Dr. Quantum's Little Book Of Big Ideas Fred Alan Wolf,2005-09-01 Respected among scientists and spiritual leaders alike for his pioneering work combining scientific and spiritual thought, Fred Alan Wolf (aka Dr. Quantum) is, as Deepak Chopra states, one of the most important pioneers in the field of consciousness. Featured in the word-of-mouth indie hit, What the Bleep Do We Know?!, Dr. Wolf is a physicist who knows how to put complex science-based ideas into terms that even science-phobes can understand. With clarity and a sense of humor, Dr. Quantum presents Big Ideas in the form of both short quotes and longer excerpts and covers topics ranging from the construction of our everyday reality to our relationship to one another. Dr. Quantum's Little Book of Big Ideas is a perfect gift for anyone interested in the realm where science meets spirit.

A Universe from Nothing Lawrence Maxwell Krauss,2012 Shares provocative and revelatory answers to such philosophical conundrums as the origins of the universe and how it will end, offering scientific explanations about the immense process through which life evolved.

The Cognitive-Theoretic Model of the Universe: A New Kind of Reality Theory Christopher Michael Langan,2002-06-01 Paperback version of the 2002 paper published in the journal Progress in Information, Complexity, and Design (PCID). ABSTRACT Inasmuch as science is observational or perceptual in nature, the goal of providing a scientific model and mechanism for the evolution of complex systems ultimately requires a supporting theory of reality of which perception itself is the model (or theory-to-universe mapping). Where information is the abstract currency of perception, such a theory must incorporate the theory of information while extending the information concept to incorporate reflexive self-processing in order to achieve an intrinsic (self-contained) description of reality. This extension is associated with a limiting formulation of model theory identifying mental and physical reality, resulting in a reflexively self-generating, self-modeling theory of reality identical to its universe on the syntactic level. By the nature of its derivation, this theory, the Cognitive Theoretic Model of the Universe or CTMU, can be regarded as a supertautological reality-theoretic extension of logic. Uniting the theory of reality with an advanced form of computational language theory, the CTMU describes reality as a Self Configuring Self-Processing Language or SCSPL, a reflexive intrinsic language characterized not only by self-reference and recursive self-definition, but full self-configuration and self-execution (reflexive read-write functionality). SCSPL reality embodies a dual-aspect monism consisting of infocognition, self-transducing information residing in self-recognizing SCSPL elements called syntactic operators. The CTMU identifies itself with the structure of these operators and thus with the distributive syntax of its self-modeling SCSPL universe, including the reflexive grammar by which the universe refines itself from unbound teleosis or UBT, a primordial realm of infocognitive potential free of informational constraint. Under the guidance of a limiting (intrinsic) form of anthropic principle called the Telic Principle, SCSPL evolves by telic recursion, jointly configuring syntax and state while maximizing a generalized self-selection parameter and adjusting on the fly to freely-changing internal conditions. SCSPL relates space, time and object by means of conspansive duality and conspansion, an SCSPL-grammatical process featuring an alternation between dual phases of existence associated with design and actualization and related to the familiar wave-particle duality of quantum mechanics. By distributing the design phase of reality over the actualization phase, conspansive spacetime also provides a distributed mechanism for Intelligent Design, adjoining to the restrictive principle of natural selection a basic means of generating information and complexity. Addressing physical evolution on not only the biological but cosmic level, the CTMU addresses the most evident deficiencies and paradoxes associated with conventional discrete and continuum models of reality, including temporal directionality and accelerating cosmic expansion, while preserving virtually all of the major benefits of current scientific and mathematical paradigms.

**Solve for Happy** Mo Gawdat,2017-03-21 In this “powerful personal story woven with a rich analysis of what we all seek” (Sergey Brin, cofounder of Google), Mo Gawdat, Chief Business Officer at Google’s [X], applies his superior logic and problem solving skills to understand how the brain processes joy and sadness—and then he solves for happy. In 2001 Mo Gawdat realized that despite his incredible success, he was desperately unhappy. A lifelong learner, he attacked the problem as an engineer would: examining all the provable facts and scrupulously applying logic. Eventually, his countless hours of research and science proved successful, and he discovered the equation for permanent happiness. Thirteen years later, Mo’s algorithm would be put to the ultimate test. After the sudden death of his son, Ali, Mo and his family turned to his equation—and it saved them from despair. In dealing with the horrible loss, Mo found his mission: he would pull off the type of “moonshot” goal that he and his colleagues were always aiming for—he would share his equation with the world and help as many people as possible become happier. In Solve for Happy Mo questions some of the most fundamental aspects of our existence, shares the underlying reasons for suffering, and plots out a step-by-step process for achieving lifelong happiness and enduring contentment. He shows us how to view life through a clear lens, teaching us how to dispel the illusions that cloud our thinking; overcome the brain’s blind spots; and embrace five ultimate truths. No matter what obstacles we face, what burdens we bear, what trials we’ve experienced, we can all be content with our present situation and optimistic about the future.

