**Can Music Make You Sick?** Sally Anne Gross,George Musgrave,2020-09-29 "Musicians often pay a high price for sharing their art with us. Underneath the glow of success can often lie loneliness and exhaustion, not to mention the basic struggles of

paying the rent or buying food. Sally Anne Gross and George Musgrave raise important questions – and we need to listen to what the musicians have to tell us about their working conditions and their mental health.” Emma Warren (Music Journalist and Author). “Singing is crying for grown-ups. To create great songs or play them with meaning music's creators reach far into emotion and fragility seeking the communion we demand of it. However, music's toll on musicians can leave deep scars. In this important book, Sally Anne Gross and George Musgrave investigate the relationship between the wellbeing music brings to society and the wellbeing of those who create. It's a much needed reality check, deglamorising the romantic image of the tortured artist.” Crispin Hunt (Multi-Platinum Songwriter/Record Producer, Chair of the Ivors Academy). It is often assumed that creative people are prone to psychological instability, and that this explains apparent associations between cultural production and mental health problems. In their detailed study of recording and performing artists in the British music industry, Sally Anne Gross and George Musgrave turn this view on its head. By listening to how musicians understand and experience their working lives, this book proposes that whilst making music is therapeutic, making a career from music can be traumatic. The authors show how careers based on an all-consuming passion have become more insecure and devalued. Artistic merit and intimate, often painful, self-disclosures are the subject of unremitting scrutiny and data metrics. Personal relationships

and social support networks are increasingly bound up with calculative transactions. Drawing on original empirical research and a wide-ranging survey of scholarship from across the social sciences, their findings will be provocative for future research on mental health, wellbeing and working conditions in the music industries and across the creative economy. Going beyond self-help strategies, they challenge the industry to make transformative structural change. Until then, the book provides an invaluable guide for anyone currently making their career in music, as well as those tasked with training and educating the next generation.

Interaction may occur in real time, but not necessarily in shared physical spaces with others. The first section looks at fan perspectives, digital technology and the jouissance of live music and music festival fans. **Timbre** Isabella Van Elferen, 2020-11-12 Timbre is among the most important and the most elusive aspects of music. Visceral and immediate in its sonic properties, yet also considered sublime and ineffable, timbre finds itself caught up in metaphors: tone “color”, “wet” acoustics, or in Schoenberg's words, “the illusory stuff of our dreams.” This multi-disciplinary approach to

timbre assesses the acoustic, corporeal, performative, and aesthetic dimensions of tone color in Western music practice and philosophy. It develops a new theorization of timbre and its crucial role in the epistemology of musical materialism through a vital materialist aesthetics in which conventional binaries and dualisms are superseded by a vibrant continuum. As the aesthetic and epistemological questions foregrounded by timbre are not restricted to isolated periods in music history or individual genres, but have pervaded Western musical aesthetics since early Modernity, the book discusses musical examples taken from both “classical” and “popular” music. These range, in “classical” music, from the Middle Ages through the Baroque, the belcanto opera and electronic music to saturated music; and, in “popular” music, from indie through soul and ballad to dark industrial.

Drawing from diverse disciplines, this volume offers critical perspectives on these changes, covering politics, religion, gender dynamics, human rights, media, literature, and music. What ultimately has changed in "the new Middle East"? Who are the actors pushing the direction of change? How are aspirations for change being expressed through media and the arts?
