**Asia-Pacific Economic Cooperation (APEC)** Werner Draguhn,Eva Manske,Jürgen Rüländ,2013-04-03 The Asia-Pacific Economic Cooperation (APEC) was founded in 1989. Since then the forum has developed into a major player in tri-partite relations between North America, East Asia and Europe. The Seattle and Bogor Summits were landmark events suggesting to many observers a gravitational shift in the world economy and world politics. Yet the Asian financial crisis had a sobering effect on high-flying expectations as APEC contributed little to crisis management. In the light of such contradictory performance, distinguished scholars here examine APEC's achievements and failures, its role and functions in international relations, its linkages with regional organisations and the interplay between the forum and national interests of major factors in the region.

**World Economic Outlook, April 2018** International Monetary Fund. Research Dept.,2018-04-17 This report describes the world economic outlook as of April 2018,

projecting that advanced economies will continue to expand above their potential growth rates before decelerating, while growth in emerging markets in developing economies will rise before leveling off. It details global prospects and policies, including risks to the forecast, and essential determinants of long-term economic growth: labor force participation in advanced economies, the declining share of manufacturing jobs globally and in advanced economies, and the process through which innovative activity and technological knowledge spread across national borders.

**Global Report on Trafficking in Persons 2020** United Nations,2021-04-30 The 2020 UNODC Global Report on Trafficking in Persons is the fifth of its kind mandated by the General Assembly through the 2010 United Nations Global Plan of Action to Combat Trafficking in Persons. It covers more than 130 countries and provides an overview of patterns and flows of trafficking in persons at global, regional and national levels, based primarily on trafficking cases detected between 2017 and 2019. As UNODC has been systematically collecting data on trafficking in persons for more than a decade, trend information is presented for a broad range of indicators.

*Emigration and Its Economic Impact on Eastern Europe* Mr.Ruben V Atoyan,Lone Engbo Christiansen,Allan Dizioli,Mr.Christian H Ebeke,Mr.Nadeem Ilahi,Ms.Anna Ilyina,Mr.Gil Mehrez,Mr.Haonan Qu,Ms.Faezeh Raei,Ms.Alaina P Rhee,Ms.Daria V Zakharova,2016-07-20 This paper analyses the impact of large and persistent emigration from Eastern European countries over the past 25 years on these countries' growth and income convergence to advanced Europe. While emigration has likely benefited migrants themselves, the receiving countries and the EU as a whole, its impact on sending countries' economies has been largely negative. The analysis suggests that labor outflows, particularly of skilled workers, lowered productivity growth, pushed up wages, and slowed growth and income convergence. At the same time, while remittance inflows supported financial deepening, consumption and investment in some countries, they also reduced incentives to work and led to exchange rate appreciations, eroding competitiveness. The departure of the young also added to the fiscal pressures of already aging populations in Eastern Europe. The paper concludes with policy recommendations for sending countries to mitigate the negative impact of emigration on their economies, and the EU-wide initiatives that could support these efforts.

**EU Climate Policy Explained** Jos Delbeke,Peter Vis,2015-10-05 The EU has been the region of the world where the most climate policies have been implemented, and where practical policy experimentation in the field of the environment and climate change has been taking place at a rapid pace over the last twenty-five years. This has led to

considerable success in reducing pollution, decoupling emissions from economic growth and fostering global technological leadership. The objective of the book is to explain the EU's climate policies in an accessible way, to demonstrate the step-by-step approach that has been used to develop these policies, and the ways in which they have been tested and further improved in the light of experience. The book shows that there is no single policy instrument that can bring down greenhouse gas emissions, but the challenge has been to put a jigsaw of policy instruments together that is coherent, delivers emissions reductions, and is cost-effective. The book differs from existing books by the fact it covers the EU's emissions trading system, the energy sector and other economic sectors, including their development in the context of international climate policy. Set against the backdrop of the 2015 UN Climate Change conference in Paris, this accessible book will be of great relevance to students, scholars and policy makers alike.

*Pathways from Preferential Trade* T. Heron, 2013-10-16 Tony Heron examines recent global policy responses to the erosion of non-reciprocal tariff and quota preferences caused trade liberalizing by focusing on a sample of small, middle income countries which have historically enjoyed favourable access to OECD markets.

