"**Gorakh Sabadi (concise edition, for English readers)**" ,2023-04-30 No guru found like wisdom, no disciple like consciousness, no friend like the mind — so Gorakh roams alone. — Gorakh, Sabadi 189 The Gorakh sabadis tell us that the totality of a human being, implying both conscious and subconscious (unconscious) things, is the interconnected movement of sensations and feelings, sounds and vibrations, thoughts and desires; that with desire, our consciousness moves in time and becoming, and that right meditation is the awakening of emptiness, that is, divine fire or bodhi on its own from nowhere, and the emptying of the consciousness. The emptying of the consciousness is our dying, psychologically, which is sweet. To die while living and live having died is the supreme art of living. The teaching of Gorakh of joga (yoga) or religion is alakh vigyán, which is to be known with the alakh sense and meditation and not only by thinking or thought. Truly die, Yogi, dying is sweet! Die the death Gorakh died — beholding. Die while living, live having died, the wonderful ambrosia — drink your fill of it. — Gorakh Sabadi 291. — Yogi Surajnath, guru Budhnath ji.

The Power of Little Ideas David Robertson,2017-04-11 Conventional wisdom today says that to survive, companies must move beyond incremental, sustaining innovation and invest in some form of radical innovation. Disrupt yourself or be disrupted! is the relentless message company leaders hear. The Power of Little Ideas argues there's a third way that is neither sustaining nor disruptive. This low-risk, high-reward strategy is an approach to innovation that all company leaders should understand so that they recognize it when their competitors practice it, and apply it when it will give them a competitive advantage. This distinctive approach has three key elements: It consists of creating a family of complementary innovations around a product or service, all of which work together to make that product more appealing and competitive. The complementary innovations work together as a system to carry out a single strategy or purpose. Crucially, unlike disruptive or radical innovation, innovating around a key product does not change the central product in any fundamental way. In this powerful, practical book, Wharton professor David Robertson illustrates how many well-known companies, including CarMax, GoPro, LEGO, Gatorade, Disney, USAA, Novo Nordisk, and many others, used this approach to stave off competitive threats and achieve great success. He outlines the organizational practices that unintentionally torpedo this approach to innovation in many companies and shows how organizations can overcome those challenges. Aimed at leaders seeking strategies for sustained innovation, and at the quickly growing numbers of managers involved with creating new products, The Power of Little Ideas provides a logical, organic, and enduring third way to innovate.
