An Introduction to Reservoir Simulation Using MATLAB/GNU Octave Knut-Andreas Lie, 2019-08-08 Presents numerical methods for reservoir simulation, with efficient implementation and examples using widely-used online open-source code, for researchers, professionals and advanced students. This title is also available as Open Access on Cambridge Core.

The Israel Lobby and U.S. Foreign Policy John J. Mearsheimer, Stephen M. Walt, 2007-09-04 The Israel Lobby, by John J. Mearsheimer of the University of Chicago and Stephen M. Walt of Harvard's John F. Kennedy School of Government, was one of the most controversial articles in recent memory. Originally published in the London Review of Books in March 2006, it provoked both howls of outrage and cheers of gratitude for challenging what had been a taboo issue in America: the impact of the Israel lobby on U.S. foreign policy. Now in a work of major importance, Mearsheimer and Walt deepen and expand their argument and confront recent developments in Lebanon and Iran. They describe the remarkable level of material and diplomatic support that the United States provides to Israel and argues that this support cannot be fully explained on either strategic or moral grounds. This exceptional relationship is due largely to the political influence of a loose coalition of individuals and organizations that actively work to shape U.S. foreign policy in a pro-Israel direction. Mearsheimer and Walt provocatively contend that the lobby has a far-reaching impact on America's posture throughout the Middle East—in Iraq, Iran, Lebanon, and toward the Israeli-Palestinian conflict—and the policies it has encouraged are in neither America's national interest nor Israel's long-term interest. The lobby's influence also affects America's relationship with important allies and increases dangers that all states face from global jihadist terror. Writing in The New York Review of Books, Michael Massing declared, Not since Foreign Affairs magazine published Samuel Huntington's 'The Clash of Civilizations?' in 1993 has an academic essay detonated with such force. The publication of The Israel Lobby and U.S. Foreign Policy is certain to widen the debate and to be one of the most talked-about books in foreign policy.

Faecal Sludge Management Linda Strande, Damir Brdjanovic, 2014-08-15 It is estimated that literally billions of residents in urban and peri-urban areas of Africa, Asia, and Latin America are served by onsite sanitation systems (e.g. various types of latrines and septic tanks). Until recently, the management of faecal sludge from these onsite systems has been grossly neglected, partially as a result of them being considered temporary solutions until sewer-based systems could be implemented. However, the perception of onsite or decentralized sanitation technologies for urban areas is gradually changing, and is increasingly being considered as long-term, sustainable options in urban areas, especially in low- and middle-income countries that lack sewer infrastructures. This is the first book dedicated to faecal sludge management. It compiles the current state of knowledge of the rapidly evolving field of faecal sludge management, and presents an integrated approach that includes technology, management, and planning based on Sandecs 20 years of experience in the field. Faecal Sludge Management: Systems Approach for Implementation and Operation addresses the organization of the entire faecal sludge management service chain, from the collection and transport of sludge, and the current state of knowledge of treatment options, to the final end use or disposal of treated sludge. The book also presents important factors to consider when evaluating and upscaling new treatment technology options. The book is designed for undergraduate and graduate students, and engineers and practitioners in the field who have some basic knowledge of environmental and/or wastewater engineering.

The "German Spirit" in the Ottoman and Turkish Army, 1908–1938 Gerhard Grüßhaber, 2018-04-09 The study focuses on the mutual transfer of military knowledge between the German and the Ottoman/ Turkish army between the 1908 Young Turk revolution and the death of Atatürk in 1938. Whereas the Ottoman and later the Turkish army were the main beneficiaries of this selective appropriation, the German armed forces evaluated their (prospective) ally's military experiences to a lesser extent. Through the analysis of archival and published sources and memoir literature the study provides evidence for the impact of this exchange on the armies of both countries and on the Turkish civil society. Indeed, the officer corps in both countries was a small but influential group of the society for the further development of their nations.

Digitalization and Society Bünyamin Ayhan, 2017 The book presents a collection of papers by researchers from several different institutions on a wide range of digital issues: digitalization and literacy, game, law, culture, politics, health, economy, civil society, photograph. The book addresses researchers, educators, sociologists, lawyers, health care providers.

