Dragon Puzzle Games Marcus White,2018-09-30 Dragon is a logic puzzle published by Nikoli. A grid is divided into rectangular and square regions. Some of the cells in the grid are numbered. The aim is to blacken some cells of a grid according to the following rules: - Cells with numbers are always white. - A number in a cell indicates how many black cells must be placed adjacent to its four sides. However, in each region there is one (and only one) wrong number (it shows a wrong amount of black cells). - Two black cells must not be orthogonally adjacent. - All of the white cells must be connected.
