Predict and Surveil Sarah Brayne,2020-10-01 The scope of criminal justice surveillance has expanded rapidly in recent decades. At the same time, the use of big data has spread across a range of fields, including finance, politics, healthcare, and marketing. While law enforcement's use of big data is hotly contested, very little is known about how the police actually use it in daily operations and with what consequences. In Predict and Surveil, Sarah Brayne offers an unprecedented, inside look at how police use big data and new surveillance technologies, leveraging on-the-ground fieldwork with one of the most technologically advanced law enforcement agencies in the world-the Los Angeles Police Department. Drawing on original interviews and ethnographic observations, Brayne examines the causes and consequences of algorithmic control. She reveals how the police use predictive analytics to deploy resources, identify suspects, and conduct investigations; how the adoption of big data analytics transforms police organizational practices; and how the police themselves respond to these new data-intensive practices. Although big data analytics holds potential to reduce bias and increase efficiency, Brayne argues that it also reproduces and deepens existing patterns of social inequality, threatens privacy, and challenges civil liberties. A groundbreaking examination of the growing role of the private sector in public policing, this book challenges the way we think about the data-heavy supervision law enforcement increasingly imposes upon civilians in the name of objectivity, efficiency, and public safety.

Dragnet Nation Julia Angwin,2014-02-25 An inside look at who's watching you, what they know and why it matters. We are being watched. We see online ads from websites we've visited, long after we've moved on to other interests. Our smartphones and cars transmit our location, enabling us to know what's in the neighborhood but also enabling others to track us. And the federal government, we recently learned, has been conducting a massive data-gathering surveillance operation across the Internet and on our phone lines. In Dragnet Nation, award-winning investigative journalist Julia Angwin reports from the front lines of America's surveillance economy, offering a revelatory and unsettling look at how the government, private companies, and even criminals use technology to indiscriminately sweep up vast amounts of our personal data. In a world where we can be watched in our own homes, where we can no longer keep secrets, and where we can be impersonated, financially manipulated, or even placed in a police lineup, Angwin argues that the greatest long-term danger is that we start to internalize the surveillance and censor our words and thoughts, until we lose the very freedom that makes us unique individuals. Appalled at such a prospect, Angwin conducts a series of experiments to try to protect herself, ranging from quitting Google to carrying a burner phone, showing how difficult it is for an average citizen to resist the dragnets' reach. Her book is a cautionary tale for all of us, with profound implications for our values, our society, and our very selves.

Calling All Cars Kathleen Battles,2010 Calling All Cars shows how radio played a key role in an emerging form of policing during the turbulent years of the Depression. Until this time popular culture had characterized the gangster as hero, but radio crime dramas worked against this attitude and were ultimately successful in making heroes out of law enforcement officers.Through close analysis of radio programming of the era and the production of true crime docudramas, Kathleen Battles argues that radio was a significant site for overhauling the dismal public image of policing. However, it was not simply the elevation of the perception of police that was at stake. Using radio, reformers sought to control the symbolic terrain through which citizens encountered the police, and it became a medium to promote a positive meaning and purpose for policing. For example, Battles connects the apprehension of criminals by a dragnet with the idea of using the radio network to both publicize this activity and make it popular with citizens.The first book to systematically address the development of crime dramas during the golden age of radio, Calling All Cars explores an important irony: the intimacy of the newest technology of the time helped create an intimate authority—the police as the appropriate force for control—over the citizenry.

TV's Biggest Hits Jon Burlingame,1996 Everybody loves TV themes - from the silly Mr. Ed and The Addams Family to the intense Mission: Impossible and Peter Gunn to the atmospheric Hill Street Blues and The X-Files. But few people know how this music is made, or the stories of the men and women who have worked tirelessly (and often anonymously) to create it. This book offers the complete story of this important musical style, giving it the serious, and colorfully anecdotal, history it deserves. Divided into chapters on each genre, Burlingame provides the real stories of the composers who worked behind the scenes to create the memorable music we all love. Among those who have written and performed for television include many famous musicians - like jazz pianists Dave Brubeck and Duke Ellington, arranger/producer Quincy Jones, film music giant John Williams, Broadway composer Richard Rodgers, and classical composer Morton Gould. Illustrated throughout with rare photos of the composers at work, this is a fascinating story of how a new genre of musical artistry was created.