Designing Sociable Robots Cynthia Breazeal, 2004-08-20 Cynthia Breazeal here presents her vision of the sociable robot of the future, a synthetic creature and not merely a sophisticated tool. A sociable robot will be able to understand us, to communicate and interact with us, to learn from us and grow with us. It will be socially intelligent in a humanlike way. Eventually sociable robots will assist us in our daily lives, as collaborators and companions. Because the most successful sociable robots will share our social characteristics, the effort to make sociable robots is also a means for exploring human social intelligence and even what it means to be human. Breazeal defines the key components of social intelligence for these machines and offers a framework and set of design issues for their realization. Much of the book focuses on a nascent sociable robot she designed named Kismet. Breazeal offers a concrete implementation for Kismet, incorporating insights from the scientific study of animals and people, as well as from artistic disciplines such as classical animation. This blending of science, engineering, and art creates a lifelike quality that encourages people to treat Kismet as a social creature rather than just a machine. The book includes a CD-ROM that shows Kismet in action.

Second Report of the Expert Panel on Detection, Evaluation, and Treatment of High Blood Cholesterol in Adults (adult Treatment Panel II). National Cholesterol Education Program (U.S.). Expert Panel on Detection, Evaluation, and Treatment of High Blood Cholesterol in Adults, 1993 The panel examined the available evidence on coronary heart disease and high blood cholesterol and updated, where appropriate, the existing recommendations for management of high blood cholesterol in adults. Provides new recommendations for: patients with established coronary heart disease and others at high risk for coronary heart disease; HDL-cholesterol in coronary heart disease risk assessment; cholesterol lowering in women, the elderly, and young adults; physical activity and weight loss as components of dietary therapy; and delay of drug treatment in most young men and premenopausal women who are otherwise at low risk for coronary heart disease. Discusses cholesterol lowering and total mortality, and cost-effectiveness of cholesterol lowering.

Lichen Secondary Metabolites Branislav Ranković, 2019-07-26 This revised and extended edition provides in-depth insights into the benefits and untapped potential of lichen-derived bioactive compounds. The whole spectrum of these compounds' biological and medical functions, from antibiotic to antiviral and anti-carcinogenic properties, is presented. In addition, a new chapter discusses the anti-neurodegenerative and anti-diabetic activities of lichenic secondary metabolites. Given its scope, the book offers a valuable asset for students and researchers in this field.

Cell Engineering and Regeneration Heinz Redl, 2017-02-16 This reference work presents the origins of cells for tissue engineering and regeneration, including primary cells, tissue-specific stem cells, pluripotent stem cells and trans-differentiated or reprogrammed cells. There is particular emphasis on current understanding of tissue regeneration based on embryology and evolution studies, including mechanisms of amphibian regeneration. The book covers the use of autologous versus allogeneic cell sources, as well as various procedures used for cell isolation and cell pre-conditioning, such as cell sorting, biochemical and biophysical pre-conditioning, transfection and aggregation. It also presents cell modulation using growth factors, molecular factors, epigenetic approaches, changes in biophysical environment, cellular co-culture and other elements of the cellular microenvironment. The

pathways of cell delivery are discussed with respect to specific clinical situations, including delivery of ex vivo manipulated cells via local and systemic routes, as well as activation and migration of endogenous reservoirs of reparative cells. The volume concludes with an in-depth discussion of the tracking of cells in vivo and their various regenerative activities inside the body, including differentiation, new tissue formation and actions on other cells by direct cell-to-cell communication and by secretion of biomolecules.

Information and Communication Technologies in Tourism 2021 Wolfgang Wörndl, Chulmo Koo, Jason L. Stienmetz, 2021-01-11 This open access book is the proceedings of the International Federation for IT and Travel & Tourism (IFITT)’s 28th Annual International eTourism Conference, which assembles the latest research presented at the ENTER21@yourplace virtual conference January 19-22, 2021. This book advances the current knowledge base of information and communication technologies and tourism in the areas of social media and sharing economy, technology including AI-driven technologies, research related to destination management and innovations, COVID-19 repercussions, and others. Readers will find a wealth of state-of-the-art insights, ideas, and case studies on how information and communication technologies can be applied in travel and tourism as we encounter new opportunities and challenges in an unpredictable world.

Angel of Death G. Williams, 2010-05-17 The story of the rise and fall of smallpox, one of the most savage killers in the history of mankind, and the only disease ever to be successfully exterminated (30 years ago next year) by a public health campaign.

