Uzumaki (3-in-1 Deluxe Edition) Junji Ito, Ichiro Nakayama, Hirokatsu Kihara, 2018-10-16 Kurouzu-cho, a small fogbound town on the coast of Japan, is cursed. According to Shuichi Saito, the withdrawn boyfriend of teenager Kirie Goshima, their town is haunted not by a person or being but a pattern: UZUMAKI, the spiral—the hypnotic secret shape of the world. The bizarre masterpiece horror manga is now available all in a single volume. Fall into a whirlpool of terror! -- VIZ Media

Ozu and the Poetics of Cinema David Bordwell, 1988 Over the last two decades, Yasujiro Ozu has won international recognition as a major filmmaker. Combining biographical information with discussions of the films' aesthetic strategies and cultural significance, David Bordwell questions the popular image of Ozu as the traditional Japanese artisan and examines the aesthetic nature and functions of his cinema.

The Rape of Nanking Iris Chang, 2014-03-11 The New York Times bestselling account of one of history's most brutal—and forgotten—massacres, when the Japanese army destroyed China's capital city on the eve of World War II, piecing together the abundant eyewitness reports into an undeniable tapestry of horror. (Adam Hochschild, Salon) In December 1937, one of the most horrific atrocities in the long annals of wartime barbarity occurred. The Japanese army swept into the ancient city of Nanking (what was then the capital of China), and within weeks, more than 300,000 Chinese civilians and soldiers were systematically raped, tortured, and murdered. In this seminal work, Iris Chang, whose own grandparents barely escaped the massacre, tells this history from three perspectives: that of the Japanese soldiers, that of the Chinese, and that of a group of Westerners who refused to abandon the city and created a safety zone, which saved almost 300,000 Chinese.

Drawing on extensive interviews with survivors and documents brought to light for the first time, Iris Chang's classic book is the definitive history of this horrifying episode.

The Midnight Eye Guide to New Japanese Film Tom Mes, Jasper Sharp, 2005 Thanks to directors such as Kitano, Miike and Miyazaki, Japanese cinema has recently undergone something of a resurgence. This title profiles the work of these established filmmakers, as well as looking at the creations of new, up-and-coming directors.

How Policies Change John Creighton Campbell, 2014-07-14 Japan is aging rapidly, and its government has been groping with the implications of this profound social change. In a pioneering study of postwar Japanese social policy, John Creighton Campbell traces the growth from small beginnings to an elaborate and expensive set of pension, health care, employment, and social service programs for older people. He argues that an understanding of policy change requires a careful disentangling of social problems and how they come to be perceived, the invention (or borrowing) of policy solutions, and conflicts and coalitions among bureaucrats, politicians, interest groups, and the general public. The key to policy change has often been the strategies adopted by policy entrepreneurs to

generate or channel political energy. To make sense of all these complex processes, the author employs a new theory of four modes of decision-making--cognitive, political, artifactual, and inertial. Campbell refutes the claim that there is a unique Japanese-style welfare state. Despite the big differences in cultural values, social arrangements, economic priorities, and political control, government responsibility for the aging-society problem is broadly similar to that in advanced Western nations. However, Campbell's account of how Japan has taken on that responsibility raises new issues for our understanding of both Japanese politics and theories of the welfare state. Temporal Bone Cancer Paul W. Gidley, Franco DeMonte, 2018-05-03 This volume comprehensively reviews the current literature on temporal bone cancer and the multidisciplinary approaches used

to managing these rare tumors. The text will review important medical issues as they specifically relate to temporal bone cancer such as advanced imaging, pathologic classification, skull base surgery, plastic reconstructive surgery, and advances in osseointegrated implants for hearing restoration. Additional chapters are dedicated to the evaluation and management, diagnostic radiology, surgical planning and techniques, radiotherapy, chemotherapy, and rehabilitation. An emphasis is placed on the multidisciplinary approach required for the optimal care of these rare tumors. Written by leaders in the field, Temporal Bone Cancer will be an invaluable resource for residents and fellows in Otolaryngology, Neurosurgery and Neurotology, and clinicians with interest in the primary tumors of the temporal bone.

Mathematics Elsewhere Marcia Ascher, 2002
Mathematics Elsewhere is a fascinating and important contribution to a global view of mathematics. Presenting mathematical ideas of peoples from a variety of small-scale and traditional cultures, it humanizes our view of mathematics and expands our conception of what is mathematical. Through engaging examples of how particular societies structure time, reach decisions about the future, make models and maps, systematize relationships, and create intriguing figures, Marcia Ascher demonstrates that traditional cultures have mathematical ideas that are far more substantial and sophisticated than is generally acknowledged. Malagasy divination rituals, for example, rely on complex algebraic algorithms. And some cultures use calendars far more abstract and elegant than our own. Ascher also shows that certain concepts assumed to be universal--that time is a single progression, for instance, or that equality is a static relationship--are not. The Basque notion of

equivalence, for example, is a dynamic and temporal one not adequately captured by the familiar equal sign. Other ideas taken to be the exclusive province of professionally trained Western mathematicians are, in fact, shared by people in many societies. The ideas discussed come from geographically varied cultures, including the Borana and Malagasy of Africa, the Tongans and Marshall Islanders of Oceania, the Tamil of South India, the Basques of Western Europe, and the Balinese and Kodi of Indonesia. This book belongs on the shelves of mathematicians, math students, and math educators, and in the hands of anyone interested in traditional societies or how people think. Illustrating how mathematical ideas play a vital role in diverse human endeavors from navigation to social interaction to religion, it offers--through the vehicle of mathematics--unique cultural encounters to any reader.
