Birthing Sylvie Donna, 2010-10 A book for pregnant women who would prefer to give birth with as little intervention as possible, so as to make things as good as possible for both themselves and their babies. The 'countdown' takes the reader through 10 key topics, and all discussion of issues is supplemented with birth stories and comments from all kinds of women and professionals too. The tone is practical, reassuring and even inspirational because the many positive birth stories show how it's possible to have a really happy, healthy experience of birth. Contributions come from Janet Balaskas (the woman who realised we're better off not lying down when we give birth!), Michel Odent (pioneer of water births) and Bill Bryson (the travel writer)... as well as from many other experts and 'ordinary' but extraordinary mothers, who made this book possible. The advice is based on current research evidence and in any cases where the evidence is controversial the research and relevant issues are discussed in an optional extra 'notes' section at the back

of the book. There is a comprehensive Glossary of pregnancy terms and a user-friendly Index, so as to make it an optimally useful book in all sense of the word. In short, this is a handbook which could make a real difference to a pregnant woman's experience and also to that of her baby. A comment from an antenatal teacher: What every woman will want to know, put simply and clearly. A comment from a midwife, perinatal researcher and adjunct professor (Betty-Anne Daviss): Sylvie has created a prescription for healthy birth in a 10-step approach to keep parents focused on what is important in a potentially disastrous birth environment... She has... provided us with a book that encapsulates anything you wanted to know about keeping your birth normal and healthy... And a comment from a mother: Had a very late night Friday as I could not put your book down. Wow!

Birth Settings in America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Assessing Health Outcomes by Birth Settings, 2020-05-01 The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. *Birth Settings in America: Outcomes, Quality, Access, and Choice* reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

Pregnancy, Childbirth, Postpartum, and Newborn Care, 2003 This guide provides a full range of updated, evidence-based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period, considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. They apply to all women attending antenatal care, in delivery, postpartum or post abortion care, or who come for emergency care, and to all newborns at birth and during the first week of life (or later) for routine and emergency care. This guide is a guide for clinical decision-making. It facilitates the collection; analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations, and recommending appropriate research-based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment, including time referral, if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world, thereby making pregnancy and childbirth safer.
