## **China's Provinces and the Belt and Road**

**Initiative** Dominik Mierzejewski, 2021-03-30 This book discusses the Belt and Road Initiative at the provincial level in China. It analyses the evolution of the role of local governments in Chinese foreign policy since the opening of China's economy in 1978, showing how the provinces initially competed with each other, and how the central government was forced to react, developing more centralised policies. Unlike other books on the Belt and Road Initiative, which focus on the international aspects of the initiative, this book demonstrates the importance of the Belt and Road in reinforcing China's unitary status and for managing and coordinating development at the local level as well as centre-province relations and province to province relations inside China.

**Business Process Management Cases Vol. 2** Jan vom Brocke, Jan Mendling, Michael Rosemann, 2021-09-05  
This book is a sequel and extension to the book "Business Process Management Cases, published in its first edition by Springer in 2018. It adds 22 new cases for practitioners and educators to showcase and study Business Process Management (BPM). The BPM cases collection is dedicated to providing a contemporary and comprehensive, industry-agnostic insight into the realities of BPM. In particular it focuses on the lessons that only authentic cases can provide. The experiences documented cover both, the positive impact of deploying BPM as well as the lessons learnt from failed attempts. Each case takes a holistic approach and by doing so, each chapter recognizes that BPM in practice is a multidimensional endeavor covering strategy to operations, systems and infrastructure, governance and culture, models and running processes. This volume also introduces a new device to plan and scope BPM initiatives: the BPM Billboard. The Billboard helps professionals to link BPM projects to the corporate strategy and to build the organizational capabilities to reach such strategic directive. Digital technologies do not just facilitate innovative process designs, but enable entire new strategic options. This book provides a contemporary and comprehensive overview of how to create process-enabled strategies in an opportunity-rich environment. Martin Petry, Hilti CIO This is the first book to present the BPM Billboard - A new management tool to plan and scope BPM initiatives. The Billboard together with the insightful real-world cases offers valuable

guidance towards BPM success from a holistic perspective. Gero Decker, Signavio CEO

*Review of Maritime Transport 2016* United Nations Conference on Trade and Development (UNCTAD), 2016-12-20 The Review of Maritime Transport is an UNCTAD flagship publication, published annually since 1968. It provides an analysis of structural and cyclical changes affecting seaborne trade, ports and shipping, as well as an extensive collection of statistical information. The present edition of the Review of Maritime Transport takes the view that the long-term growth prospects for seaborne trade and maritime businesses are positive, with ample opportunities for developing countries to generate income and employment and help promote foreign trade.

*Railway Directory 2008* Railway Gazette International, Chris Bushell, Chris Jackson, 2008-02 Providing an overview of global railway networks and services, 'Railway Directory 2008' outlines current issues and provides accurate data on all of the world's major networks.

Logistics Management & Distribution Report , 2001  
*China's New Silk Road Dreams* Noesselt Nele, 2021-01-25 The contributions compiled in this issue engage in critical evaluation of China's New Silk Road initiative (Belt and Road Initiative [BRI]) by focusing on the potential long-term political and economic effects and implications for Sino-European and Sino-African relations. The authors take the launching of the BRI (October 2013) as a starting point for a general, theory-guided qualitative re-evaluation of the basic patterns of Chinese foreign relations and global interactions under the fifth generation of Chinese political leaders. In 2013, the Chinese state president, Xi Jinping, framed BRI as a global connectivity network consisting of a multitude of overland passages and maritime transportation

corridors. Xi Jinping's report to the 19th Party Congress (2017) set the BRI as an anchor concept of China's fine-tuned foreign strategy in the 21st century.

*Current Issues in Shipping, Ports and Logistics* Theo Notteboom, 2011 Bringing together an international network of leading scholars, this multidisciplinary book unravels some of the most pressing challenges to shipping, ports, and logistics. Divided into five parts--shipping, the analysis of flows and networks, terminal operations and performance, logistics, and port development and governance--this record is an essential read for practitioners in the maritime and logistics world, postgraduate students, policy makers, and professional organizations. As market players expand and improve their services in line with increased requirements on rates, reliability, environmental footprint, and safety and security, this compendium encourages further systematic thinking.

**Gerardus Mercator** Ann Heinrichs, 2008 A biography of the sixteenth-century cartographer Gerardus Mercator, who invented a method of projecting the curvature of the Earth's surface on to a flat sheet of paper.

Jane's World Railways 2007/2008 Ken Harris, 2007-11 Covers railway systems in nearly 140 countries worldwide. Includes key personnel, organisations, financial status, current operations, planned developments, and traction/rolling stock. Plus detailed maps and images, and details for 2000 manufacturers, suppliers and service companies

*Transnational Regions in Historical Perspective* Marten Boon, Hein A.M. Klemann, Ben Wubs, 2019-06-25 National competitiveness has become a misnomer, as competitiveness is increasingly understood as a regional phenomenon and regions are not confined to the boundaries of the nation state. This book

focuses on the Port of Rotterdam and its hinterland - i.e. the Lower Rhine and the Ruhr area. A transnational perspective is imperative to understand the historical trajectories of the port, the hinterland and the region itself. This book brings geography and the transnational study of regions back into the historical discipline, linking places to larger geographical scales and to systems of production and consumption and the global chains in which they are organised. This book will be of interest to scholars and practitioners in urban studies, urban planning, public policy, geography and political science.