Innovation in Hospitality Education Jeroen A. Oskam, Daphne M. Dekker, Karoline Wiegerink, 2017-09-06 This book analyses the development of hospitality education from vocational to higher education, and discusses the positioning of hotel schools. It addresses questions such as: Should hospitality management become part of generic business education? Are the technical training programmes that have defined the identity of these schools a remnant of their vocational past, or have they contributed to the successful careers of many hospitality graduates? Topics discussed in the book are curriculum innovation, the theory of experimentation, the nature of hospitable behaviour, information technology, life-long learning and developments for future curricula. The book makes clear that the debate on the balance between theory and practice will not only define the future of hospitality management education, but can also be considered a relevant case study in other business disciplines. The history of hospitality education goes back to the end of the nineteenth and early twentieth century when hotel schools were founded to train the protocol and technical skills required to receive the travellers of those days. Since then, the scale and complexity of the hospitality industry and its professions have changed, as well as our understanding of what makes a business –whether it offers accommodation or something else– “hospitable”. The scope and educational level of hotel schools have evolved accordingly, and hospitality management has become a popular discipline in the traditional and renowned hotel schools as well as in universities.

Current Debates in International Relations & Law Övgü Kalkan Küçüksolak, In this collection of CUDES 2017, wide spectrum of topics that occupy primary place in the current debates of International Relations and Law were addressed by the papers presented at the Current Debates in Social Sciences Conference which was held in Istanbul, on December 14-16, 2017. The purpose of this conference was to provide a forum for scholars, researchers and students to foster discussion and expand understanding on the current themes of Social Sciences. In parallel to changing and multiplying dynamics of world politics, papers reflect diversity of issues in International Relations and Law including: the impacts of the Syrian Refugee Crisis on EU-Turkey relations, lone wolf terrorism, energy security, Russia’s domestic factors in its foreign policy, foreign policy of Iran and Russia in the Middle East, Mirziyoyev’s first year in presidency, Turkish foreign aid under the Justice and Development Party, the place of civil aviation in Turkish foreign policy as a soft power instrument, the Kosovo intervention in the context of UN’s human security discourse, UN and gender issues, mediation in international law and Turkey, the development of good corporate governance in Turkey, Ombudsman institution in Turkey, the status of surviving spouse in terms of law of succession and the regime of participation in acquired property in Turkey, legitimacy of censorship in the West from the perspective of human rights, intellectual property protection for plant innovation, legal framework of ‘autonomy in modern liberal eugenics’, the impact of the new technologies on the law.

Smart Technologies for Energy, Environment and Sustainable Development Mohan Lal Kolhe, Pawan Kumar Labhasetwar, H. M. Suryawanshi, 2019-07-02 This book comprises select proceedings of the International Conference on Smart Technologies for Energy, Environment, and Sustainable Development (ICSTEESD 2018). The chapters are broadly divided into three focus areas, viz. energy, environment, and sustainable development, and discusses the relevance and applications of smart technologies in these fields. A wide variety of topics such as renewable energy, energy conservation and management, energy policy and planning, environmental management, marine environment, green building, smart cities, smart transportation are covered in this book. Researchers and professionals from varied engineering backgrounds contribute chapters with an aim to provide economically viable solutions to sustainable development challenges. The book will prove useful for academics, professionals, and policy makers interested in sustainable development.

Membrane Bioreactors for Wastewater Treatment Thomas Stephenson, K. Brindle, Simon Judd, Bruce Jefferson, 2000-05-31 The book covers the subject of membrane bioreactors (MBR) for wastewater treatment, dealing with municipal as well as industrial wastewaters. The book details the 3 types of MBR available and discusses the science behind the technology, their design features, operation, applications, advantages, limitations, performance, current research activities and cost. As the demand for wastewater treatment, recycling and re-use technologies increases, it is envisaged that the membrane separation bioreactor will corner the market. Extremophiles in Eurasian Ecosystems: Ecology, Diversity, and Applications Dilfuza Egamberdieva, Nils-Kåre Birkeland, Hovik Panosyan, Wen-Jun Li, 2018-07-26 This book explores various aspects of thermophilic and halophilic microbes from Eurasian ecosystems, which have proved to offer a unique reservoir of genetic diversity and biological source of extremophiles. It also covers the biotechnological uses of extremophiles, and their potential use in agricultural and industrial applications. The topics addressed include but are not limited to: diversity and microbial ecology, microbe-environment interactions, adaptation and evolution, element cycling and biotechnological applications of thermophiles and halophiles in Eurasian ecosystems. In order to review the progress made in biology and biotechnological applications of thermophiles and halophiles, the book combines review papers and results of original research from various specialists and authorities in the field. It includes several chapters describing the microbial diversity and ecology of geothermal springs distributed among the territory of various Eurasian countries, such as Armenia, Bulgaria, China, Georgia, India, Italy, Pakistan and Turkey. A dedicated chapter discusses selected aspects of thermophilic chemolithotrophic bacteria isolated from mining sites (sulfide ores); detailed descriptions of various thermophile microbes isolated from high-temperature environments and their biotechnological potential are also provided. Subsequent chapters describe the diversity and ecology of halophilic microbes harbored in saline and hypersaline lakes in Iran, Turkey and China; soil and plant microbiomes in saline arid lands of Uzbekistan; microbial diversity in Asian deserts; and the potential applications of thermophilic and halophilic microbes as exopolysaccharide (EPS) producers, focusing on the chemistry and applications of the EPS they produce. We hope that this book will prove valuable as an up-to-date overview of the current state of research on Eurasian extremophiles in general and thermophiles and halophiles in particular. Many questions remain unanswered, and we hope that it will stimulate further studies in this intriguing and promising field.

