Integrated Project Delivery for Building Infrastructure Opportunities Howard McKew,2023-12-12 This book examines in great detail the D-B and IPD methods, while touching on D-B-B and CM project deliveries. In this vein, the discussion regarding IPD is a variation from ASHRAE Technical Committee TC 7.1, Integrated Building Design (IBD), with the focus herein on HVAC-Led IPD Opportunities by consulting engineers and mechanical contractors. This IPD variation is also described later in the book as a 21st-century version of what was 20th-century D-B project delivery although D-B project delivery is still widely used.

Residential Duct Systems - Manual D Acca,Hank Rutkowski,2017-02 The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractorsof America procedure for sizing residential duct systems. This procedureuses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads todetermine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacture's blower performance tables). This assures that appropriate airflow is delivered toall rooms and spaces; and that system airflow is compatible with the operatingrange of primary equipment. The capabilities and sensitivities of this procedureare compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or avariable-speed blower (ECM or constant torque motor, or a true variable speed motor).Edition Three, Version 2.50 of Manual D (D3) specifically identifiesnormative requirements, and specifically identifies related informative material.
