Michael Tobias

Index of American Periodical Verse ,1996

A Vision of Nature Michael Tobias,1995 Tobias examines the ancient cultures of the Mediterranean, the ascetics of Sinai and Tibet, and the Pure Land Buddhists. He introduces the reader to the Jains of India, whose lifestyle is one of the most ecologically balanced in all of human history. In profiling various artists of 19th-century Europe and America, Tobias discovers incisive continuities among such luminaries as British poet Percy Bysshe Shelley, Austrian impressionist Emilie Mediz-Pelikan, and American intimist painters Ralph Blakelock and George Inness.

Electronic Processes in Organic Crystals and Polymers Martin Pope,Charles E. Swenberg,1999 The first edition of Pope and Swenberg's Electronic Processes of Organic Crystals, published in 1982, became the classic reference in the field. It provided a tutorial on the experimental and related theoretical properties of aromatic hydrocarbon crystals and included emerging work on polymersand superconductivity. This new edition contains the complete text of the first edition, plus an extensive new section, comprising nearly half of the book, which covers recent developments and applications with polymers. The book provides a unified description of what is known in almost every aspectof the field, from basic phenomena to the latest practical applications, which include LED's, photocopiers, photoconductors, batteries, transistors, liquid crystals, photorefractive devices, and sensors.

21st Century Nanoscience Klaus D. Sattler,2022-01-18 This 21st Century Nanoscience Handbook will be the most comprehensive, up-to-date large reference work for the field of nanoscience. Handbook of Nanophysics, by the same editor, published in the fall of 2010, was embraced as the first comprehensive reference to consider both fundamental and applied aspects of nanophysics. This follow-up project has been conceived as a necessary expansion and full update that considers the significant advances made in the field since 2010. It goes well beyond the physics as warranted by recent developments in the field. Key Features: Provides the most comprehensive, up-to-date large reference work for the field. Chapters written by international experts in the field. Emphasises presentation and real results and applications. This handbook distinguishes itself from other works by its breadth of coverage, readability and timely topics. The intended readership is very broad, from students and instructors to engineers, physicists, chemists, biologists, biomedical researchers, industry professionals, governmental scientists, and others whose work is impacted by nanotechnology. It will be an indispensable resource in academic, government, and industry libraries worldwide. The fields impacted by nanoscience extend from materials science and engineering to biotechnology, biomedical engineering, medicine, electrical engineering, pharmaceutical science, computer technology, aerospace engineering, mechanical engineering, food science, and beyond.

China and International Fisheries Law and Policy Guifang Xue,2005 This book deals with China's response to international fisheries law and policy as envisaged in the LOSC framework and post-LOSC fisheries instruments. As the first monograph of its kind dealing with the complex issue of the global fisheries crisis and China's fisheries management practice over a significant period of time, the book builds a bridge between China and the world for a better understanding of Chinese fisheries management. It will be of great value to academics, professionals, and policy-makers alike.

Just Like This Cole McCade,2020-11-24 Two teachers at odds at an elite boys academy must bury the hatchet to help a student in this contemporary gay romance by the author of Just Like That. Rian Falwell has a problem. And his name is Damon Louis. Rian’s life as the art teacher to a gaggle of displaced boys at Albin Academy should be smooth sailing—until the stubborn, grouchy football coach comes into his world like a lightning strike and ignites a heated conflict that would leave them sworn enemies if not for a common goal. A student in peril. A troubling secret. And two men who are polar opposites but must work together to protect their charges. They shouldn’t want each other. They shouldn’t even like each other. Yet as they fight to save a young man from the edge, they discover more than they thought possible about each other—and about themselves. In the space between hatred, they find love. And the lives they have always wanted . . . Just like this. Praise for Just Like This “Scorching. . . . Achingly emotional sex scenes. The leads’ volatile emotions and the elusive mystery make for an un-put-downable gay romance.” —Publishers Weekly

Japanese Ink Painting Naomi Okamoto,1996 A guide to Japanese ink painting provides information on techniques and materials needed, along with step-by-step exercises.

