Quit Smoking with Self-Hypnosis Michael Cox, Roan Sebi, 2021-06-24 Would you like to quit smoking for good but can't even imagine going again through the trauma of withdrawal or relapse? If the answer is yes, smile because as you continue reading, you will finally find the solution you've been longing for. Electronic cigarettes, nicotine patches, nicotine chewing gum, gradual reduction of cigarettes, willpower; you tried everything, but nothing has worked to quit smoking. Why? It's not your fault, nor should you blame yourself for previous unsuccessful attempts. It's because all these methods don't work deeply enough; they don't reach your mind. In fact, it's from the mind that your desire to smoke starts, and if you don't turn off the button that orders you to do it, nothing will ever work. That's where hypnosis comes in. Forget those TV stage tricks that have damaged the public image of hypnosis. Here we are talking about a scientific method successfully used in treating a wide variety of conditions, such as anxiety, pain, depression, and of course, smoking addiction. A 2018 study published in the Journal of Global Oncology showed that 80% of a sample of smokers undergoing hypnosis interrupted tobacco dependence and avoided relapse. It is a very high success rate compared with all the existing quit smoking methods. The reason is that hypnosis can transform the cognitive system, allowing smokers to naturally stop their smoking cravings. In other words, you won't have to worry about quitting smoking anymore because you simply will find it unattractive. Once you have reprogrammed your mind along the lines of a non-smoker, the effects associated with nicotine withdrawal may still occur in the early days. What you need to do then is simply keep listening. In fact, the second part of the book contains methods based on hypnosis and guided meditation to help you: - Free yourself from stress and anxiety - Overcome insomnia - Control your weight or even lose weight. Please Note. This method is: ● 80% Effective: It doesn't matter if you've tried everything before and nothing has worked. And it doesn't matter if you think you're immune to self-hypnosis. Nobody is. If you want to be part of the 80%, the only thing that matters is that you are sincerely determined to quit smoking for good. ● 100% Easy: Just listen to the hypnotic audios like a podcast for a few minutes a day to quit smoking. You don't have to struggle. ● 100% Natural: Self-hypnosis is the most natural and safest way to quit smoking. And it's without contraindications. ● 100% Healthy: This is the only smoking cessation method that improves your health with a 360 degrees approach. It also allows you to reach your ideal weight, makes you sleep better, and improves your mood. Quit smoking can be a great opportunity to significantly improve your life quality and make your loved ones proud of you. Do it before it's too late. Start Listening to These Audios Now.
