Peace on Earth, Good-Will to Dogs (EasyRead Super Large 20pt Edition) Eleanor Hallowell Abbott,2006

**A Dog's World** Jessica Pierce,Marc Bekoff,2023-04-18 From two of the world's leading authorities on dogs, an imaginative journey into a future of dogs without people What would happen to dogs if humans simply disappeared? Would dogs be able to survive on their own without us? A Dog's World imagines a posthuman future for dogs, revealing how dogs would survive—and possibly even thrive—and explaining how this new and revolutionary perspective can guide how we interact with dogs now. Drawing on biology, ecology, and the latest findings on the lives and behavior of dogs and their wild relatives, Jessica Pierce and Marc Bekoff—two of today's most innovative thinkers about dogs—explore who dogs might become without direct human intervention into breeding, arranged playdates at the dog park, regular feedings, and veterinary care. Pierce and Bekoff show how dogs are quick learners who are highly adaptable and opportunistic, and they offer compelling evidence that dogs already do survive on their own—and could do so in a world without us. Challenging the notion that dogs would be helpless without their human counterparts, A Dog's World enables us to understand these independent and remarkably intelligent animals on their own terms.

**The Intelligence of Dogs** Stanley Coren,2006-01-05 Combining heroic stories of dogs with the latest scientific and psychological information, this book has provoked controversy with its lists that rank more than 100 breeds and its exciting new insights into the thoughts, emotions, and inner lives of dogs.

**Going for the Blue** Roger A. Caras,2001-02-06 In this patented puppy tell-all, Roger Caras will enlighten, edify, and amuse us with the inside scoop that only he can provide on what really goes on behind the scenes of dog shows. He gives a brief history of how, without knowledge of genetics, ancient people first selectively bred dogs from wolves. He goes on to explain which factors are utilitarian and which are purely aesthetic and how these figure in judging a dog today. He then describes how dog shows evolved, how winners are selected, the immense amount of preparation that goes into grooming a showdog, what constitutes a champion, and the most important factor in a dog show -- politics. Peppered with photographs of champion dogs and dog shows from around the country, and filled with charming anecdotes about dogs who have made it to the top and those who have been left at the bottom of the doggy pile, Going for the Blue is a book that will appeal to dog lovers everywhere.

**Planet of the Dogs** Robert J. McCarty,2006-07-01 Dogs visit Earth from their home across the universe to teach humans about love and happiness.

Dogs, Past and Present Ivana Fiore,Francesca Lugli,2023-09-07 This volume gathers contributions from scholars from a variety of disciplines to provide a comprehensive assessment of the importance of dogs through history. There is a focus on the necessity of an 'interdisciplinary perspective' to fully understand the fundamental role that dogs have played in our past.

*A Celebration of Dogs* Roger A. Caras,1982 Traces the evolution and development of dogs and describes their uses today.

*Dogs with Jobs* Merrily Weisbord,Kim Kachanoff,2000 From the creators of the upcoming PBS television series special of the same name, Dogs with Jobs is a charming, fascinating, fully illustrated volume of the world's most amazing working dogs--the ultimate gift for dog lovers. Three 8-page color photo inserts.

**Dogs That Know When Their Owners Are Coming Home** Rupert Sheldrake,2011-04-26 With a scientist's mind and an animal lover's compassion, world-renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals--and ourselves. How do cats know when it's time to go to the vet, even before the cat carrier comes out? How do dogs know when their owners are returning home at unexpected times? How can horses find their way back to the stable over completely unfamiliar terrain? After five years of extensive research involving thousands of people who have pets and work with animals, Dr. Sheldrake proves conclusively what many pet owners already know: there is a strong connection between humans and animals that defies present-day scientific understanding. Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other, to their owners, and to their homes in powerful ways. His provocative ideas about these social, or morphic, fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild, such as migration and homing. Dogs That Know When Their Owners Are Coming Home not only provides fascinating insight into animal, and human, behavior, but also teaches us to question the boundaries of conventional scientific thought, and shows that the very animals who are closest to us have much to teach us about biology, nature, and consciousness.

**Man Writes Dog** William Farina,2014-03-21 Over the millennia, many great writers, from Pliny and Plutarch to C.S. Lewis and John Steinbeck, have addressed diverse canine themes in their work, usually in a broader, human context. Late in the 20th century it was conclusively established by modern science that all dogs, without exception, are descended from wolves. Viewed through the dynamic lens of this new model, the constantly evolving relationship between humankind and canines, both wild and domesticated, appears more complex and intertwined than ever before. This survey reviews what 20 selected authors from the Western tradition have had to say on the same subject matter leading up to our present times.
