Database and Expert Systems Applications Trevor Bench-Capon,Giovanni Soda,A Min Tjoa,2003-07-31 The Database and Expert Systems Applications (DEXA) conferences bring together researchers and practitioners from all over the world to exchange ideas, experiences and opinions in a friendly and stimulating environment. The papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems. DEXA covers a broad field, and all aspects of database, knowledge base and related technologies and their applications are represented. Once again there were a good number of submissions: 241 papers were submitted and of these the programme committee selected 103 to be presented. DEXA'99 took place in Florence and was the tenth conference in the

series, following events in Vienna, Berlin, Valencia, Prague, Athens, London, Zurich, Toulouse and Vienna. The decade has seen many developments in the areas covered by DEXA, developments in which DEXA has played its part. I would like to express thanks to all the institutions which have actively supported and made possible this conference, namely: • University of Florence, Italy • IDG CNR, Italy • FAW – University of Linz, Austria • Austrian Computer Society • DEXA Association In addition, we must thank all the people who have contributed their time and effort to make the conference possible. Special thanks go to Maria Schweikert (Technical University of Vienna), M. Neubauer and G. Wagner (FAW, University of Linz). We must also thank all the members of the programme committee, whose careful reviews are important to the quality of the conference.

Manage 10 Factors Easily & Add 15 Years to Life - English Dr. S. Om Goel (MD / DM USA),2020-03-03 In 2020, there is only one reason for the sudden death, and that is “Heart Attack“. That too can be postponed by 15-30 years with 3 basic tests. Similarly, there are other factors also which decrease our lifespan. For example: If we smoke then we will get lung cancer in 20 years. If we drink excessively, liver will fail in 20 years. If Hba1c = 10/11 or blood sugar is approx. 300 (with no symptoms), then kidney will fail in 15 years. If we exercise everyday, we can delay memory loss. If we do knees exercise, they will be good till 70-75 years. If we have high cholesterol with no symptoms, it will dramatically increases the risk of heart attack. Increased BP (with no symptoms) will lead to sudden stroke where half of the body gets paralyzed (right side of the body gets paralyzed and patient loses speech also). In our day to day life we have simple steps to deal with these conditions as we have simple yearly tests available. We must have awareness about all these tests. If

we get these regular tests done at recommended interval and maintain our numbers within the normal range, then we can add 15-30 years healthy to our life, and extend lifespan up to 85 years.
