Pantomimes 101 James W. Gousseff, 1974-12

History by HBO Rebecca Weeks, 2022-06-28 The television industry is changing, and with it, the small screen's potential to engage in debate and present valuable representations of American history. Founded in 1972, HBO has been at the forefront of these changes, leading the way for many network, cable, and streaming services into the post-network era. Despite this, most scholarship has been dedicated to analyzing historical feature films and documentary films, leaving TV and the long-form drama hungry for coverage. In *History by HBO: Televising the American Past*, Rebecca Weeks fills the gap in this area of media studies and defends the historiographic power of long-form dramas. By focusing on this change and its effects, *History by HBO* outlines how history is crafted on television and the diverse forms it can take. Weeks examines the capabilities of the long-form serial for engaging with historical stories, insisting that the shift away from the network model and toward narrowcasting has enabled challenging histories to thrive in home settings. As an examination of HBO's unique structure for producing quality historical dramas, Weeks provides four case studies of HBO series set during different periods of United States history: *Band of Brothers* (2001), *Deadwood* (2004–2007), *Boardwalk Empire* (2012–2014), and *Treme* (2010–2013). In each case, HBO's lack of advertiser influence, commitment to creative freedom, and generous budgets continue to draw and retain talent who want to tell historical stories. Balancing historical and film theories in her assessment of the roles of mise-en-scène, characterization, narrative complexity, and sound in the production of effective historical dramas, Weeks' evaluation acts as an ode to the most recent Golden Age of TV, as well as a critical look at the relationship between entertainment media and collective memory.

The Sound of Music Caryl Flinn, 2019-07-25 Fifty years after its release, *The Sound of Music* (1965) remains the most profitable and recognisable film musical ever made. Quickly consolidating its cultural authority, the Hollywood film soon eclipsed the German film and Broadway musical that preceded it to become one of the most popular cultural reference points of the twenty-first century. In this fresh exploration, Caryl Flinn foregrounds the film's iconic musical numbers, arguing for their central role in the film's longevity and mass appeal. Stressing the unique emotional bond audiences establish with *The Sound of Music*, Flinn traces the film's prehistories, its place amongst the tumultuous political, social and cultural events of the 1960s, and its spirited afterlife among fans

around the world.

The Music Machine Curtis Roads,1989 In *The Music Machine*, Curtis Roads brings together 53 classic articles published in *Computer Music Journal* between 1980 and 1985.

Now Hear This John Naylor,2021-11-30 This book explains the nature of sound both as a physical phenomenon and as a sensation, how it travels through air and water, and how the hearing system evolved to convert these vibrations into sensations. Drawing on physics, biology, neuroscience, philosophy, literature, history, anecdote, and personal experience, *Now Hear This* is a wide-ranging exploration of the nature of sound and hearing that opens up a fascinating world of sounds from the mundane to the unusual and seeks above all to persuade the reader of the wisdom of John Cage's advice that "Wherever we are what we hear is mostly noise. When we ignore it, it disturbs us. When we listen to it, we find it fascinating."

Sound Unseen Brian Kane,2014 'Sound Unseen' explores acousmatic sound - a sound that one hears without seeing its cause. Pierre Schaeffer, the inventor of *musique concrète*, in his *Traité des objets musicaux*, first popularized the term 'acousmatic'. After an introduction, the first chapter provides a thorough exegesis of Schaeffer's theory of acousmatics. It also presents three objections to Schaeffer's theories (myth, phantasmagoria, and ontology) around which the book is structured.

Sound effects Laura Jayne Wright,2023-06-27 This book shows that the sounds of the early modern stage do not only signify but are also significant. Sounds are weighted with meaning, offering a complex system of allusions. Playwrights such as Jonson and Shakespeare developed increasingly

experimental soundscapes, from the storms of King Lear (1605) and Pericles (1607) to the explosive laboratory of The Alchemist (1610). Yet, sound is dependent on the subjectivity of listeners; this book is conscious of the complex relationship between sound as made and sound as heard. Sound effects should not resound from scene to scene without examination, any more than a pun can be reshaped in dialogue without acknowledgement of its shifting connotations. This book listens to sound as a rhetorical device, able to penetrate the ears and persuade the mind, to influence and to affect.

Sound Media Lars Nyre,2009-06-02 Sound Media considers how music recording, radio broadcasting and muzak influence people's daily lives and introduces the many and varied creative techniques that have developed in music and journalism throughout the twentieth century. Lars Nyre starts with the contemporary cultures of sound media, and works back to the archaic soundscapes of

the 1870s. The first part of the book devotes five chapters to contemporary digital media, and presents the internet, the personal computer, digital radio (news and talk) and various types of loudspeaker media (muzak, DJ-ing, clubbing and PA systems). The second part examines the historical accumulation of techniques and sounds in sound media, and presents multitrack music in the 1960s, the golden age of radio in the 1950s and back to the 1930s, microphone recording of music in the 1930s, the experimental phase of wireless radio in the 1910s and 1900s, and the invention of the gramophone and phonograph in the late nineteenth century. Sound Media includes a soundtrack on downloadable resources with thirty-six examples from broadcasting and music recording in Europe and the USA, from Edith Piaf to Sarah Cox, and is richly illustrated with figures, timelines and technical drawings.
