Our Common Seas Don Hinrichsen,2016-07-22 Most of the world's population lives on or near the coasts. Every nation not completely landlocked has used the sea as its supposedly self-cleansing garbage dump. Now the effects are being felt. There is not a coast in the world which is not dangerously polluted. Sewage, oil, plastics, industrial effluents, radioactive waste have been added to ungoverned development, all of which are busily destroying otherwise robust inshore eco-systems.

Hinrichsen, basing his work on United Nations Environment Programme (UNEP) research and his own extensive travels, has described the situation in the Mediterranean, the Gulf, the Indian Ocean, the South-East Asian Seas and the Eastern Pacific. He covers both the disasters and the growing successes in dealing with them, and he points the way to the sort of international deal needed to rescue a vast resource in danger of complete destruction. His book is both a call to action and a sign of hope. Originally published in 1990

Barrier to the Bays Mary Jo O'Rear,2022-08-24 Mary Jo O'Rear rounds out her coastal bend trilogy with a deep and engaging look at the prehistory and history of the Texas barrier islands. In *Barrier to the Bays*, O'Rear captures the deep time of the islands (Mustang, Padre, and San José), the bays (Aransas, Corpus Christi, Copano, Redfish, and Nueces), and Aransas Pass. From the earliest human settlements to the twentieth century, O'Rear explores the complex interplay between people and economies struggling to survive in a region dominated by indifferent forces of nature. *Barrier to the Bays* opens with the natural formation and development of the barrier isles and the arrival of Native Americans, Spanish castaways, French explorers, and Catholic missionaries. European settlements on the mainland eventually led to rich commercial development of the area and its bounty as ranching, fishing, and transportation took hold. By the early twentieth century, the people of the Coastal Bend began wrestling with a new drive to create deep-water harbors along the coastline in the face of the ever-present hurricane threat. O'Rear shows that by World War II the region had settled into a kind of "practicality" as tourists and traders took their place among the denizens of the islands and bays. In addition to the stories of familiar historical figures, *Barrier to the Bays* stresses the importance of technology in the settlement and development of the region. "Nothing could have been achieved among the barriers and bays of the Coastal Bend without the right tools." O'Rear underscores the importance of properly designed sailing vessels and the centrality of navigation technology as an integral part of the barrier isle story.

Managing Coastal and Inland Waters Kenneth Ruddle,Arif Satria,2010-09-08 Besides the erroneous assumption that tropical fisheries are 'open access', the cases demonstrate that pre-existing systems (1) are concerned with the community of fishers and ensuring community harmony and continuity; (2) involve flexible, multiple and overlapping rights adapted to changing needs and circumstances; (3) that fisheries are just one component of a community resource assemblage and depend on both the good management of linked upstream ecosystems and risk management to ensure balanced nutritional resources of the community; and (4) pre-existing systems are greatly affected by a constellation of interacting external pressures.

Family-Style Meals at the Hali'imaile General Store Beverly Gannon,Joan Namkoong,2011-11-23 Family-style dining is back in style and has been reimagined by one of the most prominent chefs in Hawaii, James Beard Award-nominee Beverly Gannon. On the road to Haleakala, Maui's most famous dormant volcano, is one of the island's favorite destinations--where a laid-back atmosphere and top-flight menu welcome both residents and tourists. Developed from the restaurant's ever-popular repertoire, this all-new recipe collection is scaled for sit-down family suppers, lunches, and brunches, with built-in expandability for impromptu gatherings or full-on entertaining. Ingredient substitutions are included to help move dishes from the kitchen to the table with ease, and leftovers are skillfully adapted into future meals. Recipes are organized by the days of the week, based on a schedule Gannon's mother used, and are interwoven with charming family anecdotes.

Fishing, Mobility and Settlerhood Rapti Siriwardane-de Zoysa,2018-09-19 This multi-sited island ethnography illustrates how the embattled politics of (im)mobility, belonging, and patronage among coastal fishing communities in Sri Lanka's militarised northeast have intersected in the wake of civil war. It explores an undertheorized puzzle by asking how the conceptual dualisms between co-operation and contestation simplify the complex lifeworlds of small-scale fishing communities that are often imagined by scholars through allegories of rivalry and resource competition. Drawing on ordinary interpretations and lived practices implicated in the vernacular term sambandam (bearing multiple meanings of intimacy and entanglement), the book traces how intergroup co-operation is both affectively routinised and tactically instrumentalised across coastlines, and at sea. Given its distinct focus on translocal and ethno-religiously plural collectives, the study maps recent historic formations of diverse practices and their contentions, from networked 'piracy' and dynamite fishing, to collective rescue missions and coalitional lobbying. Moreover this work serves as an open invitation to academics, policymakers and activists for re-imagining multiple modes of ethical being and doing, and of everyday sociality among so-called 'deeply divided' societies. A rich ethnography that pays meticulous attention to a complex social fabric made up of locals, settlers and

migrants, with multiple linguistic and religious affiliations, sometimes contending fishing practices, and migration and livelihoods patterns as they have been affected by tsunami, war and the aftermaths of both. It draws from and speaks to a range of disciplines – from political science and sociology, to critical geography and cultural studies, and contributes to diverse fields of inquiry, including conflict and its relationship to a “cold” peace; coastal/maritime livelihoods; identity, cooperation, and collective action. - Aparna Sundar, Assistant Professor of Politics, Ryerson University By unveiling the vast heterogeneity of fisher migrants and settlers, the book demonstrates in an excellent way how research should not merely focus on the articulations of identity, but more so the inherent properties and qualities of the diverse interdependencies they come to sustain. - Conrad Schetter, Professor of Peace and Conflict Studies, University of Bonn

A Fishery Manager's Guidebook Kevern L. Cochrane,Serge M. Garcia,2009-06-15 Co-published with the Food and Agriculture Organization of the United Nations. Fisheries management is the process that has evolved to try to ensure that fisheries operate in a manner that provides the immediate benefits in a sustainable manner. The widely accepted goal is that the full range of benefits should not only be available for this generation but for generations to come. Fisheries management has been successful in some cases but there have also been many, many cases of failure. This volume is intended to contribute to improving this unsatisfactory state by addressing the widespread need for information and guidance on the broad and often complex task of fisheries management. It is an updated and expanded edition of the first version of A fishery manager's guidebook which was published as a FAO Fisheries Technical Paper in 2002. The major part of this new edition is divided into five parts intended to cover the range of concerns, tools and techniques essential to the modern fisheries manager, whether that manager is an individual or a formal or informal group. Following the Introduction: Part I examines the primary dimensions of fisheries: biological, ecological, social and economic Part II looks at the legal and institutional characteristics of fisheries Part III explores the tools that fishery managers have to achieve the objectives expected from a fishery Part IV discusses the role of scientific information of indicators and reference points Part V moves into implementation of fisheries management and includes a chapter on special considerations in small-scale fisheries This landmark publication is aimed at fishery managers and scientists. All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume. Fisheries around the world make essential contributions to human well-being including the provision of basic food supplies, employment, recreational opportunities, foreign currency and others, providing benefits to hundreds of millions of people. Despite these benefits, our record of managing fisheries so that the benefits can be sustained has been poor, at best, and most fisheries around the world are experiencing serious ecological, social or economic problems and usually all three. Today there is global concern about the state of fishery resources and aquatic ecosystems, their resilience to future stresses such as climate change and their ability to continue to provide benefits.
