Free-Hand Drawing Anson K. Cross,2024-01-10 DRAWING is the expression of an idea: Art must come from within, and not from without. This fact has led some to assert that the study of nature is not essential to the student, and that careful training in the study of the representation of the actual appearance is mechanical and harmful. Such persons forget that all art ideas and sentiments must be based upon natural objects, and that a person who cannot represent truly what he sees will be entirely unable to express the simplest ideal conceptions so that others may appreciate them. Study of nature is, then, of the first and greatest importance to the art student.A drawing may be made in outline, in light and shade, or in color. The value of the drawing artistically does not depend upon the medium used, but upon the individuality of the draughtsman making it. The simplest pencil sketch may have much more merit than an elaborate colored drawing made by one who is unable to represent truly the facts of nature, or who sees, instead of the beauty and poetry, the ugliness and the imperfections of the subject.OBJECTS FOR STUDY:We hear a great deal now about the cultivation of the sense of beauty by the choice of drawing models. Many go so far as to say that nothing but the most beautiful forms should be given from the start, and, asserting that the cube, cylinder,and other type forms are not beautiful, they say that they should not be used, but that beautiful variations of these type forms should be provided. More definite information than this is rarely given. We are not told what natural objects are beautiful, and cheap enough to be provided, or how these objects of beauty are to be obtained, if they are not provided by the city. Such advice as to the use of beautiful models must be very pleasant and valuable to the drawing teacher, who so often fails to secure the money necessary to provide the cheap wooden models costing a few cents each ; and we do not wonder that special and regular teachers often regard this subject as one having no standards and no authorities.Much of all this commotion about beautiful objects of study is raised by those who, suffering from criticism, have in the desire to escape it plunged headlong from one set of mechanical rules for a series of lessons for the public schools, to another set less arbitrary in certain directions, but still mechanical, and if possible, more harmful than before, because attempting more.The average teacher can readily learn to discover at a glance whether or not the drawing of a cube represents the object as it might appear. She can do this even without seeing the model from the pupil's position; and the student can compare his drawing with the object and discover its errors more easily than he can in the drawing of a cast, a leaf, a figure,or any other object of beauty, in which the beauty depends upon lines which are subtle and which require a trained eye to see at all truly.

**DRAWING & PAINTING COURSE VOLUME - II (FREE Watercolours & Paintbrush)** PROSENJIT,2015-01-06 We believe everyone can draw and paint. With this belief in mind, we already published Drawing and Painting Course for children who want to learn and master the art in a fun way. This book starts with the basics - lines, shades, texture, balance, harmony, rhythm, tone, colours, etc., and goes on to teach the various different techniques of drawing and painting with step-by-step instructions, accompanied by an audio visual CD. Considering the overwhelming appreciation by readers for Drawing and Painting Course, V&S Publishers yet again has come up with another amazing book for art lovers, Drawing and Painting Course Valume II. This comprehensive manual for beginners of visual art and serious amateurs as well, presents basic instructions in all traditional

art. With these skills mastered, students can enjoy more advanced instruction on markers, acrylics, gouache, collages, and more complicated brushwork.

*Free Hand Drawing and Designing (Classic Reprint)* Max Kushlan,2015-07-06 Excerpt from Free Hand Drawing and Designing One of the greatest requirements of the modern engineer is to be able to make rapid neat sketches freehand, i. e. without the use of any drafting instruments, but simply by employing a well sharpened soft pencil and an eraser. There are many cases in the daily practice of every engineer from the lowest to the highest ranks, when they are called upon to make a free-hand sketch of a job, and in some cases this rough sketch remains later the only available record of the condition of the job before any changes took place. It is therefore important to have such sketches done as neatly and accurately as possible so that they would convey the correct idea to the draftsman or to the man who is to carry out the particular work represented by such sketches. There are two principal kinds of sketches employed in describing engineering work: the actual picture of the job, as it appears to the eye; and the orthographic projection of the object in the three principal planes, but drawn roughly without the aid of instruments and not to correct scale. We will endeavor in the following chapters to cover the principles of both types of sketching, beginning with the simplest objects first and then leading up to the free-hand drawing of more or less complicated parts of machinery.
