Machine Landscapes Liam Young,2019-02-11 The most significant architectural spaces in the world are now entirely empty of people. The data centres, telecommunications networks, distribution warehouses, unmanned ports and industrialised agriculture that define the very nature of who we are today are at the same time places we can never visit. Instead they are occupied by server stacks and hard drives, logistics bots and mobile shelving units, autonomous cranes and container ships, robot vacuum cleaners and internet-connected toasters, driverless tractors and taxis. This issue is an atlas of sites, architectures and infrastructures that are not built for us, but whose form, materiality and purpose is configured to anticipate the patterns of machine vision and habitation rather than our own. We are said to be living in a new geological epoch, the Anthropocene, in which humans are the dominant force shaping the planet. This collection of spaces, however, more accurately constitutes an era of the Post-Anthropocene, a period where it is technology and artificial intelligence that now computes, conditions and constructs our world. Marking the end of human-centred design, the issue turns its attention to the new typologies of the post-human, architecture without people and our endless expanse of Machine Landscapes. Encyclopedia of Artificial Intelligence Philip L. Frana,Michael J. Klein,2021-04-07 This authoritative reference work will provide readers with a complete overview of artificial intelligence (AI), including its historic development and current status, existing and projected AI applications, and present and potential future impact on the United States and the world. Some people believe that artificial intelligence (AI) will revolutionize modern life in ways that improve human existence. Others say that the promise of AI is overblown. Still others contend that AI applications could pose a grave threat to the economic security of millions of people by taking their jobs and otherwise rendering them obsolete—or, even worse, that AI could actually spell the end of the human race. This volume will help users understand the reasons AI development has both spirited defenders and alarmed critics; explain theories and innovations like Moore's Law, mindcloning, and Technological Singularity that drive AI research and debate; and give readers the information they need to make their own informed judgment about the promise and peril of this technology. All of this coverage is presented using language and terminology accessible to a lay audience.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

A History of Writing in Japan Christopher Seeley,2023-11-20 This book deals chronologically with the history of writing in Japan, a subject which spans a period of 2,000 years, beginning with the transmission of writing from China in about the first or second century AD, and concluding with the use of written Japanese with computers. Topics dealt with include the adoption of Chinese writing and its subsequent adaptation in Japan, forms of writing employed in works such as the Kojiki and Man'yoshu, development of the kana syllabaries, evolution of mixed character-kana orthography, historical kana usage, the rise of literacy during the Edo period, and the main changes that have taken place in written Japanese in the modern period (ca. 1868 onwards). This is the first full-length work in a European language to provide the Western reader with an overall account of the subject concerned, based on extensive examination of both primary and secondary materials.

Ambiguous Territory Cathryn Dwyre, Chris Perry, David Salomon, Kathy Velikov, 2022-01-26 The writers and designers in this collection are among the most thoughtful architects, artists, landscape architects, and theorists working today. The editors organized these essays and works of art and design around three territories: the atmospheric, the biologic, and the geologic. Each cluster of essays is further framed by forewords and afterwords, which draw individual points of view into a larger articulation of what an ambiguous territory might be and how it operates. Ambiguous Territory emerged from a symposium and exhibition held at the University of Michigan in the fall of 2017, and exhibitions at the University of Virginia and Pratt Manhattan Gallery in 2018, and at Ithaca College in 2019. The conversations that arise in this book are inquisitive and critically engaged. They pressure assumptions we routinely make about what constitutes meaningful and principled perspectives in architecture, landscape architecture, and art. Both the texts and the work take on some of the trickiest issues of our time. -- Excerpt from a foreword to the book by Catherine Ingraham Professor, Graduate Architecture and Urban Design, Pratt Institute The works in Ambiguous Territory exist in a creative space, in the moody realm of possibilities. It's a sphere of design in which solutions (or lack thereof) have yet to settle. That should be a familiar feeling for all creative people, whose daily life may include exploring a way out of a problem without being able to nail down an exact answer. This volume belongs in that territory of ambiguity and curiosity, a place where there is room for musings, laughter, and despair. The projects convey, in different ways, a hope for a better future, but also a sense of not knowing if that future is at all possible. -- Excerpt from an afterword to the book by Peder Anker Professor, the Gallatin School of Individualized Study, New York University With Contributions of Ellie Abrons, Paula Gaetano Adi, amid.cero9, Amy Balkin, Philip Beesley, Ursula Biemann, The Bittertang Farm, Edward Burtynsky, Bradley Cantrell, Gustavo Crembil, Brian Davis, Design Earth, Mark Dion, Formlessfinder, Lindsey French, Adam Fure, Futureforms, Michael Geffel, Rania Ghosn, David Gissen, El Hadi Jazairy, Harrison Atelier, Cornelia Hesse-Honegger, Lisa Hirmer, Catherine Ingraham, Lydia Kallipoliti, Perry Kulper, Sean Lally, Landing Studio, Lateral Office, LCLA, Mark Lindquist, LiquidFactory, Ariane Lourie-Harrison, Meredith Miller, Thom Moran, Ricardo de Ostos, NaJa & deOstos, Nemestudio, Mark Nystrom, OMG / O'Donnell Miller Group, The Open Workshop, Ricardo de Ostos, oOR / Office of Outdoor Research, Jennifer Peeples, pneumastudio, Alessandra Ponte, Office for Political Innovation, Rachele Riley, RVTR, Smout Allen, smudge studio, Neil Spiller, Terreform ONE, Andreas Theodoridis, Unknown Fields, Liam Young, Marina Zurkow

Planet City Liam Young, Saskia Sassen, Kim Stanley Robinson, Ewan McEoin, Benjamin Bratton, Ashley Dawson, Holly Gene Buck, Ryan Griffen, Xia Jia, Stanley Chen, Giorgos Kallis, Nalo Hopkinson, Amaia Sanchez-Velasco, Andrew Toland, 2020-12-17 Planet City is a speculation of what might happen if the world collapsed into a new home for 10 billion people, allowing the rest of the world to return to a global wilderness. It is both an extraordinary image of tomorrow and an urgent examination of the environmental questions that face us today.

The Sixth Station Linda Stasi, 2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.

Angels and Demons in Art Rosa Giorgi, 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Landscape Futures Geoff Manaugh, 2013 This work travels the shifting terrains of architectural invention, where new spatial devices on a variety of scales - from the handheld to the inhabitable - reveal previously overlooked dimensions of the built and natural environments. From philosophical toys and ironic provocations to a room-sized kinetic mechanism that models future climates, these devices are not merely diagnostic but creative, deploying fictions as a means of exploring different futures. Exhibition: Nevada Museum of Art (13.08.2011-12.2.2012).
