State Power 2.0 Muzammil M. Hussain,2016-04-01 Digital media and online social networking applications have changed the way in which dissent is organized with social movement leaders using online applications and digital content systems to organize collective action, activate local protest groups, network with international social movements and share their political perspectives. In the past, authoritarian regimes could control broadcast media in times of political crisis by destroying newsprint supplies, seizing radio and television stations, and blocking phone calls. It is much more difficult to control media in the digital age though there have certainly been occasions when states have successfully shut down their digital networks. What causes state-powers to block internet access, disable digital networks or even shut off internet access? How is it done, what is the impact and how do dissidents attempt to fight back? In this timely and accessible volume a collection of high profile, international scholars answer these key questions using cases from Israel, Iran, Russia, Morocco, Vietnam and Kuwait and assess the political economy of the actors, institutions and regimes involved and effected by the state-management and control of digital networks.

The Soft Cage Christian Parenti,2007-10-15 On a typical day, you might make a call on a cell phone, withdraw money at an ATM, visit the mall, and make a purchase with a credit card. Each of these routine transactions leaves a digital trail for government agencies and businesses to access. As cutting-edge historian and journalist Christian Parenti points out, these everyday intrusions on privacy, while harmless in themselves, are part of a relentless (and clandestine) expansion of routine surveillance in American life over the last two centuries-from controlling slaves in the old South to implementing early criminal justice and tracking immigrants. Parenti explores the role computers are playing in creating a whole new world of seemingly benign technologies-such as credit cards, website cookies, and electronic toll collection-that have expanded this trend in the twenty-first century. The Soft Cage offers a compelling, vitally important history lesson for every American concerned about the expansion of surveillance into our public and private lives.

Advanced Cellular Network Planning and Optimisation Ajay R. Mishra,2007-01-11 A highly practical guide rooted in theory to include the necessary background for taking the reader through the planning, implementation and management stages for each type of cellular network. Present day cellular networks are a mixture of the technologies like GSM, EGPRS and WCDMA. They even contain features of the technologies that will lead us to the fourth generation networks. Designing and optimising these complex networks requires much deeper understanding. Advanced Cellular Network Planning and Optimisation presents radio, transmission and core network planning and optimisation aspects for GSM, EGPRS and WCDMA networks with focus on practical aspects of the field. Experts from each of the domains have brought their experiences under one book making it an essential read for design practitioners, experts, scientists and students working in the cellular industry. Key Highlights Focus on radio, transmission and core network planning and optimisation Covers GSM, EGPRS, WCDMA network planning & optimisation Gives an introduction to the networks/technologies beyond WCDMA, and explores its current status and future potential Examines the full range of potential scenarios and problems faced by those who design cellular networks and provides advice and solutions all backed up with real-world examples This text will serve as a handbook to anyone engaged in the design, deployment, performance and business of Cellular Networks. Efficient planning and optimization of mobile networks are key to guarantee superior quality of service and user experience. They also form the essential foundation for the success of future technology development, making this book a valuable read on the road towards 4G. —Tero Ojanperä, Chief Technology Officer, Nokia Networks

Smart Frederic Martel,2018-07-05 Digitization is accelerating globalization tenfold. Social networks have gone mobile: telephone, television and towns have gone 'smart'. How did China manage to create clones of Google, Facebook and YouTube, and build its own censored version of the Internet? How do Arab countries use social networks for their revolutions? Why is there no minister for communications in the US, and why does no one regulate the Internet there? From Silicon Valley to Tokyo, from South Africa to southern India, and all the way to Cuba and Gaza, this unprecedented investigation in the field covers the whole battle of the Internet and its future.Drawing on hundreds of interviews in about fifty countries, Frederic Martel examines the different 'Internets' on five continents. In so doing, he reveals that we are moving not only into a connected, globalized world, but also a territorialized one. Smart shows that the Internet has never been truly global, and that it will become increasingly local.

Music in Conflict Nili Belkind,2020-10-15 Music in Conflict studies the complex relationship of musical culture to political life in Palestine-Israel, where conflict has both shaped and claimed the lives of Palestinians and Jews. In the context of the geography of violence that characterizes the conflict, borders and boundaries are material and social manifestations of the ways in which the production of knowledge is conditioned by political and structural violence. Ethical and aesthetic positions that shape artistic production in this context are informed by profound imbalances of power and contingent exposure to violence. Viewing expressive culture as a potent site for understanding these dynamics, the book examines the politics of sound to show how music-making reflects and forms identities, and in the process, shapes communities. The ethnography is based on fieldwork conducted in Israel and the West Bank in 2011–2012 and other excursions since then. Author has followed the conflict by following the music, from concert halls to demonstrations, mixed-city community centers to Palestinian refugee camp children’s clubs, alternative urban scenes and even a checkpoint. In all the different contexts presented, the monograph is thematically and theoretically underpinned by the ways in which music is used to culturally assert or reterritorialize both spatial and social boundaries in a situation of conflict.

Area C and the Future of the Palestinian Economy Orhan Niksic,Nur Nasser Eddin,World Bank,Massimiliano Cali,2014-06 This is the first report to systematically evaluate and quantify the economic potential of Area C, which constitutes approximately 61 percent of the West Bank. The report reveals that lifting the restrictions on economic activity in Area C is, among other things, probably essential for building a sustainable Palestinian economy.

Architecture of Resistance Yara Sharif,2017-05-08 Architecture of Resistance investigates the relationship between architecture, politics and power, and how these factors interplay in light of the Palestinian/Israeli conflict. It takes Palestine as the key ground of spatial exploration, looking at the spaces between people, boundary lines, documents and maps in a search for the meaning of architecture of resistance. Stemming from the need for an alternative discourse that can nourish the Palestinian spaces of imagination, the author reinterprets the land from a new perspective, by stripping it of the dominant power of lines to expose the hidden dynamic topography born out of everyday Palestine. It applies a hybrid approach of research through design and visual documentary, through text, illustrations, mapping techniques and collages, to capture the absent local narrative as an essential component of spatial investigation.

The Oslo Accords 1993-2013 Petter Bauck,Mohammed Omer,2013-09-09 Twenty years have passed since Israel and the Palestine Liberation Organization concluded the Oslo Accords, or Declaration of Principles on Interim Self-Government Arrangements for Palestine. It was declared “a political breakthrough of immense importance.” Israel officially accepted the PLO as the legitimate representative of the Palestinian people, and the PLO recognized the right of Israel to exist. Critical views were voiced at the time about how the self-government established under the leadership of Yasser Arafat created a Palestinian-administered Israeli occupation, rather than paving the way towards an independent Palestinian state with substantial economic funding from the international community. Through a number of essays written by renowned scholars and practitioners, the two decades since the Oslo Accords are scrutinized from a wide range of perspectives. Did the agreement have a reasonable chance of success? What went wrong, causing the treaty to derail and delay a real, workable solution? What are the recommendations today to show a way forward for the Israelis and the Palestinians?
