But they are harassed by various bells, sirens, buzzers, warblers, beepers and cheepers, all trying to warn them of something. What are these electronic voices trying to tell them? Can they understand the mysterious disasters before disaster strikes? It's a race against time - because there are seven more plays and twenty more characters still to come before the evening is through, plus a lot more strange noises - and increasingly desperate calls from eleven separate pay phones...

**Alarm** Alice Bennett,2022-12-15 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Alarms are alarming. They wake us up, demand our attention and force us to attend to things we've preferred to ignore. But alarms also allow us to feel secure, to sleep and to retreat from alertness. They take over vigilance on our behalf. From the alarm clock and the air-raid siren to the doorbell and the phone alert, the history of alarms is also the history of work, security, technology and emotion. Alarm responds to culture's most urgent calls to attention by examining all

kinds of alarms, from the restless presence of the alarm clock in modernist art to the siren – the sound of the police – in classic hip hop. More than just bells and whistles, alarms are objects that have defined sleeping and waking, safety and danger, and they have fundamentally shaped our understanding of the mind and its capacity for attention. Object Lessons is published in partnership with an essay series in The Atlantic.

**Ancient Aliens on the Moon** Mike Bara, 2012-03-27 Best-selling author and Secret Space Program researcher Bara brings us this

lavishly-illustrated volume on alien structures on the Moon. He looks into the history of lunar anomalies and the early NASA programs. He gives us an examination of ruins on the Moon in the Sinus Medii region using images from the Surveyor, Lunar Orbiter and Ranger missions. He looks at the Apollo lunar missions to the Moon and the photographic evidence supporting the theory that transparent domes exist at the edge of craters on the orb. Did the domes encompass settlements of humans or other beings who lived there? He looks at further anomalies in the Mare Crisium region, including the hexagonal shape of the Crisium region itself. In this area, domes over the craters resemble watch-crystals. See the evidence in pictures of Cleomedes F and Cleomedes F/a, and an historical image of a giant shard of transparent material that was whitewashed from later versions of the same image. Bara discusses the popular theory that the film “2001 –A Space Odyssey” was used as a training ground for Stanley Kubrick to develop the technology to fake the footage of the moon landings. He also explores the curious mission of Apollo 17- possibly a technology salvage mission, primarily concerned with investigating an opening into a massive hexagonal ruin near the landing site. Bara details how the astronauts managed to get nearly 30 minutes of “off camera” time to investigate an entrance into the ruin and then later proceeded to a nearby crater to retrieve technological objects. He examines evidence from the Russian Zond series of lunar probes, as well as the more current Clementine and Lunar Reconnaissance Orbiter data, including an in-depth study of strange objects in Tycho crater. Also included: a look at the current politics of the new race to return to the Moon and what hidden agendas may be behind it. Finally, Bara looks at the various arguments that the entire Moon is an artificial object. Bara shows how the Moon would have

been an ideal place for an alien species involved in genetic experimentation on Earth to have set up a base. 292 Pages. 6x9 Paperback. Illustrated. References. \$19.95. Code: AAOM ISBN: 978-1-935487-85-2 1-935487-85-X
