The Hand Marta Bertolaso,Nicola Di Stefano,2017-09-22 Drawing on shared research experiences and

collaborative projects, this book offers a broad and timely perspective on research on the hand and its current challenges. It especially emphasizes the interdisciplinary context in which researchers need to be trained in contemporary science. From language to psychology, from neurology to the social sciences, and from art to philosophy and religion, the chapters discuss various aspects involved in hand research and therapy. On the basis of concrete and validated case studies, they approach hand function and gestures from different perspectives – not only neurological and medical, but also philosophical, evolutionary and anthropological. By highlighting the overlaps between different areas of research, the book seeks to foster better communication between researchers, and ultimately a better understanding of hand function and its recovery. It offers essential information and inspirations for students, researchers and practitioners in the fields of psychology, epistemology, bioengineering, neuroscience, anthropology and bioethics.

Internet Multimedia Communications Using SIP Rogelio Martinez Perea, 2008-02-27 Session Initiation Protocol (SIP) was conceived in 1996 as a signaling protocol for inviting users to multimedia conferences. With this development, the next big Internet revolution silently started. That was the revolution which would end up converting the Internet into a total communication system which would allow people to talk to each other, see each other, work collaboratively or send messages in real time. Internet telephony and, in general, Internet multimedia, is the new revolution today and SIP is the key protocol which allows this revolution to grow. The book explains, in tutorial fashion, the underlying technologies that enable real-time IP multimedia communication services in the Internet (voice, video, presence, instant messaging, online picture sharing, white-boarding, etc). Focus is on session initiation protocol (SIP) but also covers session description protocol (SDP), Real-time transport protocol (RTP), and message session relay protocol

(MSRP). In addition, it will also touch on other application-related protocols and refer to the latest research work in IETF and 3GPP about these topics. (3GPP stands for third-generation partnership project which is a collaboration agreement between ETSI (Europe), ARIB/TTC (Japan), CCSA (China), ATIS (North America) and TTA (South Korea).) The book includes discussion of leading edge theory (which is key to really understanding the technology) accompanied by Java examples that illustrate the theoretical concepts. Throughout the book, in addition to the code snippets, the reader is guided to build a simple but functional IP soft-phone therefore demonstrating the theory with practical examples. This book covers IP multimedia from both a theoretical and practical point of view focusing on letting the reader understand the concepts and put them into practice using Java. It includes lots of drawings, protocol diagrams, UML sequence diagrams and code snippets that allow the reader to rapidly understand the concepts. Focus on HOW multimedia communications over the Internet works to allow readers to really understand and implement the technology Explains how SIP works, including many programming examples so the reader can understand abstract concepts like SIP dialogs, SIP transactions, etc. It is not focused on just VoIP. It looks At a wide array of enhanced communication services related to SIP enabling the reader put this technology into practice. Includes nearly 100 references to the latest standards and working group activities in the IETF, bringing the reader completely up to date. Provides a step-by-step tutorial on how to build a basic, though functional, IP soft-phone allowing the reader to put concepts into practice. For advanced readers, the book also explains how to build a SIP proxy and a SIP registrar to enhance one's expertise and marketability in this fast moving area.

The Marcus Garvey and Universal Negro Improvement Association Papers, Vol. I Marcus

Garvey, 2023-09-01 Marcus Mosiah Garvey (1887- 1940) led an extraordinary mass movement of black social protest. His Universal Negro Improvement Association and his back to African program of racial nationalism introduced many ideas that emerged again during the Black Power years of the 1960s: pride in black roots, pride in black physical features and African culture, and rejection of assimilation into white America. Yet the charismatic black Jamaican who roared his credo before huge audiences on the street corners of Harlem remains an enigma. His image as an honest idealist urging blacks to build their own nation has been clouded by accusations that he was a con man who, in the name of black pride, perpetrated one of history's greatest swindles. The Marcus Garvey And Universal Negro Improvement Association Papers clarifies the Garvey phenomenon. This is the first volume in a monumental ten-volume survey of thirty thousand archival documents and original manuscripts from widely separated sources, brought together by editor Robert A. Hill to provide a compelling picture of the evolution, spread, and influence of the UNIA. Letters, pamphlets, vital records, intelligence reports, newspaper articles, speeches, legal records, and diplomatic dispatches are enhanced by Hill's descriptive source notes, explanatory footnotes, and comprehensive introduction. Of the over three hundred items included in Volume I, only very few have ever been published or reprinted before. Volume I begins with the earliest mentions in 1826 of the Garvey family in Jamaica's slave records, and closes with Garvey's triumphant address at Carnegie Hall on August 25, 1919. The information is fascinating and often startling, tracing Garvey's early career in Jamaica, Central America, Europe, and the United States, and detailing the first stirrings of what was to become an

international mass movement. Hill presents complete documentation of the first official surveillance of the UNIA, which prepared the way for the beginning of the criminal and civil litigation that engulfed Garvey and his movement, as American and European governments reacted to the perceived threat with repressive policies. The documents also record the internal structure and political splits during the early years of the UNIA, and provide the financial history of Garvey's controversial Black Star Line steamship venture, one of the schemes that ultimately led to the financial collapse of his movement. The first volume and the following five focus on America, the seventh and eighth on Africa, and the last two on the Caribbean. The information Hill has compiled goes far beyond preoccupation with a single intriguing historical figure to document the growth and demise of a mass social phenomenon, an Afro-American protest movement with strong links to African and Caribbean nationalism in the first decades of the twentieth century.