Hydrocarbon Exploration and Production Frank Jahn, 1998-03-13 This book on hydrocarbon exploration and production

is the first volume in the series Developments in Petroleum Science. The chapters are: The Field Life Cycle, Exploration, Drilling Engineering, Safety and The Environment, Reservoir Description, Volumetric Estimation, Field Appraisal, Reservoir Dynamic Behaviour, Well Dynamic Behaviour, Surface Facilities, Production Operations and Maintenance, Project and Contract Management, Petroleum Economics, Managing the Producing Field, and Decommissioning.

The Elements of User Experience Jesse James Garrett, 2010-12-16 From the moment it was published almost ten years ago, Elements of User Experience became a vital reference for web and interaction designers the world over, and has come to define the core principles of the practice. Now, in this updated, expanded, and full-color new edition, Jesse James Garrett has refined his thinking about the Web, going beyond the desktop to include information that also applies to the sudden proliferation of mobile devices and applications. Successful interaction design requires more than just creating clean code and sharp graphics. You must also fulfill your strategic objectives while meeting the needs of your users. Even the best content and the most sophisticated technology won't help you balance those goals without a cohesive, consistent user experience to support it. With so many issues involved—usability, brand identity, information architecture, interaction design—creating the user experience can be overwhelmingly complex. This new edition of The Elements of User Experience cuts through that complexity with clear explanations and vivid illustrations that focus on ideas rather than tools or techniques. Garrett gives readers the big picture of user experience development, from strategy and requirements to information architecture and visual design.

Green Synthesis of Nanomaterials for Bioenergy Applications Neha Srivastava, Manish Srivastava, P. K. Mishra, Vijai Kumar Gupta, 2020-11-09 An authoritative summary of the quest for an environmentally sustainable synthesis process of nanomaterials and their application for environmental sustainability Green Synthesis of Nanomaterials for Bioenergy Applications is an important guide that provides information on the fabrication of nanomaterial and the application of low cost, green methods. The book also explores the impact on various existing bioenergy approaches. Throughout the book, the contributors—noted experts on the topic—offer a reliable summary of the quest for an environmentally sustainable synthesis process of nanomaterials and their application to the field of environmental sustainability. The green synthesis of nanoparticles process has been widely accepted as a promising technique that can be applied to a variety of fields. The green nanotechnology-based production processes to fabricate nanomaterials operates under green conditions without the intervention of toxic chemicals. The book's exploration of more reliable and sustainable processes for the synthesis of nanomaterials, can lead to the commercial application of the economically viability of low-cost biofuels production. This important book: Summarizes the quest for an environmentally sustainable synthesis process of nanomaterials for their application to the field of environmental sustainability Offers an alternate, sustainable green energy approach that can be commercially implemented worldwide Covers recent approaches such as fabrication of nanomaterial that apply low cost, green methods and examines its impact on various existing bioenergy applications Written for researchers, academics and students of nanotechnology, nanosciences, bioenergy, material science, environmental sciences, and pollution control, Green Synthesis of Nanomaterials for Bioenergy Applications is a must-have guide that covers green synthesis and characterization of nanomaterials for cost effective bioenergy applications.

This Engaging World of E-book Books: A Detailed Guide Unveiling the Pros of Kindle Books: A Realm of Ease and Flexibility E-book books, with their inherent mobility and simplicity of access, have freed readers from the constraints of physical books.
