When your dog becomes excited, do you know whether he's expressing joy or anxiety? This book shows how to pick up on the signals and messages he sends out to you and others. You'll also learn how understanding your dog's behavior will help you bond more closely with him. It contains clear, annotated photos that show the signals that dogs convey in both normal and special situations. The Dog Decoder helps you interpret the different messages your dog sends out, and in no time, you and your pooch will be speaking the same language.

This book is your guide to understanding your pooch, communicating effectively, strengthening your bond, and helping dogs learn in the most effective way possible so they feel confident navigating the human world with success. Along the way, you’ll learn the answers to questions such as: • What do different tail wags mean? • What does being right-pawed say about my dog’s personality? • How can I tell the difference between boredom barking and warning barking? • What does it mean when my dog spins around, arches his back, or gives me the whale eye? • Do dogs feel guilt? • How do dogs perceive human faces? • Why do some scientists think dogs’ emotional experience is even greater than ours? Filled with adorable full-color photographs and instructive illustrations, this insightful “dog decoder” will soon make you dog’s best friend.

How Dogs Love Us Gregory Berns,2014-01-02 Emory University neuroscientist Gregory Berns had spent decades using imaging technology to study how the human brain works. That changed when he and his family adopted Callie, a shy, skinny terrier mix, who inspired Berns to tackle the question: ‘What is my dog thinking?’ Berns learned that military working dogs operate calmly in the most challenging environments, leading to a radical notion: Would it be possible to train dogs to hold completely still in an MRI scanner? If so, it might be possible to see how the canine brain actually works. Berns’s colleagues dismissed the idea; everyone knew that dogs needed to be restrained or sedated for MRI scans. Berns refused to do either — instead, he painstakingly trained the dogs to sit still, even though it meant overcoming many administrative, technical, legal, and behavioural hurdles. The initial findings offer tantalising evidence on how dogs empathise with human emotions, how they love us, and why being the ‘pack leader’ with your dogs, as some experts suggest, is a mistake.

Integrate your Elm applications with JavaScript so you can update legacy applications or take advantage of JavaScript resources. Elm also provides built-in tooling to alleviate the tooling creep that's so common in JavaScript. This book covers Elm's deployment and testing tools that ease development confusion. Dive into advanced concepts including creating single-page applications, and creating performance improvements. Elm expert Jeremy Fairbank brings his years of web development experience to teaching how to use Elm for front-end development. Your web UIs will be faster, safer, and easier to develop with Elm and this tutorial. **How Dogs Love Us** Gregory Berns,2022-03-08 A Wall Street Journal bestseller. The powerful bond between humans and dogs is one that's uniquely cherished. Loyal, obedient, and affectionate, they are truly man's best friend. But do dogs love us the way we love them? Emory University neuroscientist Gregory Berns had spent decades using MRI imaging technology to study how the human brain works, but a different question still nagged at him: What is my dog thinking? After his family adopted Callie, a shy, skinny terrier mix, Berns decided that there was only one way to answer that question--use an MRI machine to scan the dog's brain. His colleagues dismissed the idea. Everyone knew that dogs needed to be restrained or sedated for MRI scans. But if the military could train dogs to operate calmly in some of the most challenging environments, surely there must be a way to train dogs to sit in an MRI scanner. With this radical conviction, Berns and his dog would embark on a remarkable journey and be the first to glimpse the inner workings of the canine brain. Painstakingly, the two worked together to overcome the many technical, legal, and behavioral hurdles. Berns's research offers surprising results on how dogs empathize with human emotions, how they love us, and why dogs and humans share one of the most remarkable friendships in the animal kingdom. How Dogs Love Us answers the age-old question of dog lovers everywhere and offers profound new evidence that dogs should be treated as we would treat our best human friends: with love, respect, and appreciation for their social and emotional intelligence.

**Canine Confidential** Marc Bekoff,2018-04-13 Get to know your best friend better: "Everyone who owns a dog, breeds or trains dogs, or works with dogs should read this informative book." —Library Journal Just think about the different behaviors you see at a dog park. We have a good understanding of what it means when dogs wag their tails—but what about when they sniff and roll on a stinky spot? Why do they play tug-of-war with one dog, while showing their bellies to another? Why are some dogs shy, while others are bold? What goes on in dogs' heads and hearts—and how much can we know and understand? Written by award-winning scientist—and lifelong dog lover—Marc Bekoff, Canine Confidential not only brilliantly opens up the world of dog behavior, but also helps us understand how we can make our dogs' lives better. Rooted in the most up-to-date science on cognition and emotion—fields that have exploded in recent years—Canine Confidential is a wonderfully accessible treasure trove of new information and myth-busting. Peeing, we learn, isn't always marking; grass-eating isn't always an attempt to trigger vomiting; it's okay to hug a dog—on their terms; and so much more. There's still much we don't know, but at the core of the book is the certainty that dogs do have deep emotional lives, and that as their companions and trainers we must recognize them as the unique, complex individuals they are—so we can keep them as happy and healthy as possible. "Bekoff shares his own studies and others' research, along with real-life stories, in a winning tone." —Booklist

*Overcoming Your Child's Fear of Dogs* Stefani M. Cohen,Cathy Malkin,2020-05-05 5.0 out of 5 stars A must read for anyone who wants to help a child overcome their fear of dogs. - Amazon Customer 5.0 out of 5 stars Amazing step by step guide! T. \_\_\_\_\_ Based on decades of experience as a therapist, parenting coach and mother of a child who was afraid of dogs, I developed the Overcoming Fear of Dogs (OFOD) protocol. This is a step-by-step guide for parents (therapists will find it helpful as well) based on exposure therapy using a live dog. ♦ This book provides an easy to understand tool for parents to help their child overcome the fear of dogs. By using exposure therapy and my specifically designed exercises, parents will gradually increase their child's exposure to a real dog and thereby decrease their child's fear and resistance. This book helps parents understand how and why their child is afraid of dogs and most importantly how to help their child face the fear and overcome it. ♦ When a child has a strong fear of dogs it is important to address this fear as soon as possible. There is much to gain when children are able to overcome their fears. They develop self-confidence and self-esteem and feel empowered. Children who face their fears learn coping skills and self-control, two of the biggest predictors of success later in life. In addition, they learn to speak up and ask for help. ♦ By using the method in this book children will become more aware of their feelings and learn to express them clearly. • Mindfulness and relaxation exercises are included in the book to help this develop. • Anxiety and fear create the feeling of being out of control. ♦ My method helps kids feel in control and take back the leash when interacting with dogs. Most children do not outgrow this fear and they need to have supervised brief and positive experiences with dogs in order to feel safe and in control when interacting with them. Dogs are everywhere these days and it is impossible to avoid them. Kids who are afraid of dogs suffer socially and emotionally. They avoid sleepovers and play dates where a dog is in residence. They often refuse to go to a park in case they might encounter a dog. Some children will even endanger themselves by running into the street to avoid a dog. Children are afraid of things they don't understand and this book provides education for parents and children about dogs. The book includes information on how dogs communicate as well as how to read dogs and know when it is safe to interact with them and when it is best to stay away. ♦ My ultimate goal is to enable children to feel comfortable around dogs so their lives aren't disrupted by the fear of them. While the book is designed for parents of children aged 5-12 my method can be used with older children and adults.
