**Media Today** Joseph Turow, 2016-10-04 Media Today uses convergence as a lens

that puts students at the center of the profound changes in the 21st century media world. Through the convergence lens they learn to think critically about the role of media today and what these changes mean for their lives presently and in the future. The book's media systems approach helps students to look carefully at how media content is created, distributed, and exhibited in the new world that the digital revolution has created. From newspapers to video games and social networking to mobile platforms, Media Today prepares students to live in the digital world of media.

**Modern Vintage Illustration** Martin Dawber, 2012-08-05 A stunning survey of modern illustration that uses older styles of artistic expression to evoke a sense of another time and place. These vintage-style illustrations play with the past, subvert it, on occasion, but always feel fresh. Organized into 12 chapters by historical or cultural period, the book features hundreds of the best examples of modern retro illustration including styles as varied as Constructivist, Dada and Art Nouveau. From work showing the ornamentation of Victorian fonts, the stylized angles of Art Deco, the lines of soviet poster art, the influence of Saul Bass and Blue Note record sleeves to the new slant on photorealism, and the renaissance of punk and comic art. Hundreds of artists from all over the world have contributed to a beautiful, witty and inspiring collection of vintage illustration that will inspire designers, illustrators and artists working today. !--EndFragment--

**Half-Real** Jesper Juul, 2011-08-19 An in-depth analysis of game development and rules and fiction in video games—with concrete examples, including The Legend of Zelda, Grand Theft Auto, and more A video game is half-real: we play by real rules while imagining a fictional world. We win or lose the game in the real world, but we slay a dragon (for example) only in the world of the game. In this thought-provoking study, Jesper Juul examines the constantly evolving tension between rules and fiction in video games. Discussing games from Pong to The Legend of Zelda, from chess to Grand Theft Auto, he shows how video games are both a departure from and a development of traditional non-electronic games. The book combines perspectives from such fields as literary and film theory, computer science, psychology, economic game theory, and game studies, to outline a theory of what video games are, how they work with the player, how they have developed historically, and why they are fun to play. Locating video games in a history of games that goes back to Ancient Egypt, Juul argues that there is a basic affinity between games and computers. Just as the printing press and the cinema have promoted and enabled new kinds of storytelling, computers work as enablers of games, letting us play old games in new ways and allowing for new kinds of games that would not have been possible before computers. Juul presents a classic game model, which describes the traditional construction of games and points to possible future developments. He examines how rules provide challenges, learning, and enjoyment for players, and how a game cues the player into imagining its fictional world. Juul's lively style and eclectic deployment of sources will make Half-Real of interest to media, literature, and game scholars as well as to game professionals and gamers.

*By Invitation Only* Alexis Maybank, Alexandra Wilkis Wilson, 2012-04-12 On a warm September night in 2002, former acquaintances Alexis Maybank and Alexandra Wilkis reconnected at a mixer for new students at Harvard Business School. Alexis had just ended a four-year run at eBay during the dotcom boom and bust. Alexandra had just spent three years as an investment banker at

Merrill Lynch. Now they were entering the country's top training ground for future titans of Wall Street and the Fortune 500. Little did either suspect that five years later, they'd become famous not in finance or consulting or corporate management, but at the bleeding-edge intersection of fashion and technology. Gilt Groupe – launched by Alexis, Alexandra, and three colleagues in 2007 – is one of the most fascinating startups of recent years, with a valuation of more than \$1 billion. And it all began with one bold idea: to bring sample sales online and change the way millions shop. As Alexis and Alexandra write about the day Gilt.com went live: "We had created a website that could potentially change the rules of retail, for both shoppers and brands. If shopping was traditionally a slow, leisurely activity that might consume an entire day, it would now be competitive, addictive, urgent, thrilling—a rush delivered at the same time each day. Shopping would become not just easier, but so much fun." But turning that vision into reality wasn't easy. Designers had long controlled their own sample sales by staging them in anonymous, makeshift locations and strictly limiting invitations. Those lucky enough to hear about a Marc Jacobs or Hermès sample sale would drop everything and run for dramatic, fleeting bargains. Why should elite brands support a new startup trying to replicate the experience online? And even if brands like Valentino, Christian Louboutin, and Zac Posen got on board, would shoppers embrace such a website? Would the kind of people who love high-end fashion really visit a new online sale each day? Was "accessible luxury" a breakthrough idea or an absurd oxymoron? Alexis and Alexandra share their perspective in this dramatic story of Gilt's birth, rise, and evolution. They show how they juggled the conflicting needs of their suppliers, engineers, marketers, and potential investors. They explain how they blended their individual strengths and weaknesses and managed their rapidly growing team. They cover the growing pains of expanding into new categories like housewares, travel, and menswear. And they take us through the darkest moments of the recession when Gilt might easily have died. As you'll learn from the true story of Gilt, anything is possible for those with the creativity to recognize a new opportunity and the perseverance to make it real.

Making is Connecting David Gauntlett,2013-04-29 In Making is Connecting, David Gauntlett argues that, through making things, people engage with the world and create connections with each other. Both online and offline, we see that people want to make their mark on the world, and to make connections. During the previous century, the production of culture became dominated by professional elite producers. But today, a vast array of people are making and sharing their own ideas, videos and other creative material online, as well as engaging in real-world crafts, art projects and hands-on experiences. Gauntlett argues that we are seeing a shift from a 'sit-back-and-be-told culture' to a 'making-and-doing culture'. People are rejecting traditional teaching and television, and making their own learning and entertainment instead. Drawing on evidence from psychology, politics, philosophy and economics, he shows how this shift is necessary and essential for the happiness and survival of modern societies.

The Game of Work Charles A. Coonradt, Lee Nelson, 2007 Since its original printing in 1984, *The Game of Work* helped thousands of companies and hundreds of thousands of managers and employees experience increased job enjoyment while producing extraordinary results. *The Game of Work* examines the question of why people work harder at sports and recreation than they do on the job and uses these as metaphors for inspirational leadership strategies. Corporations worldwide have enjoyed the increased productivity, employee satisfaction and motivation, and bottom-line profits by implementing the concepts taught in *The Game of Work*. As qualified people become increasingly difficult to attract and retain, the implementation of the five principles in this book is the one key factor to improving results, retention, and recruitment. Five principles of *The Game of Work*: Frequent feedback; Better scorekeeping; Clearly defined goals; Consistent coaching; A higher degree of personal choice.

Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." *Warhol-isms* separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

*Gaming at the Edge* Adrienne Shaw, 2015-01-01 Video games have long been seen as the exclusive territory of young, heterosexual white males. In a media landscape dominated by such gamers, players who do not fit this mold, including women, people of color, and LGBT people, are often brutalized in forums and in public channels in online play. Discussion of representation of such groups in games has frequently been limited and cursory. In contrast, *Gaming at the Edge* builds on feminist, queer, and postcolonial theories of identity and draws on qualitative audience research methods to make sense of how representation comes to matter. In *Gaming at the Edge*, Adrienne Shaw argues that video game players experience race, gender, and sexuality concurrently. She asks: How do players identify with characters? How do they separate identification and interactivity? What is the role of fantasy in representation? What is the importance of understanding market logic? In addressing these questions Shaw reveals how representation comes to matter to participants and offers a perceptive consideration of the high stakes in politics of representation debates. Putting forth a framework for talking about representation, difference, and diversity in an era in which user-generated content, individualized media consumption, and the blurring of producer/consumer roles has lessened the utility of traditional models of media representation analysis, Shaw finds new insight on the edge of media consumption with the invisible, marginalized gamers who are surprising in both their numbers and their influence in mainstream gamer culture.
