Critical Musicological Reflections Stan Hawkins, 2016-04-22 This collection of original essays is in tribute to the work of Derek Scott on the occasion of his sixtieth birthday. As one of the leading lights in Critical Musicology, Scott has helped shape the epistemological direction for music research since the late 1980s. There is no doubt that the path taken by the critical musicologist has been a tricky one, leading to new conceptions, interactions, and heated debates during the past two decades. Changes in musicology during the closing decades of the twentieth century prompted the establishment of new sets of theoretical methods that probed at the social and cultural relevance of music, as much as its self-referentiality. All the scholars contributing to this book have played a role in the general paradigmatic shift that ensued in the wake of Kerman's call for change in the 1980s. Setting out to address a range of approaches to theorizing music and promulgating modes of analysis across a wide range of repertoires, the essays in this collection can be read as a coming of age of critical musicology through its active dialogue with other disciplines such as sociology, feminism, ethnomusicology, history, anthropology, philosophy, cultural studies, aesthetics, media studies, film music studies, and gender studies. The volume provides music researchers and graduate students with an up-to-date authoritative reference to all matters dealing with the state of critical musicology today.

Life Writing in the Anthropocene Jessica White, Gillian Whitlock, 2021-05-27 Life Writing in the Anthropocene is a collection of timely and original approaches to the question of what constitutes a life, how that life is narrated, and what lives matter in autobiography studies in the Anthropocene. This era is characterised by the geoengineering impact of humans, which is shaping the planet's biophysical systems through the combustion of fossil fuels, production of carbon, unprecedented population growth, and mass extinction. These developments threaten the rights of humans and other-than-humans to just and sustainable lives. In exploring ways of representing life in the Anthropocene, this work articulates innovative literary forms such as ecobiography (the representation of a human subject's entwinement with their environment), phytography (writing the lives of plants), and ethological poetics (the study of nonhuman poetic forms), providing scholars and writers with innovative tools to think and write about our strange new world. In particular, its recognition on plant life reminds us of how human lives are entwined with vegetal lives. The creative and critical essays in this book, shaped by a number of Antipodean authors, bear witness to a multitude of lives and deaths. The chapters in this book were originally published as a special issue of a/b: Auto/Biography Studies.

Mount Misery Samuel Shem, 2012-02-29 From the *Laws of Mount Misery*: There are no laws in psychiatry. Now, from the author of the riotous, moving, bestselling classic, *The House of God*, comes a lacerating and brilliant novel of doctors and patients in a psychiatric hospital. *Mount Misery* is a prestigious facility set in the rolling green hills of New England, its country club atmosphere maintained by generous corporate contributions. Dr. Roy Basch (hero of *The House of God*) is lucky enough to train there *only to discover doctors caught up in the circus of competing psychiatric theories, and patients who are often there for one main reason: they've got good insurance. From the *Laws of Mount Misery*: Your colleagues will hurt you more than your patients. On rounds at *Mount Misery*, it's not always easy for Basch to tell the patients from the doctors: Errol Cabot, the drug cowboy whose practice provides him with guinea pigs for his imaginative prescription cocktails . . . Blair Heiler, the world expert on borderlines (a diagnosis that applies to just about everybody) . . . A. K. Lowell, née Aliyah K. Lowenschteiner, whose Freudian analytic technique is so razor sharp it prohibits her from actually speaking to patients . . . And Schlomo Dove, the loony, outlandish shrink accused of having sex with a beautiful, well-to-do female patient. From the *Laws of Mount Misery*:

Psychiatrists specialize in their defects. For Basch the practice of psychiatry soon becomes a nightmare in which psychiatrists compete with one another to find the best ways to reduce human beings to blubbering drug-addled pods, or incite them to an extreme where excessive rage is the only rational response, or tie them up in Freudian knots. And all the while, the doctors seem less interested in their patients' mental health than in a host of other things *managed care insurance money, drug company research grants and kickbacks, and their own professional advancement. From the Laws of Mount Misery: In psychiatry, first comes treatment, then comes diagnosis. What The House of God did for doctoring the body, Mount Misery does for doctoring the mind. A practicing psychiatrist, Samuel Shem brings vivid authenticity and extraordinary storytelling gifts to this long-awaited sequel, to create a novel that is laugh-out-loud hilarious, terrifying, and provocative. Filled with biting irony and a wonderful sense of the absurd, Mount Misery tells you everything you'll never learn in therapy. And it's a hell of a lot funnier.

Animals, Plants and Afterimages Valérie Bienvenue,Nicholas Chare,2022-03-11 The sixth mass extinction or Anthropocene extinction is one of the most pervasive issues of our time. *Animals, Plants and Afterimages* brings together leading scholars in the humanities and life sciences to explore how extinct species are represented in art and visual culture, with a special emphasis on museums. Engaging with celebrated cases of vanished species such as the quagga and the thylacine as well as less well-known examples of animals and plants, these essays explore how representations of recent and ancient extinctions help advance scientific understanding and speak to contemporary ecological and environmental concerns.