**The Refugee Surge in Europe** Mr. Shekhar Aiyar, Ms. Bergljot B Barkbu, Nicoletta Batini, Mr. Helge Berger, Ms. Enrica Detragiache, Allan Dizioli, Mr. Christian H Ebeke, Ms. Huidan Huidan Lin, Ms. Linda Kaltani, Mr. Sebastian Sosa, Mr. Antonio

Spilimbergo, Petia Topalova, 2016-01-19 Against the background of political turmoil in the Middle-East, Europe faces an unprecedented surge in asylum applications. In analyzing the economic impact of this inflow, this paper draws from the experience of previous economic migrants and refugees, mindful of the fact that the characteristics of economic migrants can be different from refugees. In the short-run, additional public expenditure will provide a small positive impact on GDP, concentrated in the main destination countries of Germany, Sweden and Austria. Over the longer-term, depending on the speed and success of the integration of refugees in the labor market, the increase in the labor force can have a more lasting impact on growth and the public finances. Here good policies will make an important difference. These include lowering barriers to labor markets for refugees, for example through wage subsidies to employers, and, in particular, reducing legal barriers to labor market participation during asylum process, removing obstacles to entrepreneurship/self-employment, providing job training and job search assistance, as well as language skills. While native workers often have legitimate concerns about the impact of immigrants on wages and employment, past experience indicates that any adverse effects are limited and temporary.

**Global Textiles and Clothing Trade** Umair Hafeez Ghori, 2012-04-05 The author presents substantial case studies of the effect of the abolition of quotas on global trade in this sector. Concentrating mainly on China and Pakistan but also examining India, Indonesia, Vietnam, and seven other Asian T&C manufacturing countries, he contrasts post-abolition reality with pre-abolition predictions of the impact of abolishing quotas, and details the continuing distortion caused by tariffs, non-tariff barriers and through trade

remedies such as safeguards and anti-dumping. All of the analysis is supported by the judicious use and interpretation of extensive statistics, compelling arguments, and interviews with entrepreneurs and trade officials in Pakistan (as a case study of a country predicted to be a major beneficiary of quota expiry).

The Politics and the Economics of Integration in Asia and the Pacific Shiro Armstrong, 2011-11-03 The shape of economic integration in the global and regional economies - and the extent to which goods, services and factors of production move more or less freely across borders - depends not only upon underlying economic conditions but also upon politics. Whether integration is market-led, as has been the case in Asia, or institution-led as in Europe, there are political elements that affect all forms of regional and international economic integration. While geopolitics influences international economic integration, so too does domestic politics. Economic integration in Asia has been driven by rapid unilateral trade and investment liberalization and, while trade and investment patterns have been determined largely by comparative advantage, political forces have also affected patterns of economic interdependence. The form that regional institutions take, and their effectiveness, also depends on political relations between countries. The particular circumstances in Asia, and the relationships between regional economies has profoundly shaped regional institutions and will continue to do so. The chapters in this volume draw on papers originally presented to the 33rd Pacific Trade and Development Conference held in Taipei in 2009 to look in original ways at how politics shape economic integration and its various dimensions in Asia and the Pacific and globally.

*World Economic Outlook, October 2017* International Monetary Fund. Research Dept.,2017-10-10 The global upswing in economic activity is strengthening. Global growth, which in 2016 was the weakest since the global financial crisis at 3.2 percent, is projected to rise to 3.6 percent in 2017 and to 3.7 percent in 2018. The growth forecasts for both 2017 and 2018 are 0.1 percentage point stronger compared with projections earlier this year. Broad-based upward revisions in the euro area, Japan, emerging Asia, emerging Europe, and Russia—where growth outcomes in the first half of 2017 were better than expected—more than offset downward revisions for the United States and the United Kingdom. But the recovery is not complete: while the baseline outlook is strengthening, growth remains weak in many countries, and inflation is below target in most advanced economies. Commodity exporters, especially of fuel, are particularly hard hit as their adjustment to a sharp step down in foreign earnings continues. And while short-term risks are broadly balanced, medium-term risks are still tilted to the downside. The welcome cyclical pickup in global activity thus provides an ideal window of opportunity to tackle the key policy challenges—namely to boost potential output while ensuring its benefits are broadly shared, and to build resilience against downside risks. A renewed multilateral effort is also needed to tackle the common challenges of an integrated global economy.

Trade Strategies for a New Era Geza Feketekuty,Bruce Stokes,1998 According to the authors, challenges resulting from the globalization of production and the integration of former socialist economies into the world market economy create the need for new trade negotiations at both the regional and global level. Government policies and regulations that constitute barriers to foreign trade and investment still need to be overcome.

Anticompetitive practices such as trade-restricting cartels need to be eliminated. Philosophical and political differences over how trade agreements should deal with issues such as labor and the environment need to be resolved. The book provides a comprehensive review of the issues confronting U.S. trade policymakers and outlines a strategy to deal with them. The book is essential reading for public officials, business leaders and private citizens who wish to think broadly about American's role in the global economy of the 21st century.
