Nuclear Power Darryl Siemer,2019-09-23 As the world's energy sources continue to develop, with less reliance on traditional fossil fuels and more reliance on cleaner, more efficient, alternative energy sources, nuclear power continues to be a dividing point for many people. Some believe it is the answer to our energy problems for the future, while others warn of the risks. Written by a retired scientist who spent most of his career at the

Idaho National Laboratory (INL), this book aims to delve into the issues surrounding nuclear power and dispel its myths, while building an argument for why the United States should develop a nuclear power plan for the future. As a “whistleblower,” the author spent much of the last ten years of his career at the INL raising concerns about how its mission of serving as the Department of Energy’s lead laboratory in radioactive waste management was not being properly managed. While the United States continues to tread water on the issue of nuclear energy, the author believes that a nuclear “renaissance” is not only possible but is necessary for meeting the world’s growing demand for energy, especially clean energy. With fossil fuels slowly dying out and renewable energy sources not able to handle the demand for a continuously growing energy-consuming public, nuclear is an obvious solution. This book is a must-have for any engineer working in nuclear power, students hoping to go into that industry, and other engineers and scientists interested in the subject. This book is both “technical” and “political” because they’re equally important in determining what actually happens in institutions dealing with technical problems.

Making India Great Aparna Pande,2020-08-13 India will be the world's most populous country by 2024 and its third largest economy by 2028. But the size of our population and a sense of historical greatness alone are insufficient to guarantee we will fulfil our ambition to become a global power. Our approach to realize this vision needs more than just planning for economic growth. It requires a shift in attitudes. In *Making India Great*, Aparna Pande examines the challenges we face in the areas of social, economic, military and foreign policy and strategy. She points to the dichotomy that lies at the heart of the nation: our belief in becoming a global power and the reluctance to implement policies and take actions that would help us achieve that goal. The New India holds all the promise of greatness many of its citizens dream of. Can it become a reality? The book delves into this question.

The College Conversation Eric J. Furda,Jacques Steinberg,2021-09-21 From an Ivy League dean and a college admissions expert, a guide to help parents support their children as they navigate their way to college *The College Conversation* is a comprehensive resource for mapping the path through the college application process that provides practical advice and reassurance to keep both anxious parents and confused children sane and grounded. Rather than adding to the existing canon of *How to Get In* college guides or rankings, Eric Furda and Jacques Steinberg provide a step-by-step approach to having the tough conversations on this topic with less stress and more success. The book is organized around key discussions and themes that trace the chronological arc of admissions and financial aid--beginning before the assembly of a list of potential colleges and continuing through the receipt of decisions--with a final section that includes advice on the first year of college. The topics include preliminary conversations about the search, and specifically how parents can think about their children's interests and what kind of college would best suit them; choosing a college (based on its curriculum, culture, and community); writing the most effective essays; assessing acceptances, including considerations of finances and aid; and making the transition from high school to college life. *The College Conversation* will provide parents, students, and counselors with the credible, level-headed information often missing in this process, as well as a much-needed dash of perspective borne of experience.
