Shem`on the Graceful Mary Hansbury, 2020-01-01 The late seventh century in the Syrian Church saw the flourishing of several noted monastic writers, amongst them Shem`on, a monk of an abbey in south-west Iran. Few of his writings remain, but this homily has been preserved as a model of instruction on the solitary life. Preached at the consecration of the cell of a monk embarking on the hermit life, it clearly states the disciplines required to live this form of asceticism, as well as the difficulties and dangers that will be encountered. Through this life of stillness (hesychia), the whole person lives centred on life in the resurrected Christ and in the continuing work of the Holy Spirit in the Church and in the world.

Hipnology 101 David Fontenot, 2018-05-18 Hipnology is designated as mind science because it strictly deals with enhancement and advancement of the intellect. For this reason, the reader will encounter certain scholars from the school of life who have transcended the zones of ignorance by ascending to the throne of self-mastery. Whether those conversations are conducted by Master Key, Wiz, Finesse, Dr. Know, etc., the game plan of each hipnologist is to break the spell of tricknology. It is no secret that the mind's eye has been hypnotized throughout the trance of time. Therefore, the goal of hipnology is to break those spells by unveiling truths and telling life's story in a unique style and fashion. There is so much that can be emphasized regarding these writings, so since knowledge is endless, Hipnology 101 will be presented in series. In other words, the writings will not

stop until the casket drops.

How to Change Your Mind Michael Pollan, 2019-05-14 Now on Netflix as a 4-part documentary series! “Pollan keeps you turning the pages . . . cleareyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

The Curious Incident of the Dog in the Night-Time Mark Haddon, 2009-02-24 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is

autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Mystery School in Hyperspace Graham St John, 2015-11-24 Since the mid-1950s, the psychoactive compound DMT has attracted the attention of experimentalists and prohibitionists, scientists and artists, alchemists and hyperspace emissaries. While most known as a crucial component of the "jungle alchemy" that is ayahuasca, DMT is a unique story unto itself. Until now, this story has remained untold. *Mystery School in Hyperspace* is the first book to delve into the history of this substance, the discovery of its properties, and the impact it has had on poets, artists, and musicians. DMT has appeared at crucial junctures in countercultural history. William Burroughs was jacking the spice in Tangier at the turn of the 1960s. It was present at the meeting between Ken Kesey's Merry Pranksters and Tim Leary's associates. It guided the inception of the Grateful Dead in 1965. It showed up in Berkeley in the same year, falling into the hands of Terence McKenna, who would eventually become its champion in the post-rave neo-psychedelic movement of the 1990s. Its indole vapor drifted through Portugal's Boom Festival and has been evident at Nevada's Burning Man, where DMT has been adopted as spiritual technology supplying shape, color, and depth to a visionary art movement. The growing prevalence of use is evident in a vast networked independent research culture, and in its impact on fiction, film, music and metaphysics. As this book traces the effect of DMT's release into the cultural bloodstream, the results should be of great interest to contemporary readers. The book permits a broad reading

audience to join ongoing debates in studies in consciousness and theology where the brain is held to be either a generator or a receiver of consciousness. The implications of the spirit molecule or the brain's own psychedelic among other theories illustrate that DMT may lift the lid on the Pandora's Box of consciousness. Features a foreword by Dennis McKenna, cover art by Beau Deeley, and thirty color illustrations by various artists, including Alex Grey, Android Jones, Martina Hoffmann, Luke Brown, Carey Thompson, Adam Scott Miller, Randal Roberts, along with Jay Bryan, Cyb, Orryelle Defenestrade-Bascule, Art Van D'lay, Stuart Griggs, Jay Lincoln, Gwylm Llwydd, Shiptu Shaboo, Marianna Stelmach, and Mister Strange. Regarded as the "nightmare hallucinogen" or celebrated as the "spirit molecule," labelled "psychotogenic" or "entheogenic," considered a dangerous drug or the suspected X-factor in the evolution of consciousness, DMT is a powerful enigma. Documenting the scientists and artists drawn into its sphere of influence, navigating the liminal aesthetics of the "breakthrough" experience, tracing the novum of "hyperspace" in esoteric and science fiction currents, *Mystery School in Hyperspace* excavates the significance of this enigmatic phenomenon in the modern world. Exposing a great many myths, this cultural history reveals how DMT has had a beneficial influence on the lives of those belonging to a vast underground network whose reports and initiatives expose drug war propaganda and shine a light in the shadows. This conversation is highly relevant at a time when significant advances are being made to lift the moratorium on human research with psychedelics.

The Screen in Surrealist Art and Thought Haim Finkelstein, 2017-07-05 An interrogation of the notion of space in Surrealist theory and philosophy, this study analyzes the manifestations of space in the paintings and writings done in the framework of the Surrealist Movement. Haim Finkelstein introduces the 'screen' as an important spatial paradigm that clarifies and extends the understanding of Surrealism as it unfolds in the 1920s, exploring the screen and layered depth as fundamental structuring principles associated with the representation of the mental space and of the internal processes that eventually came to be linked with the Surrealist concept of psychic automatism. Extending the discussion of the concepts at stake for Surrealist visual art into the context of film, literature and criticism, this study sheds new light on the way 'film thinking' permeates Surrealist thought and aesthetics. In early chapters, Finkelstein looks at the concept of the screen as emblematic of a strand of spatial apprehension that informs the work of young writers in the 1920s, such as Robert Desnos and Louis Aragon. He goes on to explore the way the spatial character of the serial films of Louis Feuillade intimated to the Surrealists a related mode of vision, associated with perception of the mystery and the Marvelous lurking behind the surfaces of quotidian reality. The dialectics informing Surrealist thought with regard to the surfaces of the real (with walls, doors and windows as controlling images), are shown to be at the basis of Andr  re Breton's notion of the picture as a window. Contrary to the traditional sense of this metaphor, Breton's 'window' is informed by the screen paradigm, with its surface serving as a locus of a dialectics of transparency and opacity, permeability and reflectivity. The main aesthetic and conceptual issues that come up in the consideration of Breton's window metaphor lay the groundwork for an analysis of the work of Giorgio de Chirico, Ren   Magritte, Max Ernst, Andr   Breton, and Joan Mir  . The concluding chapter considers

101 Ways to Jump Start Your Intuition John Holland, 2005-07-01 Intuition is the language of the soul, and we're all born with the natural ability of an inner-knowing. Augustine's Early Theology of the Church David C. Alexander, 2008 The nature and development of Augustine's understanding of the church between his conversion (386) and his forced entry into the clergy (391) provides an essential lens to understanding this seminal period of transition and the foundations of his future ecclesial contributions. Even so, most studies of Augustine's ecclesiology bypass this period, starting with the clerical Augustine (post 391). In fact, research on the 'young' Augustine and the *Confessions* too often stalls over debates between his neo-Platonic or Christian orientation, focusing on dichotomies in Augustine or an individualistic Augustine too rigidly labeled. This book helps fill these gaps and provides a case study supporting arguments for continuity between the 'young' and the clerical Augustine. A careful chronological textual approach to Augustine's early Christian years demonstrates how his ecclesiological thought began during this period and comprised a core component of his first theological synthesis. The emergence of his ecclesiological ideas was intimately intertwined with his overall personal, religious, philosophic, and theological development. As such it is crucial to our biographical and theological understanding of the great North African and will be of interest to specialists and students alike of Augustine's development, *Confessions*, mature ecclesiology, and the late antique world.
