**Billy Peal and Josie West** Dale McMillan,2020-06-25 Born eight days apart, Billy Peal and Josie West were first cousins but a great deal more like siblings. Billy's mother Mary, whom all the West boys called Baby Sister, was younger sister to Josie's father, one of a set of twin boys. After the death of his father in the Vietnam War, Billy was taken under the wings of his mother's three brothers and his maternal grandparents who all lived together on the family ranch. Josie and Billy referred to themselves as twins with different parents. The actual twins, Tim and Jim West, were rodeo enthusiasts, the first a steer wrestler and the latter a calf roper. Billy and Josie shared their enthusiasm and Billy participated in bronco riding, steer wrestling and calf roping while Josie became a serious barrel racer. Still, Billy was always a gentleman. Josie, however, could outride, outshoot, and outcuss any of the boys around her and gave her dad a run for his money as well. This was a constant source of contention between her parents, roughshod rodeo rider Tim and Jim the epitome of a perfect lady. A complication in Billy's life was his parents' history. William Peal and Mary West had married in secret. William was in the Corps of Cadets at Texas A&M College and not supposed to be married, Soon, though, Mary was pregnant and the relationship was hard to hide. William's conniving stepmother, Alice Peal, saw an opportunity and launched a smear campaign to discredit the couple, casting doubt and shame upon their secret marriage, and trying to convince Billy's paternal grandfather, bank president and mayor of the small town of Westerly, Texas, to cut Billy out of any inheritance. Life gets pretty interesting with Alice Peal at the head of anything and everything in Westerley.

**Dogs That Know When Their Owners Are Coming Home** Rupert Sheldrake,2011-04-26 With a scientist's mind and an animal lover's compassion, world-renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals--and ourselves. How do cats know when it's time to go to the vet, even before the cat carrier comes out? How do dogs know when their owners are returning home at unexpected times? How can horses find their way back to the stable over completely unfamiliar terrain? After five years of extensive research involving thousands of people who have pets and work with animals, Dr. Sheldrake proves conclusively what many pet owners already know: there is a strong connection between humans and animals that defies present-day scientific understanding. Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other, to their owners, and to their homes in powerful ways. His provocative ideas about these social, or morphic, fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild, such as migration and homing. *Dogs That Know When Their Owners Are Coming Home* not only provides fascinating insight into animal, and human, behavior, but also teaches us to question the boundaries of conventional scientific thought, and shows that the very animals who are closest to us have much to teach us about biology, nature, and consciousness.

**The Internet of Animals** Deborah Lupton,2023-03-07 'The internet is made of cats' is a half-jokingly made claim. Today, animals of all shapes and sizes inhabit our digital spaces, including companion animals, wildlife, feral animals and livestock. In this book, Deborah Lupton explores how digital technologies and datafication are changing our relationships with other animals. Playfully building on the concept of 'The Internet of Things', she discusses the complex feelings that have developed between people and animals through the use of digital devices, from social media to employing animal-like robots as companions and carers. The book brings together a range of perspectives, including those of sociology, cultural geography, environmental humanities, critical animal studies and internet studies, to consider how these new digital technologies are contributing to major changes in human-animal relationships at both the micropolitical and macropolitical levels. As Lupton shows, while digital devices and media have strengthened people's relationships to other creatures, these technologies can also objectify animals as things for human entertainment, therapy or economic exploitation. This original and engaging book will be of interest to scholars and students across the social sciences and humanities.
