Diet for a New America John Robbins,1998 From John Robbins, a new edition of the classic that awakened the conscience of a nation. Since the 1987 publication of *Diet for a New America*, beef consumption in the United States has fallen a remarkable 19%. While many forces are contributing to this dramatic shift in our habits, *Diet for a New America* is considered to be one of the most important. *Diet for a New America* is a startling examination of the food we currently buy and eat in the United States, and the astounding moral, economic, and emotional price we pay for it. In Section I, John Robbins takes an extraordinary look at our dependence on animals for food and the inhumane conditions under which these animals are raised. It becomes clear that the price we pay for our eating habits is measured in the suffering of animals, a suffering so extreme and needless that it disrupts our very place in the web of life. Section II challenges the belief that consuming meat is a requirement for health by pointing out the vastly increased rate of disease caused by pesticides, hormones, additives, and other chemicals now a routine part of our food production. The author shows us that the high health risk is unnecessary, and that the production, preparation, and consumption of food can once again be a healthy process. In Section III, Robbins looks at the global implications of a meat-based diet and concludes that the consumption of the resources necessary to produce meat is a major factor in our ecological crisis. *Diet for a New America* is the single most eloquent argument for a vegetarian lifestyle ever published. Eloquently, evocatively, and entertainingly written, it is a cant put down book guaranteed to amaze, infuriate, but ultimately educate and empower the reader. A pivotal book nominated for the Pulitzer Prize for Non-Fiction in 1987.

Our Dolphin Ancestors Frank Joseph,2016-03-17 Reveals the shared ancestry behind our affinity with dolphins and our shared destiny • Explains how we are both descendants of the aquatic ape and still share many physiological features with dolphins that set us apart from other primates • Explores dolphins' communication with other species and how dolphin therapy has miraculous effects on people with autism, cancer, stroke, and depression • Explores the connections between dolphins and Atlantis and Lemuria Wild animals avoid contact with humans, but wild dolphins seek us out to play and socialize, even going so far as to voluntarily rescue people from drowning. What explains this remarkable natural affinity? Revealing the evolutionary basis for our special relationship with dolphins, Frank Joseph explains how we are both descendants of the same ancient branch of human-ity. Building upon the aquatic ape theory, he details how we both began on land but devastating floods forced our distant ancestors into the seas, where humanity developed many of the traits that set us apart from other primates, such as our instinctive diving reflex and our newborns' ability to swim. But while some of the aquatic apes returned to land, later evolving into modern humans, some remained in the cradle of Mother Ocean and became our dolphin cousins. Integrating scientific research on dolphin intelligence, communication, and physiology with enduring myths from some of the world's oldest cultures, such as the Aborigines, Norse, Greeks, and Celts, the author examines our physical commonalities with dolphins, including their vestigial thumbs and legs, birth processes, and body temperature. He explores dolphins' uncanny ability to diagnose disease such as cancer in humans and how dolphin therapy has had miraculous effects on children with autism, victims of stroke, and those suffering from depression. He provides evidence for dolphins' different attitudes toward men, women, and children, their natural affinity with cats and dogs, and their telepathic communication with other species, including ours. He explores dolphins' mysterious role in the birth of early civilization and their connections with the Dog Star, Sirius, and Atlantis and Lemuria--a bond still commemorated by annual gatherings of millions of dolphins. As Frank Joseph shows, if we can learn to fully communicate with dolphins, accessing their millennia-old oral tradition, we may learn the truth about humanity's origins and our shared future, when humankind may yet again quit the land for a final return to the sea.

George Cross Heroes Michael Ashcroft,2012-10-25 This ebook edition contains the full text version as per the book; but doesn't include original photographic and illustrated material. In a broadcast to the nation in September 1940 King George VI announced the institution of the George Cross - a civilian equivalent of the Victoria Cross awarded to recognize the many acts of supreme gallantry being performed outside of the battlefield. From Thomas Alderson, the first recipient of the medal, who heroically rescued several people from trapped houses during one terrible Blitz night, to Lance Corporal Matthew Croucher, who threw himself onto a live grenade in the Helmand province to save the lives of his comrades (and somehow survived), to Barbara Harrison, an air stewardess who died in 1968 after helping many

passengers escape from an onboard fire, this book tells the amazing stories of everyone of the George Cross's 159 direct recipients. GEORGE CROSS HEROES pays tribute to the extraordinary courage displayed by so many of the commonwealth's men and women in so many incredible situations over the last 70 years.

Music, Myth, and Nature, Or, The Dolphins of Arion François Bernard Mâche,1992 François Bernard-Mâche here uses music-related myths and ancient as well as more recent history to show the underlying relationship between musical thought and certain natural laws. Using original analytical techniques, he sheds new light on the history of music, showing the presence of music in the animal world to demonstrate that Nature and culture are not in opposition.

In spite of the importance of this collection it has not been widely published and remains something of a hidden gem. Brian Shefton was an insightful collector, as well as a distinguished scholar of Greek and Etruscan archaeology, and the 14 papers presented here reflect the broad scope of the collection; ranging across pottery, jewelery, terracottas and metalwork. The contributions, written by leading experts in the field, focus on specific objects or groups of objects in the Collection, providing new interpretations and bringing previously unpublished items to light. The history of the Shefton Collection is explored. Together these contributions provide a tribute to a remarkable individual who made a substantial and notable contribution to his discipline.
