Global Status Report on Noncommunicable Diseases 2014 World Health Organization,2014 This global status report on prevention and control of NCDs (2014), is framed around the nine voluntary global targets. The report provides data on the current situation, identifying bottlenecks as well as opportunities and priority actions for attaining the targets. The 2010 baseline estimates on NCD mortality and risk factors are provided so that countries can report on progress, starting in 2015. In addition, the report also provides the latest available estimates on NCD mortality (2012) and risk factors, 2010-2012. All ministries of health need to set national NCD targets and lead the development and implementation of policies and interventions to attain them. There is no single pathway to attain NCD targets that fits all countries, as they are at different points in their progress in the prevention and control of NCDs and at different levels of socioeconomic development. However all countries can benefit from the comprehensive response to attaining the voluntary global targets presented in this report.--Publisher description.

Poverty Reduction Policies and Practices in Developing Asia Almas Heshmati,Esfandiar Maasoumi,Guanghua Wan,2015-03-31 This book looks at the major policy challenges facing developing Asia and how the region sustains rapid economic growth to reduce multidimensional poverty through socially inclusive and environmentally sustainable measures. Asia is facing many challenges arising from population growth, rapid urbanization, provision of services, climate change and the need to redress declining growth after the global financial crisis. This book examines poverty and related issues and aims to advance the development of new tools and measurement of multidimensional poverty and poverty reduction policy analysis. The book covers a wide range of issues, including determinants and causes of poverty and its changes; consequences and impacts of poverty on human capital formation, growth and consumption; assessment of poverty strategies and policies; the role of government, NGOs and other institutions in poverty reduction; rural-urban migration and poverty; vulnerability to poverty; breakdown of poverty into chronic and transitory components; and a comparative study on poverty issues in Asia and other regions. Expansionary Austerity New International Evidence Mr.Daniel Leigh,Mr.Andrea Pescatori,Mr.Jaime Guajardo,2011-07-01 This paper investigates the short-term effects of fiscal consolidation on economic activity in OECD economies. We examine the historical record, including Budget Speeches and IMFdocuments, to identify changes in fiscal policy motivated by a desire to reduce the budget deficit and not by responding to prospective economic conditions. Using this new dataset, our estimates suggest fiscal consolidation has contractionary effects on private domestic demand and GDP. By contrast, estimates based on conventional measures of the fiscal policy stance used in the literature support the expansionary fiscal contractions hypothesis but appear to be biased toward overstating expansionary effects.

Global Indian Diasporas Gijsbert Oonk,2007 Global Indian Diasporas discusses the relationship between South Asian emigrants and their homeland, the reproduction of Indian culture abroad, and the role of the Indian state in reconnecting emigrants to India. Focusing on the limits of the diaspora concept, rather than its possibilities, this volume presents new historical and anthropological research on South Asian emigrants worldwide. From a comparative perspective, examples of South Asian emigrants in Suriname, Mauritius, East Africa, Canada, and the United Kingdom are deployed in order to show that in each of these regions there are South Asian emigrants who do not fit into the Indian diaspora concept—raising questions about the effectiveness of the diaspora as an academic and sociological index, and presenting new and controversial insights in diaspora issues.

Foreign Groups in Rome During the First Centuries of the Empire George La Piana,1927

Japan's China Policy Linus Hagström,2005-03-09 Japan's China Policy understands Japan's foreign policy in terms of power - one of the most central concepts of political analysis. It contributes a fresh understanding to the subject by developing relational power as an analytical framework and by applying it to significant issues in Japan's China policy: the negotiations for a bilateral investment protection treaty and the disputed Pinnacle (Senkaku/Diaoyu) Islands. Hagström demonstrates that Japan exerted power over China in such divergent empirical settings for the most part by using civilian instruments positively, defensively and through non-action. Given that Japan's foreign policy is often portrayed rather enigmatically in terms of power, the unique contribution of Japan's China Policy is to demonstrate how to analyze power aspects of Japan's foreign policy in a more coherent fashion. This revealing approach to Japan's foreign policy will be of huge interest to anyone studying Japanese politics, foreign policy or international relations.

The Eminent Monk John Kieschnick,1997-07-01 In an attempt to reconstruct an elusive aspect of the medieval Chinese imagination, The Eminent Monk examines biographies of Chinese Buddhist monks, from the uncompromising ascetic to the unfathomable wonder-worker. While analyzing images of the monk in medieval China, the author addresses some questions encountered along the way: What are we to make of accounts in “eminent monk” collections of deviant monks who violate monastic precepts? Who wrote biographies of monks and who read them? How did different segments of Chinese society contend for the image of the monk and which image

prevailed? By placing biographies of monks in the context of Chinese political and religious rhetoric, The Eminent Monk explores both the role of Buddhist literature in Chinese history and the monastic imagination that inspired this literature.

Corruption, Inequality, and the Rule of Law Eric M. Uslaner,2010-04-12 Corruption flouts rules of fairness and gives some people advantages that others don't have. Corruption is persistent; there is little evidence that countries can escape the curse of corruption easily-or at all. Instead of focusing on institutional reform, Uslaner suggests that the roots of corruption lie in economic and legal inequality and low levels of generalized trust (which are not readily changed) and poor policy choices (which may be more likely to change). Economic inequality provides a fertile breeding ground for corruption-and, in turn, it leads to further inequalities. Just as corruption is persistent, inequality and trust do not change much over time in my cross-national aggregate analyses. Uslaner argues that high inequality leads to low trust and high corruption, and then to more inequality-an inequality trap and identifies direct linkages between inequality and trust in surveys of the mass public and elites in transition countries. Eric M. Uslaner is Professor of Government and Politics at the University of Maryland-College Park, where he has taught since 1975. He has written seven books including The Moral Foundations of Trust (Cambridge University Press, 2002), and The Decline of Comity in Congress (University of Michigan Press, 1993). In 1981-82 he was Fulbright Professor of American Studies and Political Science at the Hebrew University, Jerusalem, Israel and in 2005, he was a Fulbright Senior Specialist Lecturer at Novosibirsk State Technical University, Novosibirsk, Siberia, Russia. In 2006 he was appointed the first Senior Research Fellow at the Center for American Law and Political Science at the Southwest University of Political Science and Law, Chongqing, China.

Synopsis: Global Nutrition Report 2015 International Food Policy Research Institute (IFPRI),2015-09-15 As we move into the post-2015 era of the Sustainable Development Goals (SDGs), the world faces many seemingly intractable problems. Malnutrition should not be one of them. Countries that are determined to make rapid advances in malnutrition reduction can do so, and the incentives to improve nutrition are strong. Good nutrition provides a vital foundation for human development, central to meeting our full potential. When nutrition status improves, it leads to a host of positive outcomes for individuals and families. Many more children will live to see their fifth birthdays, their growth will be less disrupted, and they will gain in height and weight.