Advances in X-Ray Analysis Charles Barrett,2013-06-29 The application of solid-state detectors of high energy resolution to x-ray spectrometry, and the increasing use of compu ters in both measurement and data evaluation, are giving a new stimulus to x-ray techniques in analytical chemistry. The Twentieth Annual Denver X-ray Conference reflects this renewed interest in several ways. The invited papers, grouped in Session I, review the characteristics of the detectors used in the measurement of x-rays. One paper is dedicated to the detection of single ions. Although such a subject may appear to be marginal to the purposes of the Denver Conference, we must recognize the affinity of techniques applied to similar purposes. Ion probe mass spectrometry is dedicated to tasks similar to those performed by x-ray spectrometry with the electron probe microanalyzer. Scientists and technologists will see these two techniques discussed in the same meetings. The discussion of automation and programming is not limited to the two invited speakers, but extends to papers presented in more than one session. The matter of fluorescence analysis by isotope- and tube-excitation will also be of great interest to those concerned with the practical applications of x-ray techniques. The communications contained in this volume, and the lively discussions which frequently followed the presentation of papers, attest to the vitality of the subjects which are the concern of the Annual Denver X-ray Conference.

International Law and Sustainable Development Alan E. Boyle,David Freestone,2001 International Law and Sustainable Development: Past Achievements and Future Challenges is a collection of essays that cover some of the most

important contemporary issues in contemporary law relating to sustainable development, the utilization of natural resources, and the protection of the environment. Written by well-known experts on these topics who include judges of the International Court of Justice and the International Tribunal for the Law of the Sea; legal advisers from international organizations such as the World Bank, the International Maritime Organization, and the Food and Agriculture Organization; and practitioners of international law, as well as some of the leading scholars writing on international environmental law and related subjects this book covers many of the major legal developments that have taken place since the United Nations Conference on Environmental Development held in Rio de Janeiro in 1992. The contributors bring new perspectives on sustainable development as a legal principle, the role of the International Law Commission in codifying international environmental law, the protection of the marine environment following the entry into force of the 1982 UN Convention of the Law of the Sea, and the revolution in international fisheries law. The editors have ensured that the book covers a wide range of topics from Antarctica to small whales and the book will be of particular interest to those teaching or practising law of the sea and international environmental law.

Materials Modification by Electronic Excitation Noriaki Itoh, Marshall Stoneham, 2001 Electronic excitation is a means to change materials properties. This book analyses the important features of the changes induced by electronic excitation, identifies what is critical, and provides a basis from which materials modification can be developed successfully. Electronic excitation by lasers or electron beams can change the properties of materials. In the last few years, there has been a mix of basic science, of new laser and electron beam tools, and of new needs from microelectronics, photonics and nanotechnology. This book extends and synthesises the science, addressing ideas like energy localisation and charge localisation, with detailed comparisons of experiment and theory. It also identifies the ways this understanding links to technological needs, like selective removal of material, controlled changes, altering the balance between process steps, and possibilities of quantum control. This book will be of particular interest to research workers in physics, chemistry, electronic engineering and materials science.

Radioactive Waste Management ,1981

Marine Specially Protected Area: The General Aspects and the Mediterranean Regional System Tullio Scovazzi, 1999-01-01 In the last few years several States have established specially protected marine areas under their domestic legislation. At the international level the trend towards providing an increased protection to certain marine spaces has also been reflected in a number of treaties and declarations. This volume reviews the recent developments in the field of specially protected marine areas and preservation of the marine environment in general with particular emphasis on a specific region, the Mediterranean Sea. Special attention is devoted to the latter for three reasons. First, the regional framework for the protection of the environment in the Mediterranean (the so-called Barcelona system) has recently been updated and strengthened. Second, the Mediterranean is a typical example of the category of semi-enclosed seas where international cooperation between the bordering States should be particularly encouraged in various fields; this also explains why the scope of this book has been enlarged to also cover fisheries, a field which is closely connected to the sustainable development of marine areas. Last and not least, the parochial inclination of the editor also influenced his choice. To complete the picture the relevant texts have been reproduced and a series of maps showing some specially protected marine areas have been drawn.
