The Tropical Oil Crop Revolution Derek Byerlee,Walter P. Falcon,Rosamond Naylor,2017 The overall aim of the book is to provide a broad synthesis of the major supply and demand drivers of the rapid expansion of oil crops in the tropics; its economic, social, and environmental impacts; and the future outlook to 2050. After introducing the dramatic surge in oil crops, chapters provide a comparative perspective from different producing regions for two of the world's most important crops, oil palm and soybeans in the tropics. The following chapters examine the drivers of demand of vegetable oils for food, animal feed, and biodiesel and introduce the reader to price formation in vegetable oil markets and the role of trade in linking consumers across the world to distant producers in a handful of exporting countries. The remaining chapters review evidence on the economic, social, and environmental impacts of the oil crop revolution in the tropics. While both economic benefits and social and environmental costs have been huge, the outlook is for reduced trade-offs and more sustainable outcomes as the oil crop revolution slows and the global, national, and local communities converge on ways to better managed land use changes and land rights.

Contemporary Wine Studies Gareth Morgan,Richard Tresidder,2015-09-25 The purchase and consumption of wine, whether in hospitality environments or domestic settings, has huge anthropological significance underpinned by a discourse of wine appreciation. It can be seen as a multi-sensory and symbolically status-rich activity framed by historical, social, cultural and ethical discourses. This innovative book offers a critical study of wine from social and cultural perspectives. The field of wine studies spans the spectrum of cultural and technical issues concerning the place of wine in society from viticulture, vinification, labelling, regulation, marketing, purchasing, storage and its final consumption. It combines social history and contemporary questions including the notion of terroir, the nature of protected wine designations, the pricing of wine and the different motivations for buying and consuming wine. It considers wine as a beverage, as an aesthetic exercise and as a marker of status, as well as health implications and legal controls. The title offers a timely contribution into the significance of wine and the role of knowledge, both of which have conceptual and managerial implications in terms of marketing, promotion, consumption and distribution. By offering a holistic and innovative understanding of wine and its consumption, it is a must-read for students and scholars in the fields of wine and social science.
