The Producer as Composer Virgil Moorefield, 2010-02-26
The evolution of the record producer from organizer to auteur, from Phil Spector and George Martin to the rise of hip-hop and remixing. In the 1960s, rock and pop music recording questioned the convention that recordings should recreate the illusion of a concert hall setting. The Wall of Sound that Phil Spector built behind various artists and the intricate eclecticism of George Martin's recordings of the Beatles did not resemble live performances—in the Albert Hall or elsewhere—but instead created a new sonic world. The role of the record producer, writes Virgil Moorefield in *The Producer as Composer*, was evolving from that of organizer to auteur; band members became actors in what Frank Zappa called a movie for your ears. In rock and pop, in the absence of a notated score, the recorded version of a song—created by the producer in collaboration with the musicians—became the definitive version. Moorefield, a musician and producer himself, traces this evolution with detailed

discussions of works by producers and producer-musicians including Spector and Martin, Brian Eno, Bill Laswell, Trent Reznor, Quincy Jones, and the Chemical Brothers. Underlying the transformation, Moorefield writes, is technological development: new techniques—tape editing, overdubbing, compression—and, in the last ten years, inexpensive digital recording equipment that allows artists to become their own producers. What began when rock and pop producers reinvented themselves in the 1960s has continued; Moorefield describes the importance of disco, hip-hop, remixing, and other forms of electronic music production in shaping the sound of contemporary pop. He discusses the making of *Pet Sounds* and the production of tracks by Public Enemy with equal discernment, drawing on his own years of studio experience. Much has been written about rock and pop in the last 35 years, but hardly any of it deals with what is actually heard in a given pop song. *The Producer as Composer* tries to unravel the mystery of good pop: why does it sound the way it does?

Digital Signatures Ragnhild Brøvig, Anne Danielsen, 2016-02-19 How sonically distinctive digital “signatures”—including reverb, glitches, and autotuning—affect the aesthetics of popular music, analyzed in works by Prince, Lady Gaga, and others. Is digital production killing the soul of music? Is Auto-Tune the nadir of creative expression? Digital technology has changed not only how music is produced, distributed, and consumed but also—equally important but not often considered—how music sounds. In this book, Ragnhild Brøvig-Hanssen and Anne Danielsen examine the impact of digitization on the aesthetics of popular music. They investigate sonically distinctive “digital signatures”—musical moments when the use of digital technology is revealed to the listener. The particular signatures of digital mediation they examine include digital reverb and delay, MIDI and sampling, digital silence, the virtual cut-and-paste tool, digital glitches, microrhythmic manipulation, and autotuning—all of which they analyze in specific works by popular artists. Combining technical and historical knowledge of music production with musical analyses, aesthetic interpretations, and theoretical discussions, Brøvig-Hanssen and Danielsen offer unique insights into how digitization has changed the sound of popular music and the listener's experience of it. For example, they show how digital reverb and delay have allowed experimentation with spatiality by analyzing Kate Bush's “Get Out of My House”; they examine the contrast between digital silence and the low-tech noises of tape hiss or vinyl crackle in Portishead's “Stranger”; and they describe the development of Auto-Tune—at first a tool for pitch correction—into an artistic effect, citing work by various hip-hop artists, Bon Iver, and Lady Gaga.

Any Sound You Can Imagine Paul Théberge, 1997-06-23 Describes digital musical instruments, industries that supply and promote them, and the meanings they have for musicians. Winner of the International Association for the Study of Popular Music (IASPM) Book Award (1997) Recent innovations in musical instrument design are not simply a response to the needs of musicians, writes Paul Théberge; they also have become a driving force with which musicians must contend. He argues that digital synthesizers, samplers, and sequencers in studio production and in the home have caused musicians to rely increasingly on manufacturers for both the instruments themselves as well as the very sounds and musical patterns that they use to make music. Musical practices have thus become allied with a new type of consumer practice that is altogether different from earlier relationships between musicians and their instruments as a

means of production. Théberge places these developments within a broad social and historical perspective that examines the development of the musical instrument industry, particularly the piano industry, the economic and cultural role of musicians' magazines and computer networks, and the fundamental relationships between musical concepts, styles, and technology.

Assessing their aesthetic qualities by focusing on technical advances in 1970s and 80s music, and later in art and media, the author argues that 'Remix' punches above its deemed cultural weight.
