Regulating Technologies Roger Brownsword, Karen Yeung, 2008-10-23
While it is a truism that emerging technologies present both opportunities for and challenges to their host communities, the legal community has only recently begun to consider their significance. On the one hand, emerging information, bio, nano, and neurotechnologies challenge policy-makers who aspire to put in place a regulatory environment that is

legitimate, effective, and sustainable; on the other hand, these same technologies offer new opportunities as potentially powerful regulatory instruments. In this unique volume, a team of leading international scholars address many of the key difficulties surrounding the regulation of emerging technological targets as well as the implications of adopting technology as a regulatory tool. How should we rise to the challenge of regulating technologies? How are the regulatory lines to be drawn in the right places and how is the public to be properly engaged? How is precaution to be accommodated, and how can the law keep pace with technologies that develop ahead of the regulatory environment? How readily should we avail ourselves of the opportunity to use technology as a regulative strategy? How are we to understand these strategies and the challenges which they raise? To what extent do they give rise to similar policy problems accompanying more 'traditional' regulatory instruments or generate distinctive challenges? While the criminal justice system increasingly relies on technological assistance and the development of a 'surveillance society', is a regulatory regime that rules by technology compatible with rule of law values?

Again John Leatherman, 2014-03-23 From the incredibly intricate storyteller John Leatherman comes a tale with more twists and turns than any episode of Sherlock. For television news intern Chance Trifle, the third time really is the charm. He experiences every day three times, and only what happens on the third version is permanent. The rest of the world seems unaware that each day has two unofficial versions. Chance's foreknowledge allows him to get what he thinks is his ticket to journalistic stardom – video of the murder of pop star Prima by record producer Sam Mason. But each unofficial attempt to release the sensational video goes horribly wrong, so on the official days, Chance keeps it secret. Meanwhile, he juggles relationships with two female interns, Danielle Arbusto and Trish Villanova—both captivated by his apparent cleverness. With

every moment Chance sits on the video, he feels more and more in league with a criminal. Obsessed with finding the right way to protect himself, profit from the video, and keep his girlfriends from finding out about each other, Chance misses hearing about the abduction of five-year-old Wendy Starnes until after his last chance to prevent it. Then as he struggles to help find Starnes, the video goes missing and turns up anonymously on the Web. It's only a matter of time before someone links it to him—and realizes he could have saved Prima and brought a murderer to justice if he hadn't been so focused on himself. On the run from conniving coworkers, spurned lovers, determined detectives, bloodthirsty thugs, and fierce mercenaries, can Chance take his mind off personal gain long enough to realize the right way to use his gift?
