Digital Video Recorders Jimmy Schaeffler,2013-07-24 Four specific trends are driving the DVR industry: consumer content choice, consumer content control, personalization of content libraries, and the ability to transfer content from device-to-device and person-to-person. Digital Video Recorders features a macro and micro views of the already established yet still burgeoning DVR industry. As part of the NAB Executive Technology Briefing series, this book gives you a wealth of market knowledge, business models, case studies, and industry insights explained in a non-technical fashion. Digital Video Recorders discusses the impact of the technology across many different industries and platforms, explains hardware, software and technology of set-top boxes, DVR infrastructure, on-screen guides, planning and scheduling, content security, and more. Whether you are an executive in the broadcast, telecommunications, consumer electronic, or advertising space, you will expand your knowledge on DVR impact, explore new business opportunities, and get a brief overview of the technical terms needed. You will also be able to accurately analyze and understand the trends, projections and other data, all of which will help lead to the expedited growth and development of DVR industry.

Work Worth Doing Brian T. McMahon,Linda R. Shaw,2021-05-30 President Theodore Roosevelt once said, Far and away the best prize that life offers is the chance to work hard at work worth doing. This quote is not only the source from which the title was borne, but also the philosophical approach toward TBI rehabilitation embraced by the 26 rehabilitation experts who wrote Work Worth Doing: Advances in Brain Injury Rehabilitation. This important, and possibly controversial, book of issues and methods addresses the full spectrum of vocational rehabilitation activities. Independent living, treatment generalization, criteria for evaluating TBI rehabilitation facilities, family involvement issues, and an entirely new perspective on the TBI rehabilitation industry are discussed.

Embedded and Ubiquitous Computing Laurence T. Yang,Minyi Guo,Guang R. Gao,Niraj K. Jha,2004-07-30 Welcome to the proceedings of the 2004 International Conference on Embedded and Ubiquitous Computing (EUC 2004) which was held in Aizu-Wakamatsu City, Japan, 25–27 August 2004. Embedded and ubiquitous computing are emerging rapidly as exciting new paradigms and disciplines to provide computing and communication services all the time, everywhere. Its systems are now invading every aspect of life to the point that they are disappearing inside all sorts of appliances or can be worn unobtrusively as part of clothing and jewelry, etc. This emergence is a natural outcome of research and technological advances in embedded systems, pervasive computing and communications, wireless networks, mobile computing, distributed computing and agent technologies, etc. Its explosive impact on academia, industry, government and daily life can be compared to that of electric motors over the past century but promises to revolutionize life much more profoundly than elevators, electric motors or even personal computer evolution ever did. The EUC 2004 conference provided a forum for engineers and scientists in academia, industry, and government to address all the resulting profound challenges including technical, safety, social, legal, political, and economic issues, and to present and discuss their ideas, results, work in progress and experience on all aspects of embedded and ubiquitous computing. There was a very large number of paper submissions (260) from more than 20 countries and regions, including not only Asia and the Pacific, but also Europe and North America. All submissions were reviewed by at least three program or technical committee members or external reviewers.
