Condiments & Entrails John Durak,2022-06-07 Moo! Moo!

Marvel at John Durak's brilliant poetry! It rages off the page! --Nick Cave, musician and author of *The Death of Bunny Munro* Durak's poetry is extraordinary. Hard, sensual, clear, funny, and dazzling in its clarity and directness. His verse is shapes, elegant, and concise, combining strength, intensity, wit, and emotional impact in a manner that is rare and deeply satisfying. I am desperate for more. --Stephen Fry, author of *Mythos and Heroes* I have never read anything like this. It is unpredictable, weird, profound, witty, and intelligent. I just love where this stuff takes me. Truly original. -- Benjamin Zephaniah, author of *The Life and Rhymes of Benjamin Zephaniah*

Sufism, Music and Society in Turkey and the Middle East

Anders Hammarlund,Tord Olsson,Elisabeth Ozdalga,2004-08-02

After decades of prohibition, Mevlana ceremonies of whirling dervishes attract renewed interest as forms of sacral music, both in formal and popular genres. This trend runs parallel to an increasing concern for cultural, ethnic and religious identities, where the rising

tide of religious revivalism sets the tone.

The Garland Encyclopedia of World Music Virginia

Danielson,Dwight Reynolds,Scott Marcus,2017-09-25 Expert writers present the major traditions of North Africa, the Middle East, and Central Asia, together with personal accounts of performers, composers, teachers, and ceremonies. A special feature of this volume is the inclusion of dozens of brief snap-shot essays that offer lifestories of typical musicmakers and their art, as well as first-person descriptions of specific music performances and events. Also includes maps and music examples.

They Never Come Back Leo Brett,Lionel Fanthorpe,Patricia Fanthorpe,2014-08-28 There are some parts of the world where change comes slowly. There are other placed where it scarcely comes at all. In really remote areas time stands still. The passing of the centuries means no more than the passing of clouds across a leaden sky. In the wilder regions of eastern Europe and the dark forests of Transylvania ancient derelict castles moulder away in medieval gloom. There are deadly secrets behind the decaying walls. Karina was running away from the Secret Police. She accidentally stumbled upon the hidden headquarters of a coven of witches, warlocks and necromancers and as a result she found

herself pursued by a thing that was not of this world. Karina had three desperate problems; to rescue her lover from the Secret Police; to save her brother from the coven; and to escape from the inescapable.

Seven Russian Archetypes Svetozar Posti¹, 2023-10-09 Seven Russian Archetypes is a description of seven seminal Russian figures: the Victim (zhertva), the Fool (iurodivyi), the Rebel or the Bandit (buntar' ili razboinik), the Wanderer (strannik), the Mother (mat'), the Peasant (muzhik), and the Intellectual (intelligent). Drawing from Russian history, folklore, literature, visual arts, and religion, these seven profiles are analyzed and presented in vivid and evocative detail. The seven portraits help to explain the Russian character and especially the groundedness of Russian culture in Orthodox Christianity. Many experts on Russian politics, business and culture, as well as admirers of Russian spirituality are aware of different features, both favorable and condescending, which display Russian mentality and temperament such as paternalism, messianism, collectivism, poor ability for self-organization, dogmatism, tendency toward asceticism and the penchant to bear suffering, radicalism, and inclination to extremes. From an external point of view, this is all accurate to a certain

extent; nevertheless, these features explain neither the origin nor motivation behind the most evident behavioral manifestations. The more profound characteristics can be found only on the level of internal representations, which can best be revealed in symbols and archetypal characters. *Seven Russian Archetypes* explains these fundamental Russian symbols.

Post-Traumatic Growth Emre Senol-Durak, Marialaura Di Tella, Annunziata Romeo, 2023-08-17

Animism in Rainforest and Tundra Marc Brightman, Vanessa Elisa Grotti, Olga Ulturgasheva, 2012-08-30 Amazonia and Siberia, classic regions of shamanism, have long challenged 'western' understandings of man's place in the world. By exploring the social relations between humans and non-human entities credited with human-like personhood (not only animals and plants, but also 'things' such as artifacts, trade items, or mineral resources) from a comparative perspective, this volume offers valuable insights into the constitutions of humanity and personhood characteristic of the two areas. The contributors conducted their ethnographic fieldwork among peoples undergoing transformative processes of their lived environments, such as the depletion of natural resources and migration to urban centers. They describe here fundamental

relational modes that are being tested in the face of change, presenting groundbreaking research on personhood and agency in shamanic societies and contributing to our global understanding of social and cultural change and continuity.

Alaturka: Style in Turkish Music (1923–1938) John Morgan

O'Connell, 2016-03-23 The early-Republican era (1923-1938) was a major period of musical and cultural change in Turkey. Alaturka:

Style in Turkish Music is a study of the significance of style in Turkish music and, in particular, the polemical debate about an eastern style of Turkish music (called, alaturka) that developed during this rich and complicated era of Turkish history.

Representing more than twenty years of research, the book explores the stylistic categories that show the intersection between music and culture; the different chapters treat musical materials,

musical practices and musical contexts in turn. Informed by critical approaches to musical aesthetics in ethnomusicology as well as musicology and anthropology, the book focuses upon a native discourse about musical style, highlighting a contemporary apprehension about the appropriate constitution of a national identity. The argument over style discloses competing conceptions of Turkish space and time where definitions of the east and the west, and interpretations of the past and the present respectively were hotly contested. John Morgan O'Connell makes a significant contribution to the study of Turkish music in particular and Turkish history in general. Conceived as a historical ethnography, the book brings together archival sources and ethnographic materials to provide a critical revision of Turkish historiography, music providing a locus for interrogating singular representations of a national past.

Children of the Cave Virve Sammalkorpi,2019-04-19 1819. lax

Agolasky, a young assistant to a notable French explorer, sets off on a journey to the Russian wilderness. They soon discover a group of creatures living in a cave: children with animal traits. But are they animals, or are they human? Faced with questions of faith, science and the fundamentals of truth, tensions rise in the camp. Soon the children's safety becomes threatened and Agolasky needs to act. The novel is based on the photo series and synopsis by Pekka Nikrus. Why Peirene chose to publish this book: Greek legends, fables and fairy tales all share an interest in mythical beings. In this book Sammalkorpi imagines what would happen if these creatures really existed. How would we respond? The answer to this question matters hugely. It determines what it means to be human. 'A truly enjoyable read with its beautiful and precise language.' Savonia prize jury 'One of the most ambitious works of this year. A novel that deals with what it means to be human and the associated ethical and moral questions.' Kuvastaja prize jury
