## Dog Food Logic Linda P. Case, M.S., 2014-02-12 **Choosing the right dog food in a world with too many choices**

Walking down the dog food aisle in a pet supply superstore can present you with an overwhelming number of choices. Reading about dog food on the internet can make your head spin with so many opinions and stories. And judging the content that you find on dog food packaging can be confusing and misleading. How can the average dog owner make an informed choice in accordance with her dog's age, size and condition? In her latest book, author Linda Case describes how to make logical, evidence-based decisions for what to feed your dog amid all the options available.

### **You will learn**

- How pet food marketers appeal to your emotions to persuade you to buy a particular type of dog food.
- To distinguish between scientific, evidence-based information and the anecdotal evidence which is so pervasive—and often misleading—in the dog food arena.
- Is there a scientific basis for dog foods designed specifically for puppies, senior dogs, canine athletes—even various breeds of dogs?
- How to read and evaluate all of the material included on a typical package of dog food from the ingredients and label claims (“Natural,” “Anti-Oxidant,” “Low Fat”), to the Nutrient Analysis and Nutritional Adequacy statements.
- How to avoid choice paralysis and the cognitive traps that can interfere with clear decision making.

### **What experts are saying about *Dog Food Logic***

Pet food is like a religion for many—but now those strong emotional ties can be backed up with fact. Linda Case separates fact from fiction, explains the complex terms and offers a guide to pet nutrition in simple to comprehend language. Unlike other books on this topic, there is no agenda here—except to present facts and then allow pet owners to make their own logical conclusions, letting the kibble drop where it may.

**Steve Dale**, CABC, columnist Tribune Content Agency; radio host Black Dog Radio Productions and WGN Radio (Chicago); contributing editor USA Weekend; special correspondent Cat Fancy; author Good Cat!

*Dog Food Logic* is the indispensable guide to the science behind canine nutrition that will help us to make wise, well-informed choices about how and what we feed our dogs. It takes the fear out of trying to understand proper nutrition and will empower us to determine what is best for the health of our dogs.

**Claudia Kawczynska**, Founder and Editor-in-chief of The Bark

Don't read this book if you want someone to tell you what to feed your dog. This is a book for people who want to learn, in a reasoned and thoughtful way, how to figure it out for themselves. *Dog Food Logic* goes way beyond the usual textbook list of nutritional requirements to cover the pet food industry in all its glory: the history, the business, the marketing, and best of all, the science. Case deftly navigates the most controversial topics in pet food and presents the big picture without interjecting judgment about what approach is best. There's something here for everyone: pet care professionals and dog lovers alike will learn something new from this informative, easy to read, and well researched book.

*The Koehler Method of Dog Training* William R. Koehler, 2016-04-09 For generations, The Koehler Method of Dog Training has been a beacon of wisdom for dog owners seeking effective techniques to build a strong bond with their furry companions. William Koehler's approach, rooted in respect for dogs' intelligence, remains as relevant today as it was when the book first graced the shelves. Koehler believed that dogs could make choices and be held accountable for their behavior. His method follows the pattern of Action → Memory → Desire: dogs act, remember the outcomes, and form desires based on those experiences. Correcting behavior becomes fair, reasonable, and expected once the training has been successfully imparted. In this classic guide, you'll find practical guidance for creating a well-behaved and happy canine companion. From basic obedience to advanced skills, The Koehler Method covers it all. Whether you're a seasoned dog owner or a first-time puppy parent, discover the joy of training your dog using a method that respects their intelligence and fosters a lifelong partnership.

*Better Dog Behaviour* Debbie Connolly, 2011-03-03 Many dog owners in the UK don't understand the dynamics of human/dog relationships and consequently experience problems with their pets, such as barking, aggression, chasing livestock, chewing, pulling and running away. Experienced dog trainer Debbie Connolly shows new and experienced dog owners alike how to deal with such behaviour problems, so that the dog can become a safe and happy member of their family. Debbie recounts real-life anecdotes to get across the serious point that you are playing with your dog's life, if you can't or won't learn to treat your dog appropriately. Some of the stories she tells are funny, some are sad, but all of them are easy for her readers to identify with and relate to. She explains how to get a dog from the right source and how to live with it afterwards. She gives practical advice on how to solve all the common problems dog owners face. And she isn't afraid to raise important issues that others avoid - issues that dog owners actually face in the real world, for example, when you should give up and put your dog to sleep.

**Absolutely Positively Gundog Training** Robert Milner, 2015 Traditional gundog training is based on compulsion and rooted in a picture of the dog's nature as similar to a wolf with much emphasis on dominance and sub ordinance. Milner turns that theory upside down citing research which finds that wolf packs operate in cooperative family groups with minimal factors of dominance. Dogs, Milner believes, learn much faster with a cooperative training model. Milner has chucked

compulsion and embraced reward as the primary training tool. He gives the reader a simple, reasonable easy-to-perform training model. His extensive practical experience leads him to condense gundog training down to a few critical behaviors. Milner gives the reader clear concise instructions producing those behaviors to develop an excellent gundog who excels also as a family dog. This is a book on how to manage the strong instincts of retrievers and influence them to work for you and with you to produce a valuable companion that enhances your outdoors experience, be it hunting ducks, or fishing for trout, or hiking in the back country.--Page [4] cover.

The New York Times A moving story of love, friendship, grief, healing, and the magical bond between a woman and her dog. When a woman unexpectedly loses her lifelong best friend and mentor, she finds herself burdened with the unwanted dog he has left behind. Her own battle against grief is intensified by the mute suffering of the dog, a huge Great Dane traumatized by the

inexplicable disappearance of its master, and by the threat of eviction: dogs are prohibited in her apartment building. While others worry that grief has made her a victim of magical thinking, the woman refuses to be separated from the dog except for brief periods of time. Isolated from the rest of the world, increasingly obsessed with the dog's care, determined to read its mind and fathom its heart, she comes dangerously close to unraveling.
