greatly with the inclusion of an automated workflow engine, web content management capabilities, and a vast number of document management enhancements. However, the value of this tool to an enterprise will depend primarily on the ability of individuals in the organization to understand the features and capabilities of the platform and effectively map those to specific business requirements. This book is designed to mentor and coach business and technical leaders in an organization on the use of SharePoint to address critical information management problems. It gives detailed descriptions and illustrations of the product's functionality and also includes realistic usage scenarios to provide contextual relevance and a personalized learning experience to the reader. The mission of this book is to provide extensive knowledge to information workers and site managers that will empower them to become SharePoint Application champions in the organization. This book should be the premiere handbook of any active or aspiring SharePoint expert. To complete the exercises in this book, you should have a basic comfort level using Microsoft Office application to create content and a general understanding of how to interact with a web site through the browser. This book is intended as a starting point for any SharePoint 2007 user whether that user has never used SharePoint before or has some familiarity with a previous version and just wants to understand the differences with the new release.

Fall Prevention Through Design in Construction Imriyas Kamardeen,2015-06-05 The role of designers has traditionally been to design a building so that it conforms to accepted local building codes. The safety of workers is left up to the contractor building the designs. Research shows, however, that designers can have an especially strong influence on construction safety during the concept, preliminary and detailed design phases. This book establishes the new knowledge and conceptual frameworks necessary to develop a mobile computing-enabled knowledge management system that can help reduce the high rate of construction falls. There are three main objectives of this book: 1. To create a new Prevention through Design (PtD) knowledge base to model the relationships between fall risks and design decisions; 2. To develop a PtD mobile App to assist building designers in fall prevention through design; 3. To evaluate the practical implications of the PtD mobile App for the construction industry, especially for building designers and workers. The cutting edge technologies explored in this book have the potential to significantly reduce the rate of serious injuries that occur in the global construction industry. This is essential reading for researchers and advanced students of construction management with an interest in safety or mobile technologies.
