Acupuncture Houchi Dung, 2013-10-24 Practiced for more than 2,000 years, acupuncture was once restricted to the realm of alternative medicine. It was thought to be based on mythical elements and not easily understood by those in the scientific community. *Acupuncture: An Anatomical Approach*, Second Edition dispels these notions and brings this once backroom therapy into the forefront—explaining it in terms that can be easily comprehended by all medical professionals. Presenting a scientific, anatomical approach to acupuncture, this volume discusses: The basics of the nervous system Acupuncture points located in the head and face, formed by the cranial nerves The cervical plexus, which forms acupuncture points in the neck region Acupuncture points formed by the brachial plexus in the upper limbs, spinal nerves in the body trunk, and the lumbar-sacral plexuses in the lower limbs The anesthesia effect of biochemical substances in the nervous system The measurement and quantification of pain Applications of acupuncture in clinical practice, from cases easy to treat to those more challenging Theories on the future of acupuncture The treatment of pain, in general, is controversial, as many therapies have unintended consequences and side effects. Acupuncture provides a therapy that is quick, easy to perform, and requires no medications. This volume enables physicians, osteopaths, pain specialists, chiropractors, and other health professionals to perform this effective treatment for their patients who experience both chronic and acute pain.

Foundation Level Acupressure Diploma Course Karen E Wells,2019-07-15 Our Online Professional Foundation Level Acupressure Training Course is an in-depth self-study course providing you with an abundance of information regarding the health benefits of acupressure and this will form the solid foundations of practice. An ancient healing art, acupressure requires the use of fingers pressing upon key points on the body rather than using acupuncture needles to stimulate any healing abilities. As pressure is applied to specific points, blood circulation increases and this then promotes the release of any muscular tension. It is worth noting that within acupressure, the same points are used as would be within an acupuncture session but, by comparison to this more well-known therapy, there are no needles used at all. In many ways, this makes acupressure much more appealing, certainly to those clients who require the benefits of acupuncture but who may have an aversion to needles. There is a great deal of information contained within and each aspect must be studied until it becomes second nature. On completion, you will have the knowledge to practice, you must take an instinctive role toward healing, understanding and utilising the benefits of acupressure while incorporating the principles into your everyday life. The New Energy Anatomy M Bruce Dickson Mss,2011-12-05 A handbook-textbook-manual to empower simple, practical, at-home Goethean Science experiments. Written for: - Intuitive self-

healers, - Energy Detectives, - Students-practitioners of all Energy Medicine methods, - Intuitives working with clients. NOT your father's or your mother's old chakra book; NOT a rehash of chakras, auras, meridians. NOT Metaprograms in NLP (see Unconscious Patterns book). NOT a how-book on muscle testing (see Muscle Testing as a Spiritual Exercise). A CONSTRUCTIVIST approach to learning invisible human energy anatomy. Dozens of possible experiments in perception are outlined. The ideal reader is ideally: - Someone already self-testing by some method, - Working with 'God as your Partner' as this benefits everyone handling invisible energies, - Someone who conceives of self-mastery in terms of self-connection and heartfelt encounters with others. Meat and bone anatomy uses body planes, simple locational tools, to make useful distinctions in a physical body. These same locational tools remain useful for our four more invisible bodies in 3D space. In fact, the more invisible your target, the more useful simple location in 3D space becomes. Testable distinctions in human energy begin with: - top bottom, - front back, - RIGHT left, - YANG yin, - cool-cold warm-hot - overcharge undercharge. NEW Energy Anatomy shows how these distinctions are not energy neutral. They are full of useful information by which you can navigate. Our acupuncture meridians flows flow across these ranges. Our skin makes the outside of our physical body somewhat homogenous. Inside, our physical organs are not homogenous, have distinctly different shapes, textures and functions. Our etheric body also has regions and quadrants--but much simpler. Our invisible etheric body, our Immune System Self, is the other half of our physical body, our pre-physical body. If you think about it, our energy pattern HAS to be simple and utterly obvious for our cells and Child Within to apportion resources and navigate towards homeostasis. Individual patterns of energy function and dysfunction can be discerned and mapped. Locational mapping is ten times simpler and easier than trying to map target client concerns to auras, chakras and acupuncture points. Locational mapping is many times

more simple and direct than older esoteric anatomies. NEW Energy Anatomy can also start with, our TWO nervous systems, gut-brain and head-spine-brain, our two lower selves of our Three Selves. Are your two selves working together as teammates? These same simple locational tools also support advanced clairvoyant ability for those who have that.
