FORENSIC ALCOHOL TEST EVIDENCE (FATE) John Brick ,2016-10-04 Everyday problems associated with the consequences of alcohol use disorders require answers, and it is for this reason Forensic Alcohol Test Evidence (FATE) was written. Forensic alcohol test evidence focuses on the evaluation, interpretation and application of the effects of alcohol or an alcohol test result to some legal issue such as a crime, accident or consequence of alcohol exposure. In FATE, many of the issues pertinent to a thorough forensic evaluation and trial testimony are discussed, but most importantly is the focus on consistent, unbiased, and comprehensive application of diverse scientific disciplines and research to questions of forensic interest. This requires evaluating behavioral, analytical, physiological, pharmacological and toxicological evidence in the puzzle; determining if the pieces go together; and reaching a conclusion to a reasonable degree of scientific certainty. The first chapter discusses what is forensic alcohol test evidence and why it is studied. Chapter 2 explores forensic alcohol evidence and what are the types of alcohol and quantitative expression of blood alcohol. Chapter 3 examines alcohol pharmacokinetics, alcohol pharmacodynamics site of alcohol action, and basic neurophysiology. Neuropharmacology of alcohol intoxication is also discussed. Chapter 4 covers laboratory and clinical-based tests of impairment. In Chapter 5, DWI high-risk behaviors and injuries are discussed. Chapter 6 defines alcohol and the law: drunk driving, visible intoxication, and aggression, while Chapter 7 covers the DWI investigation and arrest, elements of the DWI report, outside vehicle test, and obtaining blood samples. Chapters 8 and 9 describe alcohol-drug interactions and medical consequences and toxicological considerations. Chapters 10 and 11 pursue alcohol use, tolerance, dependence, and the need for standardization and estimating blood alcohol levels. The remaining two chapters cover accident reconstruction and neuropsychology. This book will be an essential tool and valuable resource for all law enforcement officers and investigators, forensic examiners and other professionals in the evaluation and interpretation of alcohol evidence in crimes and accidents.

Advanced DUI Investigation Daniel J. Haggin, 2005 This all inclusive reference book deals with all aspects of DUI/DWI and is aimed exclusively towards the investigation of driving under the influence of alcohol and/or drugs. It addresses the subject matter thoroughly and is geared toward the experienced police officer actively involved in DUI/DWI detection and arrest. The book can be carried in a patrol car as a ready reference or be used in the classroom. All of the necessary information needed to professionally investigate incidents of impaired driving, prepare a comprehensive report and then be able to testify as an expert in a court of law is provided. It goes into detail in explaining the intricacies of why a person becomes intoxicated, why the Horizontal Gaze Nystagmus Field Test is a valuable and valid psycho-motor or field test, and it also provides a step by step approach to extrapolating blood alcohol content. The central nervous system of the human being is explained in a manner that is easily understood by the average person, connecting the how and why the CNS is affected and therefore how this impairment manifests itself as a drunk driver as opposed to a drunk pedestrian. The manual also contains sections dealing with alcohol, depressant and stimulant drugs, which are critical to the proper understanding of the observable effects of drugs and alcohol. Also included are instructional objectives for each section, section quizzes and a comprehensive final exam. It will not only help to increase the confidence level of those everyday working street cops who must make decisions about whether to arrest or not arrest on any given impaired or intoxicated driver situation, but it will also provide the basis for the street cop to excel in this field of law enforcement and prepare themselves as an expert in the detection and arrest of DUI drivers.
