**Towards a Cognitivist Understanding of Communication Design**

Phil Jones, 2024-06-12 This book demonstrates the relevance and importance of cognitive linguistics when applied to the analysis and practice of graphic design/communication design. Phil Jones brings together a diverse range of theory and organizes it in accordance with different stages in the design process. Using examples from contemporary communication design, as well as more familiar selections from the graphic design canon as case studies, this book provides an account of how meanings are made by users, and suggests new strategies for design practice. It seeks convergences between the ways that graphic/communication designers think and talk about their practice and the theories emerging from cognitive science. This book will be of interest to scholars working in design, graphic design, the philosophy of art and aesthetics, communication studies, and media and film studies.

*Children's Literature in the Elementary School* Charlotte S. Huck, 1979 In *Children's Literature in the Elementary School* Charlotte S. Huck advances the view that exposing children to good quality children's literature is a vital element of successful school reading programs. Books for children should be 1) works of high literary quality, 2) useful in the curriculum, and 3) appeal to the young reader. Volumes that address this subject have traditionally been tasked with meeting a wide variety of objectives in higher education: if adopted by education departments methodological matters are stressed; under the school of library science bibliography is the object; and under the English department textual analysis is emphasized. This text is sufficiently broad as to adapt itself to any one of these approaches, and should serve as a valuable guide for teachers, librarians, and elementary educators in any capacity.