**The Golden Cord** Charles Taliaferro,2012-12-15 The title of Charles Taliaferro’s book is derived from poems and stories in which a person in peril or on a quest must follow a cord or string in order to find the way to happiness, safety, or home. In one of the most famous of such tales, the ancient Greek hero Theseus follows the string given him by Ariadne to mark his way in and out of the Minotaur’s labyrinth. William Blake’s poem “Jerusalem” uses the metaphor of a golden string, which, if followed, will lead one to heaven itself. Taliaferro extends Blake’s metaphor to illustrate the ways we can link what we see, feel, and do with deep spiritual realities. Taliaferro offers a foundational case for the recognition of the experience of the eternal God of Christianity, in which God is understood as the fount of all goodness and the subject and object of our best love, revealed through scripture, tradition, philosophical reflection, and encountered in everyday events. He addresses philosophical obstacles to the recognition of such experiences, especially objections from the “new atheists,” and explores the values involved in thinking and experiencing God as eternal. These include the belief that the eternal goodness of God subordinates temporal goods, such as the pursuit of fame and earthly glory; that God is the essence of life; and that the eternal God hallows domestic goods, blessing the everyday goods of ordinary life. An exploration of the moral and spiritual riches of the Christian tradition as an alternative to materialism and naturalism, The Golden Cord brings an originality and depth to the debate in accessible and engaging prose.

Nature's Destiny Michael Denton,2002-02 A leading evolutionary thinker, biologist, and medical researcher asks the question: Could life elsewhere be substantially different from life on Earth?--and builds a step-by-step argument for human inevitability. 65 illustrations and photos.

Beyond Jesus Patricia A. Pearce,2018-07-03 In the crucible of grief following a friend's death, Presbyterian pastor Patricia Pearce sensed a dimension of existence beneath her ordinary perception-and became resolved to discover it. She soon found herself in a vortex of revelatory dreams, synchronicities, energy openings, and insights that shattered her worldview, exposed a unified Reality of Love, and unveiled the illusory nature of the ego and the world it has created. Faced with these discoveries, she struggled to remain in a religion that, she now realized, has been shaped by the very ego consciousness Jesus transcended and urged others to abandon. Enlightening, revelatory, and bold, Beyond Jesus reveals how our political and religious institutions are an outward manifestation of the inner beliefs we hold about who we are, and that beneath the layers of dogma about Jesus lies a key to our spiritual evolution and the astonishing possibility it holds for the future.

Instant Healing Susan Shumsky,2013-01-21 “Can help you heal yourself, your family, friends, clients, community, and the entire planet. I have never seen a more complete affirmative prayer book.”—Marci Shimof, #1 New York Times bestselling author of Happy for No Reason In a world of chaos, uncertainty, and malaise, we can no longer depend on the institutions we counted on to offer security and hope. **Creativity** Mihaly Csikszentmihalyi, 2009-10-13 “Although the benefits of this study to scholars are obvious, this thought-provoking mixture of scholarly and colloquial will enlighten inquisitive general readers, too.” — Library Journal (starred review) The classic study of the creative process from the bestselling author of *Flow*. Creativity is about capturing those moments that make life worth living. Legendary psychologist Mihaly Csikszentmihalyi (“The leading researcher into ‘flow states.’” — Newsweek) reveals what leads to these moments—be it the excitement of the artist at the easel or the scientist in the lab—so that this knowledge can be used to enrich people's lives. Drawing on nearly one hundred interviews with exceptional people, from biologists and physicists, to politicians and business leaders, to poets and artists, as well as his thirty years of research on the subject, Csikszentmihalyi uses his famous flow theory to explore the creative process. He discusses such ideas as why creative individuals are often seen as selfish and arrogant, and why the tortured genius is largely a myth. Most important, he explains why creativity needs to be cultivated and is necessary for the future of our country, if not the world.

*First Person* Noah Wardrip-Fruin, Pat Harrigan, 2004 The relationship between story and game, and related questions of electronic writing and play, examined through a series of discussions among new media creators and theorists.

*Seeds of Deception* Jeffrey M. Smith, 2005-03-30 Without knowing it, Americans eat genetically modified (GM) food every day. While the food and chemical industries claim that GMO food is safe, a considerable amount of evidence shows otherwise. In *Seeds of Deception*, Jeffrey Smith, a former executive with the leading independent laboratory testing for GM presence in foods, documents these serious health dangers and explains how corporate influence and government collusion have been used to cover them up. The stories Smith presents read like a mystery novel. Scientists are offered bribes or threatened; evidence is stolen; data withheld or distorted. Government scientists who complain are stripped of responsibilities or fired. The FDA even withheld information from congress after a GM food supplement killed nearly a hundred people and permanently disabled thousands. While Smith was employed by the laboratory he was not allowed to speak on the health dangers or the cover-up. No longer bound by this agreement, Smith now reveals what he knows in this groundbreaking expose. Today, food companies sell GM foods that have not undergone safety studies. FDA scientists opposed this, but White House and industry pressure prevailed and the agency's final policy--co-authored by a former Monsanto attorney--denied the risks. The scientists' concerns were made public only after a lawsuit forced the agency to turn over internal documents. Dan Glickman, former Secretary of Agriculture, describes the government's pro-biotech mindset: You felt like you were almost an alien, disloyal, by trying to present an open-minded view. . . . So I pretty much spouted the rhetoric. . . . It was written into my speeches. In *Seeds of Deception* Smith offers easy-to-understand descriptions of genetic engineering and explains why it can result in serious health problems. This well-documented, pivotal work will show you how to protect yourself and your family. DVD Overview Three videos in one: includes an interview with Jeffrey M. Smith, footage of scientists, and a look at the miraculous improvement in student behavior that accompanied a change in diet at a Wisconsin school. Also included is a lecture by Smith on The Health Dangers of Genetically Engineered Foods and Their Cover-up.
